GREENHOUSE PLANS AVAILABLE

Many amateur gardeners have long wanted their own greenhouses, but have hesitated because they just aren't sure what would be "right" for their interests and pocketbooks.

"The Hobby Greenhouse," a new bulletin now available from the Oregon State University Cooperative Extension Service, is designed to give home gardeners some basic information so they can make some sound decisions before starting a greenhouse project.

The new bulletin covers such subjects as materials for construction, heating systems,

Best of Show!

McCulloch's Power Mac 6 - world's lightest chain saw - is a winner.

A winner with chain saw users as a whole. It's the fastest-selling, most popular lightweight chain saw ever introduced.

A winner with professionals. Mr. Charles L. Bengt, president of TREES OF HOUSTON, a tree service employing 435 men and operating over 450 chain saws, says:

"Of the 206 Power Mac 6 units we've purchased to date, 204 are still on the job! We normally 'write off' a chain saw after 400 hours of operation - an average of 20 running hours per week for 20 weeks. Our records indicate that our Power Mac 6 saws are actually lasting well past 400 hours. In addition, maintenance costs on the Mac 6 have been extremely low, and there's been a noticeable increase in crew efficiency - a direct result of the saw's light weight and remarkable handling characteristics."

Yes, any way you look at it, the Power Mac 6 wins. And don't forget. Now, there's the Power Mac 6 A. "A" for automatic oiling. A very handy feature on a very handy saw.

Isn't it time you put your money on a winner? Start by looking up your McCulloch dealer in the Yellow Pages under "Saws."
