

'BEAR' FACTS

NEWELL HEIGHTS - On Sept. 14, Mr. and Mrs. Rollo Fenn went camping and fishing on the Little Malheur river. They slept that night in their trailer house, but before retiring they saw a bear - and then "he went over the mountain".

They wondered if he would return, and sure enough, around midnight he came back and awakened them by bouncing the trailer house.

It was moonlight, and the Fenns could see him clearly and they report "his head looked as big as a washtub".

Mrs. Fenn yelled at him from the trailer house window, and in doing so, she scared him and he ran.

The next morning there were tracks of "bear feet" in the mud showing that he had been all around the trailer house and pickup.

Another trailer house was parked nearby, but apparently the bear did not bother it.

The following day, the Fenns went to Malheur reservoir and report catching their limits of fish, without the help of a bear.

One place in Death Valley is 280 feet below sea level. The surface of the Dead Sea in Palestine is 1286 feet below sea level. Airplanes fly above the Dead Sea and give the passengers certificates to prove they have been flying below sea level.

Work Smarter - Not Harder

HOW ABOUT A REST BREAK? It might be a beauty aid because when you have aches and pains, your face will look drawn and tired. If you're rested, you'll look fresher. But, when? While youngsters nap or are at school, perhaps.

The best way to relax at home is to stretch out with your feet higher than your head. Cover your eyes with a cloth wrung out of cold water.

Perhaps we shouldn't mention it, but each time you add a birthday, rest breaks become more important. Not only does rest help your appearance, but it helps prevent accidents due to fatigue.

NOW'S THE TIME TO TAKE ADVANTAGE of high quality green beans, says Mrs. Valma Seat, Oregon State University food marketing specialist.

Green and wax beans should be kept in the refrigerator and protected from drying out before use. Washing the beans before storage gives them just a little extra moisture and helps keep them nice and fresh.

Tuck them in a plastic bag to prevent wilting. To be sure beans are at their best, buy only enough for use within a couple of days.

OUTDOOR FURNITURE often begins to look a bit dull at

this time of year - especially if left outdoors.

Mildew, residue of backyard picnics, and reminders of feathered friends in the neighborhood contribute to soil.

Your reed and wicker furniture will be freshened if you go after it with a brush dipped in a solution of three tablespoons liquid chlorine bleach mixed with a quart of water.

WHAT'S THE PURPOSE OF ENZYMES IN DETERGENTS? Recently you may have seen some new products on the market with mention of enzymes on the label.

These enzymes are chemicals which break down proteins, therefore, they help destroy stains such as blood, gravy, body soils and grass. Formerly, we recommended buying the enzyme pepsin at the drug store to remove protein stains.

We don't do any product testing, but discussed this subject with a technician from the Danish Government testing laboratories. Enzyme laundry products have been on the market in Denmark for several years. They have found them to be effective for the purpose intended.

Many a fellow gets a reputation for being energetic, when in truth he is merely fidgety.

DEATH VALLEY DAZE!

LET'S ALL WRITE WASHINGTON TO STOP THESE RUNAWAYS!

GRAHAM HUNTER

Americans consume as much sugar in two weeks as their great-grandfathers did in a year.

Men weigh up to five pounds more and women from two to six pounds less, on the average, than 40 years ago.

In addition to the drive-in movie, which started in the 1940's, there are now drive-in barber shops, churches, post offices, and banks. There are markets where shoppers attach baskets to their cars and drive up and down the aisles, while salesmen put groceries in the baskets. In Atlanta, Georgia, a pediatrician has a drive-in office, and in Texas there is a justice of the peace who will climb into your car and perform the ceremony.

Gossip always travels faster over grapevines that are slightly sour.

Some wives insist a fishing pole is a stick with a worm on both ends of it.

Obstacles are those frightful things you see when you take your eyes off the goal.

American's fat consumption is highest in the world -- double that of Russia.

A U.S. Public Health Study showed that 73 per cent of 1,000 obese people surveyed had at least one obese parent.

Emphysema now ranks second only to heart disease as a cause of disability.

Noise, according to some experts, may be a slow agent of death. If it increases in the next 30 years as it has in the last 30, it could become lethal.

The quickest way to get a lot of undivided attention is to make a mistake.
