

ACTIVITIES IN ARCADIA

NELL BOWERS

ARCADIA - Mr. and Mrs. Everett Edmunson spent Memorial Day at Drewsey visiting friends and relatives.

Mr. and Mrs. C. R. Kesler Sr. and daughter Sally, made a trip in their new motor home over the Memorial Day weekend. They went to Provo, Utah and picked up their daughter, Karma. They all toured the Flaming Gorge. They came back through Green River, Wyoming to Salt Lake. They stayed Monday night in Salt Lake. While there they visited the cemetery at Bountiful and also at Magna, where they have several graves of relatives. They picnicked with Mr. and Mrs. Joe Kesler and visited. On Tuesday they went to the Salt Lake airport to bid goodbye to their grandson Connel Petterson, who left with several other missionaries for South Africa. The Keslers left Salt Lake about 1 p.m. for Rupert, Idaho where they stayed with Mrs. Kesler's sister, Mr. and Mrs. Wayne Wheeler before returning to their home.

Anna Grace Edmunson went to Boise this week to take her grandsons home. They had been visiting Mr. and Mrs. Edmunson while their parents, Mr. and Mrs. Mike Mather were on vacation. Mrs. Mather is the daughter of the Edmunsons.

Mr. and Mrs. Melvin Feik and daughter Marla flew to Lewiston, Idaho this week, to visit their daughter and family. Mr. and Mrs. Larry Campbell who are the proud parents of a new son. They left Marla for a while to help the family.

Mr. and Mrs. Parley Feik received the news of a new great-grandson, born to Mr. and Mrs. Larry Cambel, of Lewiston, Idaho. This is the Feiks third great-grandchild.

Margie Hust and daughter Georgia went to Boise, Monday morning where she picked up Mrs. Minnie Houston at the airport. Mrs. Houston lives in Downey, California. The two ladies and Georgia will tour the eastern United States for several weeks this summer.

Mr. and Mrs. Tom Drydale returned from a two weeks trip May 30. They went to Missouri, first. They visited one of Tom's sisters at St. Joe, and others at Bolckow, and Guilford. One sister came from California so that all of the sisters, five in number and Tom were together for the first time since 1945. On the way back home they stopped in Danbury, Nebraska to visit Mr. and Mrs. Joe Tully. Mrs. Tully is a niece of the Drydales. They also visited another niece, Mrs. Robb Williams and husband at Sinclair, Wyoming. They took a side trip into Colorado, at Yuma cemetery where Mrs. Drydale's great grandparents and her grandparents are buried. They also visited the cemetery at Vona, Colorado where Tom's relatives are buried. They visited another niece on the way home at Pocatello, Idaho.

Mr. and Mrs. Henry Carroll had word this week from a niece about 35 miles from Tulsa, Oklahoma. Her home was directly in the path of the tornado that hit Tulsa and her home was destroyed. No one was injured, however. Also, they heard

Local Girl To Perform With U.S. Honor Choir

Ruth Stephen, a junior at Nyssa High School has been selected to accompany The United States Honor Band and Choir in its forthcoming Summer 1974 concert tour of Scandinavia and Eastern and Western Europe.

RUTH STEPHEN

Selected by audition from among the finest young musicians in the United States, Ruth will be among a group of 175 outstanding

from Mrs. Carroll's brother who lives in Tulsa. The tornado hit their place and damaged their home quite badly and wrecked four cars that were sitting in their yard. No one there was injured.

Mr. and Mrs. Otis Bullard visited Mr. and Mrs. John Zittercob, in Nyssa Sunday. Other guests were Mr. and Mrs. Harold Schofield of Portland.

Mr. and Mrs. Otis Bullard visited Al Thompson who is in the Nyssa Hospital again this week.

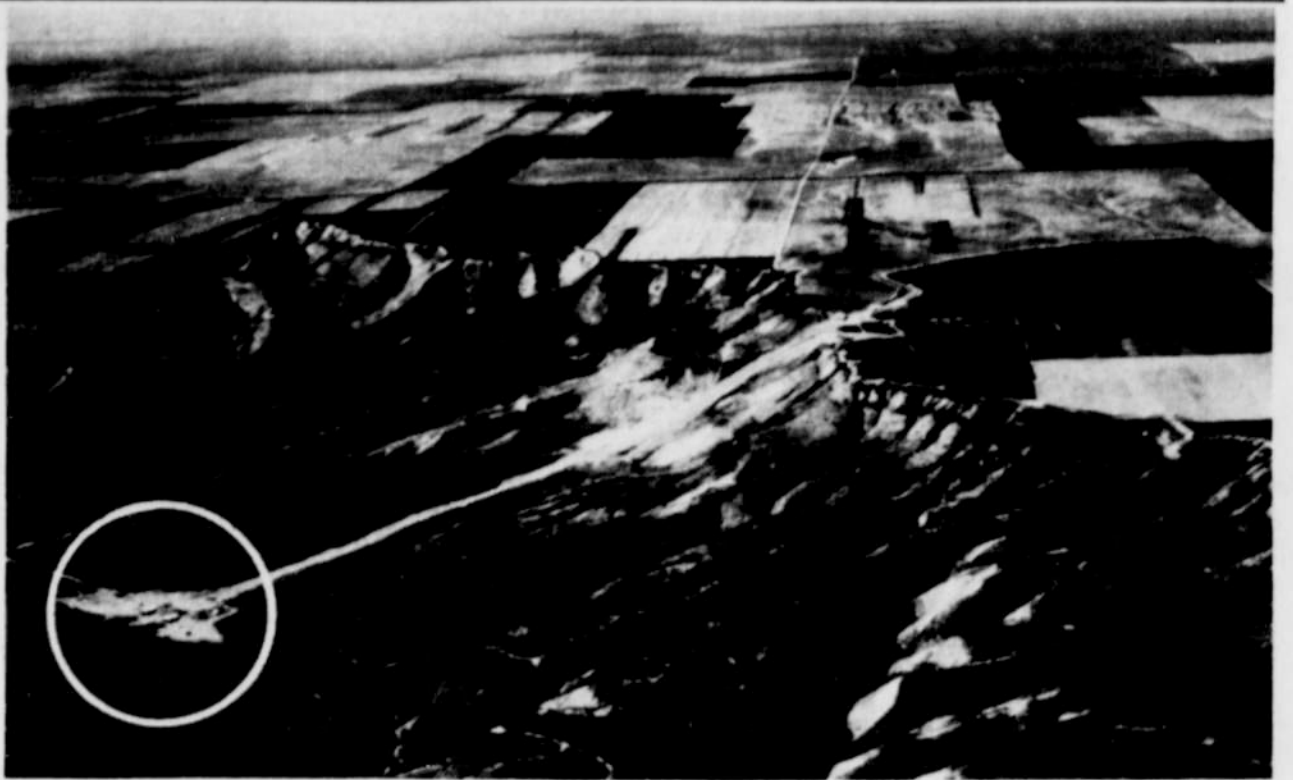

vocalists and instrumentalists who will take part in the 26-day tour.

The program will commence on June 22, 1974, with departure for Stockholm, Sweden. Stockholm will be the site of the first of 9 performances which will include concerts in Denmark, East Germany, West Germany, Czechoslovakia, Austria, and Switzerland.

Musical direction is under the baton of Dr. Robert Winslow, Director of Bands at the University of California at Los Angeles, and Dr. Charlene Archibueque, Director of Choral Activities at the California State University at San Jose.

Organization of the tour program is under the direction of J. Frank Turner, Chairman of the Music Department at Santa Monica College, Santa Monica, California. Other supervisory personnel and chaperones are educators who have been selected for their assignments on the basis of proven success while working with young people.

The 1973 tour of the United States Honor Band and Choir brought highly enthusiastic reviews which acclaimed the superior musical accomplishments of the group and lauded the fine image of American youth exemplified by the group.

BELL RAPIDS PUMP-IRRIGATION PROJECT near Hagerman, extending as far as the eye can see in this aerial view, has transformed more than 25,000 acres of desert into

productive cropland in five years. Water to sprinkle its flourishing farms is lifted as much as 625 feet from two pumping plants in circle and one other upstream.

WATTWISE Home Making Tips

BY HELEN L. JOHNSON Home Service Rep. Idaho Power Co.

Convenient kitchens

The kitchen is primarily a place to store and prepare food but this important room serves additional functions, it is the "heart of the home." Eating accommodations, a preschooler's play area, a "family room" for visiting, reading, and TV viewing are just some of the many duties today's kitchens serve. Common kitchen design problems facing every homemaker today are: storage, workspace, lighting and energy conservation.

When planning your new kitchen or an extensive remodel think in terms of an imaginary triangle connecting sink, range and refrigerator. Time and steps are saved if the total distance around the triangle does not exceed 22 feet. This work triangle should be out of the path of traffic. If you have a large kitchen, a center island helps reduce steps by providing extra work space within

an arm's reach of all activity centers. The sink is usually the busiest spot in the kitchen, so locate it first, hopefully including a food-waste disposer. The dishwasher should be located adjacent to and to the left of the sink (visa versa for lefties.) There should be at least 24 inches of counter space on each side of the sink with extra work space allowed for food preparation, cooling, etc. The counter area should be wired to handle small appliances which you now have and those which you plan to acquire in the future. Locate the cooking area close to the eating area for easy serving of food. The refrigerator should be located closest to the door through which groceries are carried with the refrigerator opening toward the work area. In the case of side-by-sides this means the door of the refrigerator rather than the freezer.

Plan the lighting so that you are not working in your own shadow. Lighting under upper cabinets illuminates the counter area and over head lighting lights the rest of the room.

Even if you are not planning a new home or remodel of your kitchen these timely hints may help make your kitchen a better working area. Set up an electric baking center in one corner of the kitchen with its own electric lighting, which eliminates the need for general lighting. Some ideas to put to work are as follows:

1. Plan cupboard or cabinet storage for baking utensils.
2. Use turntable to keep tiny boxes of spices and other ingredients within easy reach.
3. Add casters to inexpensive standard kitchen cabinet and countertop to make handy roll-around unit for storage and work space.
4. Install a portable fluorescent fixture (one that plugs into an outlet) on underside of overhead cupboard.
5. A counter saver on the counter-top lets a person chop, mince, dice, roll pastry, use as a hot pad, etc., with no fear of harming the counter.

Spotlight on HEALTH

Some Dental Patients Suffer From "Preventaphobia"
"Preventaphobia" may well become a new word in dental circles. It refers to patients who may cringe at the prospect of brushing their teeth and "flossing" them because tooth care can be a painful procedure for them. These are individuals who suffer from overly-sensitive teeth.

Persons with hypersensitive teeth experience pain ranging from a slight "twinge" to severe pain. One or more teeth may be affected. Dental hypersensitivity is often related to exposed tooth dentin and cementum, the tooth structure under the enamel and gums, but also to some extent to an individual's threshold of pain, and perhaps also to emotional and psychic factors—often a consequence of suffering from the condition.

Although treatment for it used to involve many visits to a dentist's office, recent methods include home care and proper toothbrushing—but with a "therapeutic" toothpaste and toothbrush. Dentists often recommend a toothpaste containing a non-toxic strontium chloride and a toothbrush with extra-soft bristles. Commercially both are available under the name of Sensodyne.

Take the 'FURNACE' out of your Attic

An attic fan will make your home more comfortable this summer — and increase energy efficiency, too!

Air trapped under the roof of your home may reach temperatures as high as 150 degrees in the summer. The trapped hot air acts as a "furnace," sending heat throbbing into your family's living area.

An attic fan exhausts the super-heated air and helps reduce temperature buildup in rooms below. Attic fans also reduce heat loads on air conditioners so they don't have to work as hard to maintain home comfort. A fan may reduce the amount of energy you consume for cooling.

Besides helping solve your cooling problems, an attic fan also can protect your attic, roof and insulation from deterioration caused by excessive summertime heat and wintertime moisture.

For a limited time (May 6 to June 28, 1974) Idaho Power residential customers may purchase attic fans at Idaho Power offices.

Homeowners may pay for the fans on their electric bills, if they wish.

Cash price, installed	\$ 99.95
