**The Circuit Writer**

When I was in school, I used to enjoy taking "match-the-answers-to-the-questions" tests. Now that I'm out of school, however, the only way I can satisfy the urge to keep on matching answers and questions is to compose them myself. So, I decided to make up a quiz for you. On one side is a list of statements commonly made by those who avoid church like the plague. On the other side are the answers I would like to give to them, but never remember until three hours after I've left. Try to match them up and see how well you do! If you get 80% correct, then your prize is a pew seat next Sunday. If you score 40%-79%, then I'll be out to call on you. If you only

by the Rev. Jim Monroe

guess under 40% right, then give me about three hours and I'll think of something to tell you.....

**Excuses for not going to church.**

1. "Gee whiz! I didn't know there was a church down there..."

2. "I don't need to go! I join in on the game invocations..."

3. "Aw, there are just too many people there who I don't know..."

4. "Well, you know, the seats are too uncomfortable..."

5. "I used to go, but since the kids have left.....  
Answers I'd like to give.

1. "I know what you mean."

I don't go to football games for the same reason!"

2. "Funny, we remembered you're down here..."

3. "No wonder...you never give yourself or them a chance."

4. "That's like getting your exercise by brushing your teeth!"

5. "Did you quit eating when they left?"

Well, there you have your quiz. Good luck! Select your answers and deposit in the collection plate of your choice. I guarantee everyone will be a winner!

**Your County Agent Says**

We should be giving some special consideration to those fall calves. One of the advantages to fall calves is that they are big enough to go strongly in the spring and take full advantage of the grass and additional milk the cow gives when turned on spring range. By creep feeding those fall calves, you can be assured of continuous growth and development. The calves' mother probably don't give enough milk on winter feed to assure this rapid calf growth. It is much cheaper to creep feed the calf instead of trying to feed the mother cow enough additional to keep her milk production up.
