THUNDEREGG MALL — GOLD STRIKE STAMPS TOO!

# Chloro IPC is death on dodder.

And a hero to your alfalfa seed crop. PPG's Chloro IPC Herbicide stunts dodder seedling growth during the crucial 10 to 14 days between seed germination and attachment to the host alfalfa plant. Your alfalfa won't be sapped of energy-producing nutrients needed to maximize growth and seed yield.

You'll get a bigger alfalfa seed harvest, a higher grade of seed and lower cleaning costs. Your local supplier has a complete dodder-control program worked out for you. Check the dealer listed below. If you prefer, write to PPG Industries, Inc., 1500 N.E. Irving Street, Portland, Oregon 97232.
