## Wattwise Home Making Tips

Fifth in a series of six articles on proper laundry procedure.

**Electric clothes dryer** is the best thing that ever happened to washday blues. The final installments of the laundry series will help you to know what an electric dryer can do.

**Smoothing Wrinkles (or raising Nap)** To steam out wrinkles in stored away wool, gabardine or rayon garments, place in electric dryer along with a couple damp bath towels. Tumble about 5 minutes, hang garments on rust proof hangers until thoroughly dry. This also works to raise nap on velvet or velveteen garments.

**Fresh Air Fragrance:** To remove mothball odors from stored items, place in an electric dryer singly and allow each to tumble 10-15 minutes. When removed the fabric will be fluffy, wrinkle free and fragrant.

**Knitted Synthetic Garment** Knitted nylon, polyester, acrylic and other synthetic fiber garments dry soft, fast and fluffy in an electric dryer.

Place large towels inside the dryer to cushion tumbling action. Do not over-dry.

**Nylon & Nylon-cotton Jackets & Snow Suits:** Place garment in electric dryer for approximately 10 minutes. Remove, turn inside out and put back in dryer for another ten minutes. Hang on non-rust hanger to finish air drying.

**Airing and Dusting:** When curtains are not soiled, but require airing and dusting, use an electric dryer to "revive" them. Allow several pairs of curtains at a time to tumble freely without heat. This method may be used to loosen wrinkles and musty odors from drapes and slipcovers taken from storage.

If clothes are put in a dryer with a stain or dirt, heat will set the stain and make it harder to remove.

If you don't already have one, you'll find a simple mesh bag very handy for drying small items such as hose, shoe laces, gloves, etc. You can buy or make a mesh bag inexpensively.

## Bulldogs Lose Opener, 55-28

The Nyssa Bulldogs opened their basketball season at Emmett Tuesday evening on a losing note as they were downed by the Huskies 55-28.

Cruz Martinez was the only Bulldog in double figures with 10 points, but he and his teammates were cold and could not hit the basket with consistency. Close in the first half, Nyssa was held to 9 points in the last two quarters.

**If U.S. farmers are entitled to all the lubricants they need why buy early?**

Federal Energy Administration Regulations, Section 211.203

Although farmers are not on allocation, CENEX, as an oil compounder, is allocated only the same quantity of base oils it received in 1973. If our customers' needs next spring exceed our allocations, we must request additional allocations from the FEA.

But, that takes time... time you may not have. Because planting can't wait. So help us help you. Lay in your supply of lubricants now... all that you need, but no more than you need to see you through.

And, you may be using more lubricants next spring. With all-out crop production called for, you'll be working all available acres. Your equipment will be running hot and running long. You'll need the dependable protection of your CENEX oils and greases.

That's why you use them. That's why we want you to have them.
