Small Business Week, 1971
 By the President of the United States of America
 A Proclamation

The American tradition of independent enterprise is as old as our society itself. The freemen who tended little stores, ran coastwise shipping, traded in furs, or made candles helped this tradition put down deep roots early in our history. "What most astonishes me," wrote de Tocqueville as he took the measure of our young nation in the 1830's, "is not so much the marvelous grandeur of some undertakings as the innumerable multitude of small ones." From such beginnings, small business has grown into one of the principal economic forces in this, the world's greatest industrial nation.

Today--its name aside--small business is BIG. Nineteen United States firms in twenty are small businesses. They do nearly three-fourths of the total volume of sales and one-third of all manufacturing. For the industry and resourcefulness which millions of Americans invest in them as owners and employees, they return not only profits but also the rich rewards of self-reliance. They contribute to the wide diversity of our society and our economy, and they offer members of disadvantaged minority groups an open door into full participation in the Nation's prosperity--a door through which black Americans, Spanish-speaking Americans, Indians, and other minority enterprisers are now passing in increasing numbers.

But if small business is to realize its full potential in the years ahead, it needs and deserves wholehearted support from citizens and the business community as a whole, as well as the strong encouragement it already receives from government.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby designate the week beginning May 16, 1971, as Small Business Week. I ask all Americans and their business organizations to join with me during this week in paying tribute to the accomplishments of small business and in helping small business toward continued strength and success.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of April, in the year of our Lord nineteen hundred seventy-one, and of the Independence of the United States of America the one hundred ninety-fifth.

LETTER TO EDITOR

Editor, The Journal:
 Since 1942 Eastern Oregon has been my home and the history of its great acres is an epic saga of rugged pioneering. The struggle against a long established wild habitat should be blazoned on a wall for every "Johnny-come-lately" to read. This fair land was reclaimed by long days of back breaking labor done by men, women and children. There were no conveniences, no abundant foods, no free doctors. Welfare was non-existent. Few families had a well in the yard.

As I sat in that ultra-modern school room, where the salt of the community were met in an honest effort to bring order out of chaos by nominating an elective board to administer migrant affairs, all about me was the blood of these same pioneers who had made this earth's productivity possible. The very heart beat of our present security.

We are asking what legal authority holds this consensus of public opinion in contempt? Label it not legal? Why may we be forced to submit to a jurisdiction of another state being administered in a third state? Does our constitution support this, or does the whole business smack of the Boston Tea Party? Are we to accept a silent partnership in a movement that has its loud voice?

We understand the Federal Government has allotted a goodly sum of money to finance this project. What portion of this will reach our state? Since when has the proud State of Oregon needed baby sitters in an alien state? From what our friends tell us Boise should have its hands full keeping their taxpayers smiling. Were we correct in that a "sugar tit" was tendered us - "one may apply for a seat on the board." This is akin to asking the holder to surrender the goose that lays the golden egg.

Federal funds are used on our highways and parks. Can we be sure our state is left to administer them? Thinkwell on these matters.

Bessie E. Long
