

**Babson's**

(Continued From Page 1)  
 Profit margins will find it difficult to move up along with the higher level of sales in the second half of the year since the cost squeeze will tighten and interest rates will likely be on the upswing again. The widest year-to-year gains will be chalked in the early months of 1976 because the comparisons will be made with the recession lows in profits. Also, the business advance will still be in that stage where productivity improvements, increased use of idle facilities, and strict cost controls will help to provide favorable profits. In an effort to speed

up the economy as an antidote to the high level of unemployment, it is a reasonable bet that the broad sweeps of the threatened tax reform will not take place in 1976 although there are likely to be hikes in levies by some states and municipalities.

**Possible Labor Pitfalls**

1976 will be a busy year for new labor contract negotiations. In fact, parleys are scheduled to hammer out fresh labor agreements virtually from the beginning through the very end of the year. Among the talks will be those involving workers in clothing, electrical machinery, construction, and retailing. But the most crucial

for the economy as a whole will be in trucking and automotive production. Both these lines have far-reaching effects on the economy, and they are also rated as pattern setters for other bargaining sessions in 1976 and subsequent years.

While some labor observers express hope that depleted war chests of labor groups and flattened pocketbooks of workers because of the recession and inflation may discourage long and bitter walkouts, this is by no means certain. Labor representatives cite the costly spurt in living costs since the last contracts were signed, and they seek not only compensatory wage hikes but also raises in anticipation of

further inflation. Demands of union leaders will, moreover, be heightened because of healthier business climate along with the issuance of good corporate profits reports.

But managements will be mindful of their profit margins and put up sufficient resistance to hold final wage settlements in the 6%-10% range. Even though raises will average less than union leaders seek, there will be a persistent push for such costly fringe concessions as health and death insurance, shorter hours with the same pay, more liberal vacations and holidays, and other benefits.

(Continued On Page 10)

8.500 A Landscaping & Public Grounds Management 4 Carnefix W-TH 7:00-10:00 p.m. (Class starts Jan. 7, 1976) TL-3

**MISCELLANEOUS**

2.510 A Income Tax Procedures 3 Grange TH 7:30-10:00 p.m. (Class starts Jan. 8, 1976) AD-21

A personal tax preparation class. Participants will learn how to compute their own tax statements and will achieve basic understanding of tax law.

2.402 A Real Estate Law 3 Grigg W 7:00-10:00 p.m. (Class starts Jan. 7, 1976) AD-24
