

VICTOR HABURCHAK, owner of the Nyssa Coast To Coast Store, is shown with Roger Cook, district manager of the nationwide firm from Boise, who was on hand last week for the installation of an electronic ordering system for the store.

The equipment consists of a NORAND NT-5 data communication terminal which is linked directly by ordinary telephone lines to

the computer at Minneapolis. This equip ment, shown between the two men, will significantly reduce the time spent in ordering merchandise. The capacity to transmit orders rapidly via telephone lines insures an inventory control system more responsive to the store's customers, according to Haburchak.
