1974 Chevy Cheyenne Super Pickup

Significant brake improvements are featured in the 1974 Chevrolet pickup line. Computer-selected brake systems are tailored to the loaded weight rating of the truck, as specified by the buyer, to give brake performance similar to that of a passenger car. With loaded weight ratings of more than 6800 lbs., a new hydraulic power assist is standard. Other improvements in the 1974 line include a larger displacement standard engine in most V8 models, full-time four-wheel drive in all 4 X 4 V8 models, interior refinements, four new colors, and optional bright roof drip moldings.

KINGMAN KOLONY NEWS

BY DALE WITT — PHONE 372-2183
