Reminder Given On Farm Storage Loans

Malheur County farmers are reminded that very little time is left to prepare for harvest time storage needs for grain crops. According to Blaine Girvin, Chairman of the Malheur County Agricultural Stabilization and Conservation Committee, the loan program for farm storage has been liberalized to include both wet and dry storage as well as lower interest rates and increased maximum loan amount.

Storage facility loans may be made on the basis of two years production of a farmers crops which are eligible for price support loans. Girvin said eligible producers may obtain loans to buy needed drying equipment as well as to build new storage structures, pointing out that the last few years have seen development of many new harvesting, conditioning and storage techniques for farm crops.

Details on farm storage and drying equipment loans are available at the Malheur County ASCS Office, 1252 S.W. 4th Ave., Ontario.
