

### New Member Seated On River Commission

The Environmental Protection Agency, created December 2, 1970, as the federal government's environmental watchdog, will be officially seated as the 15th member of the Pacific Northwest River Basins Commission at the commission's second quarterly meeting in Cody, Wyo., September 8.

EPA has been monitoring commission meetings since the first of the year and becomes a member of all five river basins commissions by executive order issued August 2.

Members attending the Cody session will hear Wyoming Governor Stanley Hathaway speak at a joint banquet with the Western States Water Council

which will convene September 9-10 in the Wyoming city.

Formal commission business will include a summary of the Columbia-North Pacific framework study nearing completion by the commission, a synopsis of water legislation enacted by the five states, a report from the Corps of Engineers on its Columbia River and tributaries study, and a report and discussion of the commission's comprehensive plan and the Western U.S. Water Plan Study.

Under the guidance of Commission Member John Bereman of Cody, the afternoon session will be conducted by officials from Wyoming on The Equality State.

### CANNING THE CAN

Garbage is a dirty word in many American communities who have found that refuse collection and disposal rank third in community costs — right after roads and education.

In the nick-of-time, however, a new system has appeared which can lower pickup costs by 20% or more and, at the same time, dispose of the clutter and clank of garbage cans and the mess of spilled garbage.

The idea is a simple one: replace the garbage can system with a new one that does away with the need to lug heavy cans to the trash trucks and back — and the need to pick up spills.

Instead of a can, garbage is put into a fresh, clean disposable paper sack that is supported by a metal frame, and has an attached lid. Only the bag is portable. To collect the garbage the bag is lifted out of the frame and thrown into the truck. Besides eliminating pickup labor, mess, noise and a breeding ground for flies (the can), the system will also eliminate many a wrenched back — especially during winter months, when wet garbage has a tendency to freeze and stick to the can.

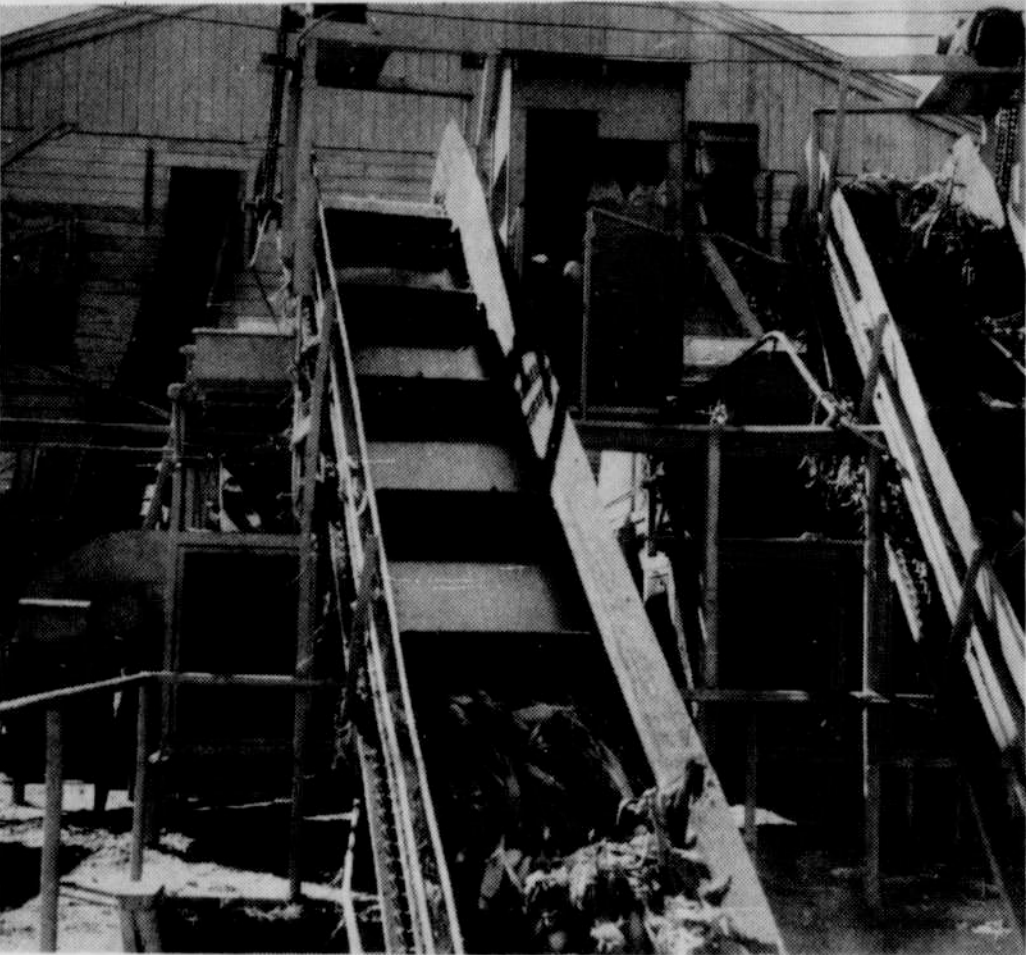

The paper must be strong, especially when wet. Before

paper was selected by the Swedes, who invented this system, various plastic materials were also considered for the job. Some failed because they formed erosive vapors when burned. Others lacked sufficient strength. All plastic materials suffer from one serious deficiency in landfill — they do not easily degrade by the natural processes which convert much of our garbage back into soil.

Perhaps the most effective way to dispose of a community's garbage once it is collected is by burying it. Unlike burning, which tends to pollute the air, burial breaks garbage down without harmful effects to the environment. Since plastic is not easily broken down by bacteria, buried plastic bags protect themselves and their contents from the very natural processes that would dispose of our disposables in the most desirable way.

For facts on the new paper sack system, together with the reaction on the American communities who have already adopted them, write the National Refuse Sack Council, 60 East 42nd Street, New York, New York 10017.

### American Fine Foods Operation

Top photo shows a load of corn being dumped from a farm truck at Nyssa's American Fine Foods Cannery. Here the load is weighed and tagged before entering the conveyor belts and into the cannery.

In the lower picture the operator of the conveyer belt is shown as the corn moves into the cannery for processing.

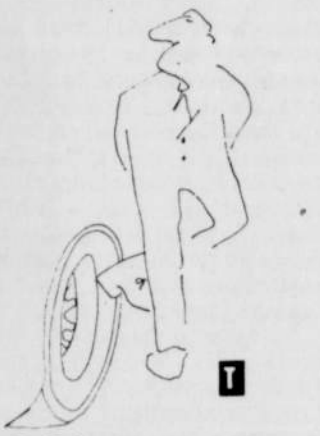

This large factory employs over 350 people during the corn season, in addition to the 20 who make up the year-round personnel.

### TRY THIS TIRE SAFETY QUIZ

You can kick a tire all you want — or as hard as you want — but a well-placed boot won't tell you what you need to know about getting the safest possible ride and the most miles for your dollar.

This test will — so give it a try!

- You should replace the tires on your car when the tread in two adjacent grooves is —
  - Less than 1/16"
  - Less than 1/32"
  - Less than 1/8"
  - Less than 1/4"
- "DOT" spelled out on the sidewall indicates the tire has a separate air pressure rating for turnpike-speed driving.
  - True
  - False
- Tires on 1970-model cars are lasting longer primarily because of —
  - Better tread design.
  - Stronger treads.
  - Reinforcing belts beneath the tread.
  - Increased sidewall strength.
- For turnpike-speed driving over long periods, you should — tire pressure.
  - Increase
  - Decrease
- You should rotate your tires every —
  - 2,000 miles.
  - 3,000 miles.
  - 5,000 miles.
  - 10,000 miles.
- If you feel vibrations in the steering wheel, your wheels are most likely —
  - Over-inflated.
  - Under-inflated.
  - Out of balance.
- The majority of the tires on new model cars are belted with — for longer mileage.
  - Rayon
  - Polyester
  - Cotton
  - Fiber Glass
- Not enough air in the tire allows internal heat buildup that can soften your tread.
  - True
  - False
- An additional cause of tire wear could be —
  - An overloaded vehicle.
  - Faulty brakes.
  - Worn shock absorbers.
  - All of the above.
- Fiberglass® belts beneath your tread will give —
  - Up to double the mileage of two-ply tires.
  - Better gasoline mileage.
  - A cooler running tire.
  - All of the above.

- For a free tire booklet, visit your local independent tire dealer or write Tire Kicker Test, Owens-Corning Fiberglas Corporation, Attention: M.E. Meeks, Fiberglas Tower, Toledo, Ohio 43601.
- Answers:  
1-D, 2-A, 3-C, 4-A, 5-C, 6-C, 7-D, 8-A, 9-D, 10-D.

### ACTIVITIES IN ARCADIA

BY AVO MOELLER - PHONE 372-2733

APPLE VALLEY - Mr. and Mrs. C.L. Fritts, Mr. and Mrs. Clarence Tuning and Mr. and Mrs. Robert Tuning of Caldwell spent Monday thru Sunday vacationing at Deadwood last week.

Mrs. Virginia Rookstool and son Ansel Rookstool and daughter Betty Locke both of Los Angeles were guests of Mr. and Mrs. Roy Rookstool last week.

Mr. and Mrs. William Hendricks of St. Joseph, Mo., were dinner and overnight guests Wednesday of Mr. and Mrs. Roy Rookstool.

Mr. and Mrs. Roy Rookstool attended a family dinner given in honor of Mr. and Mrs. William Hendricks Sunday in the home of Mrs. Lynette Seburn at Caldwell.

Mr. and Mrs. Dwight Seward and Gary visited in Washington Wednesday thru Saturday with Katie Morrill at Grandview, Mr. and Mrs. Albert Morrill at Benton City and Mr. and Mrs. Lester Robinson and family at Connell.

Sunday dinner guests in the Dwight Seward home were Mr. and Mrs. Hugh Pierce and family of Boise and Mr. and Mrs. Emory Rathbun of La Puente, Calif. Kent Pierce remained for a weeks visit before school starts.

Mrs. Lloyd Dibble visited Tuesday evening with Mrs. William Knox.

Henry Dibble of Cambridge was a Thursday overnight guest of his parents, Mr. and Mrs. Lloyd Dibble. Henry and Sue attended the concert that evening at the Community House in Parma.

Sue Dibble attended the open house reception Sunday afternoon for Mr. and Mrs. Kenneth Reno on their 25th wedding anniversary.

Sunday evening Mr. and Mrs. Waldo Smalley visited in Ontario with Mrs. Luella Breneman and Mr. and Mrs. Robert Smalley and family.

Mr. and Mrs. Earl Boston put their grandson, Gregory Boston on the plane Monday for his return home to Huntington Beach, Calif.

Mrs. John Boston returned home August 16 after major surgery on August 11 at the Nyssa hospital.

Mr. and Mrs. Burton Smith of Ontario were August 13 guests in the Dwight Seward home. Mrs. Smith had just returned from her summer school work.

Dr. Charles Dethrick and daughter Ann of Salem were August 15 overnight guests in the Dwight Seward home. They were on their way to Wichita, Kans., where Ann has employment as a speech pathologist in a medical clinic.

Mr. and Mrs. Kirby Pitman and daughter of Tacoma, Wash., were visiting his parents Mr. and Mrs. Chas. Pitman Aug 15-16 and then visited her parents in Boise.

Mr. and Mrs. James Reed of Dunning, Nebr., visited with Mr. and Mrs. Chas. Pitman Thursday thru Saturday, Friday Mr. and Mrs. Harvey Pitman and sons of Boise were dinner guests and visited with the Reeds.

Gregory Pitman who has been helping his grandfather Chas. Pitman this summer returned home Friday evening to prepare for school this fall.

Mr. and Mrs. Waldo Smalley returned Thursday evening from a weeks visit with their daughter and family Mr. and Mrs. Doug Daniels of Glenwood, Wash. While there they enjoyed a drive over the beautiful mountain roads to Swift Creek Reservoir for a picnic and boating on the lake.

### Annual Mormon Religious Spectacle Has Cast of 500

The triumphant appearance of Christ to an ancient American civilization after his death and resurrection in Jerusalem climaxes an awe-inspiring pageant to be presented near Palmyra, New York July 26-31.

This will be the 1971 production of America's most famous, most elaborate religious spectacle — The Hill Cumorah Pageant — with a cast of 500 performers.

More than 100,000 spectators from over the United States and from overseas are expected to journey to Hill Cumorah to witness another in a stirring portrayal of the Mormon concept of the rise and fall of an ancient American civilization.

There is no charge for seating or parking, no hawking of souvenirs and refreshments, no commercialism of any kind, and donations are neither solicited nor accepted. Palmyra is in the Finger Lakes Region of Western New York — 25 miles east of Rochester.

STAGES ENLARGED

In preparation for this year's production, Dr. Harold I. Hansen, the Pageant's director since its inception, in 1937, has had the five major stages widened by 22 to 32 feet so that they now measure 105 feet to

135 feet. In addition, there are 20 secondary stages located over the broad western slope of Hill Cumorah.

To the accompaniment of stereophonically-recorded music by a chorus of 300, the Utah Symphony of 80 pieces, and the renowned Salt Lake Tabernacle Organ of 11,000 pipes, the action shifts from stage to stage, some of which are veiled by curtains of water on which varicolored lights paint effects of breathtaking incandescence.

FOUND NEW CIVILIZATION

Scene by scene, the 500 young performers arrayed in authentic costumes of ancient Greek, Roman, Hebraic, Mayan and Aztec design, enact highlights from the Bible and the Book of Mormon. The latter book, held by Mormons to be complementary to the Bible, tells the story of a group of Israelites which, by the grace of the Lord, sails 600 years B.C. to escape the destruction of Jerusalem and found a new civilization in the New World.

For a period this civilization, faithful to the teachings of the Lord, flourishes; magnificent cities and imposing temples arise. At times, however, evil kings ascend to the throne and oppress the faithful, persecute their righteous prophets. Then armies arise to restore justice in the kingdom.

BIZARRE REVELS

In one period, a faction of malcontents moves away into the wilderness, slips into savagery with barbarous rites and revels.

This is one of the more bizarre scenes in the performance.

As the years pass, two factions of the civilization fight a war of extermination.

Perhaps the most exciting scene in the whole Pageant is the destruction of the City of

When General Moroni (left), leader of the Christian army in the Hill Cumorah Pageant, calls on his captains to fight for the cause of liberty, they throw their cloaks at his feet as a pledge of their loyalty. King Lamoni (with outstretched arms) rules over a faction which fell away from the teachings of the Lord and turned to barbarism. The king is shown here (right) as he is converted to Christianity by a young missionary sent by those remaining true to their faith.

Zarahemla by earthquake, lightning, conflagration — a punishment for the wickedness of its inhabitants. Only the righteous are spared.

BIBLICAL SCENES

Among the visions of scenes of Biblical events in the Holy Land are the Nativity, Jesus ministering to his followers, his arrest by Roman soldiers, his crucifixion.

Utterly unforgettable is the great scene in which Christ, as described in the Book of Mormon, appears to his "other sheep" in the New World. In this scene the entire cast of 500 moves slowly and reverently up the slope of Hill Cumorah toward the white-robed figure of Christ at the top of the hill.

It was on Hill Cumorah that Joseph Smith, a young farm-boy of the neighborhood, was led by the Angel Moroni to find the golden plates of the Book of Mormon, which told the history of the ancient American civilization dramatized by the Pageant.
