By HELEN I. JOHNSON Residential Advisor Idaho Power Company

**What's Cooking in the Kitchen**—A few years ago smooth-surfaced cook tops were dramatic additions to any home, but today, although farm from common place they are much more visible. These new cooking appliances look like a smooth sheet of white, glass-ceramic material, and are uncluttered by heating elements. The electric elements are hidden beneath the smooth flat top.

The cooking surface is defined by a sunburst or similar design that brightens somewhat when heated. The unit will take a little bit longer to heat and cool than conventional electric surface units. The rest of the cooktop doesn't heat, leaving it cool to the touch.

For protection, most smooth cook tops have an indicator light on the control panel to let you know when a unit is turned on—a few have warning lights that stay on until the surface is cool enough to touch.

Smooth cook tops are easy to clean, simply wash the surface with a sudsy cloth and wipe it dry. If areas over the heating units become discolored from food spills or from pots with unscrubbed bottoms, use a mild cleanser or a cleaner designed specially for these appliances.

To have good results when cooking on a smooth cook

top, use pots and pans that are smooth, flat-bottomed and of good quality so that they don't bow out of shape when they are hot. On a thermostatically controlled unit it is especially important to have flat bottomed pans so that the thermostat can work accurately.

There are many brands of smooth cooktops, some with digital numbers you simply touch to control with no knobs, dials, or levers. Other have heating panels that can be lifted out and replaced by other accessories, such as a grill, rotisserie, or french fryer. Perhaps you are considering acquiring a new range, be sure to check the wide variety of sizes, types and features available.

**Cold Water Laundry**

Conserving energy in the home is high on the priority list for homemakers. One obvious way is to use less hot water. The question is, does cold-water washing really get clothes clean? Warm or hot water is still the best for removing Heavy or Greasy soil. But for Lightly or Moderately soiled items cold water can be substituted for hot with good results. Heavily soiled clothes that have been presoaked can also be washed in cold water.

For best results in cold water washing select a

detergent that gives directions for cold water use. Granular detergents often dissolve more slowly in cold water, so some labels recommend adding detergent and agitating for a few minutes BEFORE adding clothes. Be sure to MEASURE your detergent, because it is important to use enough in cold water.

Pretreatment of spots and stains is especially important in cold water washing. Use a premixed commercial solution of granular detergent paste. Presoaking with an enzyme presoak works just as well in cold water (except greasy soil) but allow extra time for it to do its work.

Always remember to sort clothes according to color, amount of soil and tendency to lint. Don't over load your washer—clothes must circulate freely in order to get clean.

Water conditioners and fabric conditioners work very well in cold water, but as always remember to dilute fabric softener with water before adding to washer to prevent spotting.

Cold water works BETTER than warm or hot water on woolsens, bright or dark colored fabrics and on protein stains (blood, milk, eggs, etc). You can use cold water for all rinsing, too, regardless of wash-water temperature. It works well and can save from one-fourth to one-third of the hot water per load.

If your wash takes on a dingy cast after a number of cold water washings, this means soil has not been completely removed. Wash them, from time to time in the hottest water safe for the fabric.

**Notice of Budget Hearing**

The budget for Malheur Memorial Hospital District for the fiscal year 1975-1976 beginning July 1, 1975 as detailed and summarized below, was prepared by the  Cash,  Accrual,  Modified Accrual accounting basis, and  is,  is not consistent with the accounting basis used during the last two years. Major changes, if any, and their effects on this budget are set forth in an accompanying statement.

A copy of the budget document may be inspected or obtained between the hours of 8:00 A.M. and 5:00 P.M. at Malheur Memorial Hospital. A meeting of the

Board of Directors will be held April 16th, 1975, at 8:00 p.m. at The Hospital for the purpose of holding a public hearing on this budget. Any person may appear to discuss the budget, or any part of it.
