

### Bahama Vacation

MR. AND MRS. RALPH BUKER enjoyed this mile-long paradise beach with the powder white sand in the semi-tropic sun during their week's vacation at Nassau, in the Bahamas. They were awarded the week's trip by Gambles for meeting their quota in increased sales for the year.

They left September 12 by plane from Boise, and shortly upon their arrival, found themselves enveloped in the tropical atmosphere, warm friendly people, lush green plants, trees and flowers, barbecues by poolside and floor shows of calypso music and the dancing in limbo by the natives.

The Bukers enjoyed special tours of historical sights of eighteenth century elegance and shopping at the straw market and the Bay Street shops. Most pleasant was a three-hour sail boat ride on the clear blue water of the ocean and other planned entertainment by Gambles, plus plenty of leisure time to make new friends and visit with other Gamble dealers.

The final evening, a most delicious banquet of sliced filet with all the trimmings and a fantastic floorshow by the natives and their calypso music, brought the long-awaited Bahama vacation to a climatic finish.

### Campaign Plans Made for Toole

The "Toole For County Commissioner" committee held a strategy meeting over a cup of coffee on September 30. Their candidate Nick Toole was present to answer any questions that might apply to the campaign.

Toole came to Malheur County 40 years ago and has operated the N.S. Toole Construction Company most of that time. His work, largely on roads, took him into all parts of the county. He has recently retired and said he feels that he has the time and with his business experience, certainly has the knowledge to serve well as a county commissioner.

### Sage of Nu Acres

By Lyn Dohner

Gary Fischer took a hunting trip into the high country near Stanley last week with two pals, Bill Keller of Caldwell and Tom Kelly from Watsonville, California.

The men each had his horse, and packed in over about fourteen miles of forest trail. The country, Gary said, was unbelievably peaceful and beautiful, totally unspoiled by humans.

Gary had a bear tag but saw no bear and little sign of any. The other men were after elk and were able to bag one, a big bull.

Only thing that troubled them on the trip was that their base camp was over-run with kangaroo rats. These little fellows have longer tails and bigger hind legs than pack rats and seem to leap around, rather than creeping on all fours like pack rats. Although totally unseen by the tent's occupants, they would pick the middle of the night to jump around on top of the sleeping hunters, once on Gary's face, make their presence painfully known.

Gary said they got a little tired of wieners, though this food staple is easy to pack and carry. Seems they had hot dogs morning noon and night for three days!

Back from a lengthy jaunt with pickup, trailer and car are Mr. and Mrs. Robert Shaw Sr., Mr. and Mrs. Bob Shaw Jr., of Nu Acres, and Mrs. Martha Buttram of Parma.

The group took a leisurely trip through Oregon and Washington and north to San Juan Island, Washington to which they traveled by ferry boat, and there they visited a niece at Friday Harbor.

At Ilwaco, at the mouth of the Columbia River, they went fishing by charter boat for a weekend. It was at this point that Bob Jr., his wife Phyllis, and Mrs. Buttram returned to Nu Acres.

Among the relatives visited along the way were Mr. and Mrs. Delbert Wilson and family in Molalla, Oregon. At The Dalles they visited Mr. and Mrs. Don Young, formerly of Nyssa. While in that area they went on a fishing excursion on the Deschutes River. They brought home a catch of nine salmon frozen, whether from the Deschutes or the ocean, they did not say.

Mrs. Richard Imbler says the Fruitland Assembly of God Sunday school bus is to be driven up the loop to McCall, and New Meadows and back next Monday and that folks not in school or working are welcome to come on the trip.

Cost will be a donation for gas and bring a sack lunch, she said. The plan is to visit anyone they know enroute, in particular, Assembly ministers. At Cascade they will stop at the Imbler's daughter's home, the Rev. James Schneider and family. At Lake Fork, they will visit former Fruitland pastor, the Rev. Orville Scaglin and his wife.

Persons interested in going are to contact the Rev. Don Shover in Fruitland or Imblers in Nu Acres.

### New Teacher At Nyssa

CAROLYN TUCKER GOULD, is teaching seventh and eighth grades at Nyssa Junior High. A graduate of Northwest Nazarene College, she received her B.A. in science and math. Her husband, Art, is music instructor at Adrian schools.

### Our Trip To Succor Creek

The Fifth Grade took a field trip to Succor Creek, Tuesday, September 28. First we went to the Fossil beds. We found leaf fossils, petrified wood, sandstone, gypsum, lava and other rocks. We went up the road about ten miles to the Succor Creek Park. We ate lunch at the campground.

After we ate lunch, we were surrounded by very large, pretty rocks, that even the air could not get us. You would never see so many rocks.

We hiked up the hills. Of course, we were up there for a reason. It was so far. It looked like it was a mile, but we got there some how. At last we had found the Thundereggs. They were very pretty that they even sparkle in the day and night.

Well, thanks to Mr. Munn, Mrs. Jan Wilson, Mrs. Spitze, Miss McPike and Mrs. Nelson who planned for our trip. We had a fun time up there. We found different kinds of rocks and pretty ones too. We think it was pretty up there and we liked it too.

If you've changed to electric heat, please let us know!

IT'S IMPORTANT TO YOU!

If you've installed electric heat without letting us know about it, our equipment may be too small to serve you.

It could fail you in cold weather.

So please let us know if you've switched to electric heat. Then we can check your transformer and the wires from the pole to your home to make sure they can carry the increased load.

Just call your local Idaho Power office.

Please call, too, if you're planning an electric heat installation. That will give us a chance to check the adequacy of equipment ahead of time. And we may be able to help you save money by recommending a properly sized heating system.
