FROM SUNDAY'S DAILY

PROMPT ACTION NEEDED.

Chamber of Commerce Has a Splendid Opportunity to Help Salem and the Valley.

The Salem Chamber of Commerce has been in existence for over a year, one of the purposes for which it was organized being the better advertisement of Salem and the Willamette valley in the East, and the securing of a desirable class of immigrants for this portion of Oregon. Considerable good work has been done in this direction by the organization during its existence, but a great deal more could be done, and an excellent opportunity has presented itself at this time, to secure the desired immigrants, and some of the leading business men of the Capital City yesterday suggested that the chamber take advantage of the present favorable conditions.

The homeseekers' excursions from the East to the Northwest, now under way, are bringing thousands of desirable people to this country, and the Chamber of Commerce, of Salem could, with little effort, secure many of them for this portion of the valley. As many of these excursionists come through to Portland, it is suggested that the Salem chamber hold a meeting immediately, and take steps to bring some of these visitors, seeking for desirable homes, to this city. It is also believed advisable that the chamber promptly prepare and furnish a room, where incoming Easterners can make their headquarters, secure information on the various resources of Oregon and especially the country immediately surrounding Salem, and where reliable advice can be supplied to the inquiring stranger.

The newcomers are, nearly all of them, tillers of the soil, with sufficient capital to make a start, and, coming as they do, from the Mississippi basin no better country could be shown them than the Willamette valley, in which they would be happy to make their homes, and now is the time to make an effort to bring them here. The Chamber of Commerce can make itself extremely popular by acting at once, as no better opportunity will ever occur, than the one now presenting itself, to make the organization of inestimable value to Salem and the central Willamette valley, but action must be had at once to insure success.

A RE-EXAMINATION DENIED.

Woodburn Charter Case Finally Dismissed—A. E. Dageny Gets a Divorce.

Circuit Judge R. P. Boise yesterday denied the motion of Attorneys W. H. Holmes and J. H. McNary for a rehearing of the injunction suit instituted against the City of Woodburn by Dr. B. A. Cathey, by which the citizens of Woodburn were temporarily enjoined from holding an election, as provided in the new city charter, to determine whether or not the city should have licensed saloons.

The motion for a rehearing was argued at length yesterday forenoon, Attorneys Carson and Bingham speaking briefly against the granting of such a motion. Messrs. Holmes and McNary spoke for a considerable length of time in support of the motion. The case was submitted to Judge Boise just before adjournment for dinner, and upon reconvening in the afternoon, the judge rendered his decision, denying the motion.

Woodburn people were generally pleased with the final disposition of the case and Tuesday an election will be held to determine whether or not the city shall have licensed saloons. On Saturday, April 1st, will occur the election of city officers as in the new charter provided.

The divorce suit of A. E. Dageny vs. Emma Dageny was on trial before Judge Boise yesterday afternoon. Mr. Dageny was granted a divorce, as prayed for in the complaint. The plaintiff was represented in court by Wm. Kaiser, the attorney, Mrs. Dageny failing to appear in person or by an attorney.

Judge Boise yesterday afternoon adjourned his department of the circuit court until 10 a. m. Thursday, after having made the following docket entries:

E. E. Wild vs. Mattie A. Parrish, et al., foreclosure; amended answer and reply filed.

Mary A. Ramp vs. F. X. Gobin, foreclosure. W. H. H. Wall intervenes and files an answer. Case to stand for trial to make service of such answer.

Judge Geo. H. Burnett, of department No. 1, will hold an adjourned session of the February term of court, convening at 9 a. m. Monday.

THE LEASE RENEWED.—Hon. Turner Oliver, president of the La Grande Commercial club, and one of the substantial citizens of that thriving city, went to his home yesterday afternoon, after spending several days in this city. He was happy in the possession of a duplicate lease, given him for the lost copy of the contract, made between the old board of trustees of the insane asylum and himself, by which he leased the 620-acre tract of land, purchased by the state for the Eastern Oregon asylum, which document had disappeared. The present board made a duplicate contract, or rather, gave a renewal of the lese.

HURT IN THE FACE.—F. E. Morelock, one of the teamsters at the state insane asylum, yesterday received a painful bruise over the left eye, resulting from too sudden contact with one of the horse's hoofs, which he was driving. While at work in excavating for the new wing of the asylum a portion of the harness became tangled and, in endeavoring to straighten it out, Mr. Morelock was compelled to lean with his head near to the horse's heels. While in this stooping position, the horse suddenly gave a backward stroke with his heel striking Mr. Morelock just above the eye. Owing to his close proximity to the horse the force of the blow was not great enough to fracture the skull but the injured man will have a "black eye" for several days.

JEWELRY STOCK ASSESSED.

Assessor Hobart Collects Taxes that Amounts to $15.20 from Auctioneer Berger.

Assessor J. W. Hobart yesterday called upon L. Berger, who is interested in the auctioning off of a stock of jewelry in this city, assessed the stock at $400 and collected a total tax of $15.20 on the 1899 assessment roll. The tax was reckoned by the 1899 levy of 38 mills on the dollar.

The money was collected by Assessor Hobart and turned over to Sheriff Durbin who immediately deposited it with County Treasurer Downing. The tax was apportioned among the several funds as follows: State county and state school tax, $8.40; City of Salem, $4; school district No. 24, $2.80.

The provision of the code that authorizes the assessor to proceed in the manner above indicated is found in section 2835, a part of which reads as follows: "And when any personal property, or any other personal estate, shall be assessed to any person who is not a permanent resident of the county, or who is about to depart or to remove his property therefrom, the assessor shall demand immediate payment of the tax thereon, at the same rate per centum as the preceding year's taxes, and in default of such payment, he shall immediately collect the same in the manner aforesaid; and the assessor shall note on the assessment roll all the poll and other taxes so given to the sheriff for collection, and the sheriff shall pay over and account for the same as the other taxes."

AN APPROPRIATE TEXT.

A little girl who lives uptown went to church last Sunday, relates the Cleveland Plain Dealer. She is a bright little maiden and considering her tender age, only six, she is decidedly intelligent. Her mother has been suffering from the grip and didn't acompany her, and as her father was away she went alone.

Whether it was the loneliness of the big pew or whether the church was poorly heated, mamma wasn't quite sure, but anyway, the little maid came home and declared she was very chilly.

"My toes got so cold while I was sitting there mamma," she declared. "And so did my fingers and my nose, I don't believe there was hardly a speck of fire in the furnace."

"That was too bad," said mamma; "Did the other people seem to suffer, too?"

"Oh, yes, they did," cried the little maid. "They just shivered!"

Then mamma thought she would divert the little maid's attention.

"What was the text, dear?" she asked; "can you remember it?"

"I should think I could," was the quick answer, "I can 'member every word of it."

"Well, what was it?"

The little maid put her head on one side and, screwing up her face, shrilly intoned: "Many are cold, but few are frozen!"

And mamma had to admit that it seemed remarkably appropriate.

Story of a Slave.

To be bound hand and foot for years by the chains of disease is the worst form of slavery. George D. Williams, of Manchester, Mich., tells how such a slave was made free. He says: "My wife has been so helpless for five years that she could not turn over in bed alone. After using two bottles of Electric Bitters, she is wonderfully improved and able to do her own work." This supreme remedy for female diseases quickly cures nervousness, sleeplessness, melancholy, headache, backache, fainting and dizzy spells. This miracle working medicine is a godsend to weak, sickly, run down people. Every bottle guaranteed. Only 50 cents. Sold by Dr. Stone, Druggist.

FAME'S PATHWAY.

Dr. George M. Kellogg recommends the cultivation of ambidexterity, which, he points out, was of great advantage to such men as Alexander Mott, Joseph Pancoast, S. F. M. Morse, Leonardo Da Vinci, and Michael Angelo.

Mme. Lilli Lehman, the operatic singer, is an active worker in the crusade against vivisection. She is at present distributing an appeal intended to rouse public opinion against what she describes as "torture in the name of science."

Unlike his luxurious and indolent predecessors, Ali Ferrough Bey, the new Turkish minister at Washington, is a man of ideas and action. He is making a careful study of American agriculture and manufacturing methods, and will urge their general adoption to his native country.

Another Cabinet Officer.

Congress will soon be called upon to pass a law creating a new cabinet portfolio. This official will probably be known as Secretary of the Colonies. It will be his duty to look after the welfare of the islands which were seized by the United States in our war with Spain. While he is attending to his duties, Hostetter's Stomach Bitters will continue to attend to its duties of curing the sick of stomach, liver and kidney disorders, just as it has been doing for fifty years. Its greatest virtues are in building up run-down systems; in quieting and toning unstrung nerves; in overcoming dyspepsia, indigestion and constipation. Try a bottle if you feel "out of sorts."

DISCIPLINING A DOCTOR.

It is reported from Vienna that Dr. Schenck, who recently promulgated a theory about the prenatal determination of sex in human beings, is to be disciplined by the senate of the Vienna university for securing so much newspaper notoriety as he did in connection with his theory.

EXECUTIVE CLEMENCY

GOVERNOR GEER REMITTED A FINE YESTERDAY.

Ashland Normal School Regents and Paris Fair Commissoners Are Appointed.

(From Daily, March 26th.)

Gov. T. T. Geer yesterday granted a remission of sentence to Wm. Taton, who was convicted at the last term of the circuit court for Tillamook county, of the crime of selling liquor without a license, and sentenced to 360 days in jail, of which time he had served 255 days. Taton was indicted and convicted on three counts and was sentenced to pay a fine of $200 in each case, making a total fine of $600. Being unable to pay the fine, he went to jail, and having served nearly his entire sentence, the governor granted executive clemency.

The petition for the pardon and remission of sentence was signed by 181 business men and other residents of Tillamook City, and all of the leading men of the county.

Gov. Geer yesterday made a number of appointments, the principal places filled being those on the new Southern Oregon normal school, at Ashland (known as the Ashland Normal School) which was created as a state institution at the last session of the legislature (house bill No. 252). Following are the appointees, by counties, and the terms for which they are appointed:

G. A. Gregory, Jackson county, six years.

H. C. Kinney, Josephine county, six years.

F. H. Carter, Jackson county, six years.

W. L. Massingill, Lake county, four years.

C. E. Harmon, Josephine county, four years.

L. F. Willets, Klamath county, four years.

A. G. Sherwood, Coos county, two years.

R. P. Neil, Jackson county, two years.

J. S. Orr, Klamath county, two years.

Under house joint resolution No. 8, introduced by Representative C. I. Curtis of Clatsop county, authorizing the appointment of a commission to represent the state of Oregon at the Paris exposition, and which, after passing both houses, became a law by receiving the approval of the executive, Gov. Geer yesterday named the commissioners, as follows:

H. L. Pittock, of Portland.

C. C. Beekman, of Jacksonville.

Mrs. Amelia deF. Smith, of Portland.

F. R. Mellis, of Baker City.

Mrs. Olive S. England, of Salem.

Alexander Gilbert, of Astoria.

Two members were also appointed for the immigration board as follows:

Chas. K. Henry, of Portland.

Frank Davey, of Salem.

Dr. George S. Wright, of McMinnville, was appointed on the state board of dental examiners.

J. M. Carroll, of Union, and Max Lueddemann, of Antelope, Wasco county, were appointed notaries public, and upon their official bonds being filed and approved, their commissions will be forwarded to the respective appointees.

The state board of school land commissioners has approved a large number of applications for loans during the past week, and the same have been referred to the attorneys of the board for completion of the papers. The aggregate amount of money involved in the applications approved, is $46,550. A number of applications wer rejected by the board, the reasons given for this action being insufficient security and insufficient description. This class of applications aggregated $17,000. Many applications are being received for loans and the board acts on them promptly, and the indications are that the money in the school fund will not be idle very long, since the rate of interest demanded by the state is reasonably low.

EGGS.

What is the significance of the word egg? "A body which contains the embryo of bird or other animal," so says the dictionary, and adds, by way of a fuller explanation, 'Spawn of fish."

Now, although perfectly correct, this answer fails to convey in any but a vague manner the breadth of possibility covered by the little three-letter word.

When we consider that by far the largest number of creatures dwelling upon the earth at this moment began their existence within the walls of a more or less hard or tough envelope popularly known as an egg, it becomes apparent that the appellation must do duty for a very varied assemblage of objects.

It will, perhaps, be interesting, then, to enumerate a few of these; for, although everybody is perfectly familiar with the form and appearance of a common bird's egg, comparatively few know anything at all about the eggs of other creatures.

Not very many people are aware, for instance, that at least three of the great class of mammalia, or animals that suckle their young, lay eggs; yet such is undoubtedly the case. These three creatures all belong to that continent of curious animals—Australia—although two of them, the echidnas, extend into New Guinea. These echidnas are queer, ant-eater-like animals, having a very forbidding coat of sharp-pointed quills. Of their habits very little appears to be known, save that they subsist chiefly on insects, and that they really do lay eggs.

Much more detailed accounts are extant respecting the life history of the third egg-laying mammal—the duck-billed platypus.

Ornithorhynchus paradoxus (for this is the long-winded name with which science has saddled the poor animals) is not unlike a gigantic mole in general shape, except that it possesses a remarkable tail, with feet and bill of duck-like design.

Its habits seem to closely resemble those of our common water rat. Frequenting the rivers and streams of Southern and Eastern Australia, it makes its nest in a burrow scooped out in a bank. Here mother platypus lays two flexible white-shelled eggs, about equal to a martin's in size. When first hatched, the tiny duckbills are very ill-prepared to face the vicissitudes of this cruel world, for they are both blind and naked. However, in the course of time, and under the tender care of their watchful parents, they eventually issue from the nest hole into the water, there to frolic and feed just like other duckbills.

Leaving the mammalia, we find that all existing birds lay eggs. Of these the ostrich lays the biggest.

The common cuckoo lays the relatively smallest egg. For instance, the jackdaw and the cuckoo are about equal in size, yet the jackdaw's egg is some five or six times larger than the cuckoo's.

The fact that the cuckoo is wont to deposit its eggs in the nests of birds very much smaller than itself doubtless in measure explains this.

The relatively largest egg is laid by the kiwi, a curious New Zealand bird. The egg is 5 inches long, although the bird itself only measures about 27 inches.

Crocodiles' eggs may be seen in most museums. They are white and hard-shelled, and about the equal in size to those of a goose.

The amphibious turtles lay flexible, soft-shelled eggs, while, on the other hand, the eggs of tortoises are hard-shelled.

The eggs of most fishes are small, soft and more or less inconspicuous, but this lack of individuality is amply compensated by the remarkable numbers deposited.

A striking exception to the piscine rule of numerous, inconspicuous eggs is found amongst the sharks and their allies, for the eggs of these ferocious ocean denizens are "large in size, few in number, and laid singly, instead of in masses."

To discuss a possible reason for this difference would be outside the purpose of this article, but it may be noted in passing that nature has a very plainly-written law under which rapacious flesh-eating animals reproduce their kind to a very limited extent in comparison with many of the harmless vegetable feeders.

Amongst the flotsam and jetsam of our seashores, a curious horney pod, shaped like a bolster, with a long, spirally-coiled tendril at each corner, may often be found. This strange object, popularly known as "a mermaid purse," is the egg case of the common dogfish.

Leaving the fishes, but not the ocean—have you ever heard of sea grapes? Sometimes when wandering along the shore, bunches of purple globules, possessing a distinct likeness to the luscious hot house fruit, may be seen lying in the wash of the waves.

But though fruitlike in aspect, the resemblance goes no further. Taste one of these sea grapes, and you would not only be very much disappointed, but very much disgusted, also, for these clusters are in reality the egg masses of the common cuttle-fish.

Amongst the near relations of the cuttle are snails, slugs and "shell fish" of many kinds, and in this great group of animals eggs of so many different forms are found that a large volume would be required to adequately enumerate their varieties. It is obvious, therefore, that very little can here be said respecting them; one or two diverse examples, however, may be cited.

If the eggs of mollusks are varied in appearance, those of insects are infinitely more so. Moreover, many of them are marvelously beautiful in form and design.

This beauty can not be other than unknown and unenjoyed by the great majority, for it is hidden from the eye unaided by magnifying glass or microscope, whilst an attempt to describe it in words is a wellnigh hopeless task.

Who would suppose that the egg of our common white butterfly,—the cabbage pest—was a thing of wondrous beauty. Yet such is the case. "A tiny spot upon a cabbage leaf, no need to trouble about so small a matter"—such would be the verdict of human intellect. But nature's ways are different; the smaller the object the greater the care she seems to exercise.

In point of beauty the butterflies' egg ranks far above the ostrich's despite the vast difference in size. Magnify the speck on the cabbage leaf, and you find a blunted cone, perfect in shape, the surface traced by a score of longitudinal ribs.

Why these ribs? Why this shape? Would not a plain globe have answered every purpose?

Three obvious questions; and yet reason retires abashed, almost before we have formed the thoughts into words.

Examine nature in any of her phases, and the end is always the same—we discover, sooner or later, that lack of knowledge has reared up an impassable barrier in our path.

Last year the United States imported 2256 horses, worth $200,000, and exported over 51,000 horses, worth $6,000,000. In 1890 this country imported 38,248 horses and exported only 3500.

NEW YORK VISITORS

A DISTINGUISHED PARTY OF EXCURSIONISTS HERE.

Superintendent Hammand, of the Delaware & Hudson Railroad, Spends Sunday in Salem.

(From Daily, March 26th.)

A distinguished party of excursionists reached Salem yesterday. They are C. D. Hammond, superintendent of the Delaware & Hudson railroad, whose headquarters is Albany, N. Y., and Mrs. Hammond and their daughter. With the party are also C. E. Miles and wife, of Oneonta, N. Y., and Prof. W. C. Franklin, wife and daughter, of the same city. Prof. Franklin is the superintendent of the public schools of Oneonta, the birthplace of President Collis P. Huntington of the Southern Pacific company. B. R. Babcock, connected with the Delaware & Hudson, in the office of Mr. Hammond is also a member of the party.

Dr. John D. Hammond, of San Francisco, a brother of the railroad man, accompanied the party from San Francisco. Dr. Hammond is editor of the Northwestern Christian Advocate and superintendent for the Northwest of the Methodist Book Concern.

Since leaving Albany, the party has traveled about 4,000 miles, coming through the Shenandoah valley and by way of Washington, New Orleans, Los Angeles and San Francisco. They have enjoyed every mile of the trip, and they have gathered new ideas of the greatness of their country, both in expansiveness as to distances, and in great and varied resources.

The Messrs. Hammond are cousins of Mrs. L. D. Henry, of this city, and the members of the party are guests at the home of Mr. and Mrs. Henry while in Salem.

They will depart on their homeward journey tomorrow morning, going by way of the Oregon Short Line, the Rio Grande Western, Denver & Rio Grande, Rock Island and other routes. They have the special car of Mr. Hammond. They stopped over at Roseburg, wishing to have a daylight ride through the great Willamette valley, and so came to this city yesterday on the Roseburg local train. Superintendent Hammond has expressed himself as being well pleased with the Willamette valley, one of the most beautiful valleys he had ever seen. He was much impressed with the beautiful views of the country, as well as the richness of the soil, and the great variety of undeveloped resources of the valley, apparent upon every hand, and he stated that he believed there was a glorious future before this country, that the development of this portion of the Northwest was practically in its infancy, and that, when the East once became informed of the great opportunities presented here for new investments, an enormous immigration would set in to this Eldorado.

Mr. Hammond's road has no connections within many hundred miles of this territory, so his visit has no relation to business. It is merely a vacation trip.

The Delaware & Hudson is one of the railroads known as the "coalers," as it runs into the anthracite coal district of Pennsylvania, the only anthracite coal district, in fact, in the world. His company also owns a canal eighty miles in length, and so its business is divided into three departments, the railroad proper, of which, as related above, he is the superintendent, and the canal and coal departments.

Dr. Hammond will leave the party at Portland, where he has business demanding his attention, while the remainder of the company will continue on their way.

In the island of Minoro, one of the Philippines, the humming birds are pugnacious little creatures. Thousands of them frequently attack hunstmen without the slightest provocation, inflicting sometimes serious wounds on the face and neck.

Some men are so interested in the monkey stage of their evolution that they forget they are now men.

How's This!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

WEST & TRUAX, Wholesale Druggists, Toledo, O.
WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

NOTICE OF APPOINTMENT OF ADMINISTRATOR.

Notice is hereby given that on the sixteenth day of March, 1899, the county court of Marion County, Oregon, duly appointed Jefferson Myers administrator de bonis non of the estate of A. D. Risdon, deceased, and the said administrator having qualified as required by law, notifies all persons having claims against the estate of said A. D. Risdon, deceased, to present them duly verified as by law required, to the said administrator at his office in the Tioga block, Salem, Marion county, Oregon, within six months from the first publication of this notice.

Dated this seventeenth day of March 1899.

JEFFERSON MYERS,
Administrator de bonis non, of the Estate of A. D. Risdon deceased.
Brown, Wrightman & Myers, Attorneys.
3:24—5 t w.

ASSIGNEE'S NOTICE OF FINAL ACCOUNT.

Notice is hereby given that C. B. Updegraff, as assignee of the estate of F. W. Miller, an insolvent debtor, has filed his final account as such assignee, in Department No. 2, of the circuit court of the State of Oregon for Marion county, and that said final account will be heard and passed upon by said court at the court house in said Marion county upon the 20th day of April, 1899, at 2 o'clock p. m., of said day.

C. B. UPDEGRAFF,
Assignee of said F. W. Miller, an insolvent debtor.
Salem, Ore., March 23, 1899.
3-24-5tw.

ASSIGNEE'S FINAL SETTLEMENT.

In the circuit court of the state of Oregon, for Marion county, department No. 2:—

In the matter of the assignment of B. F. Drake, an insolvent debtor.

Notice is hereby given to all whom it may concern: That the undersigned assignee of said estate has filed his final account thereof in said court, and that the same will be presented to the said court for allowance and confirmation, on Saturday, the fifteenth day of April, at 1 o'clock p. m., of said day, at the said circuit court room in the county court house at the city of Salem, in Marion county, Oregon; and that the said final account and any objections thereto, will be heard and passed upon by the said court at said time and place, or as soon thereafter as the court may be able to hear the same.

Dated at Salem, Oregon, this the thirteenth day of March, A. D. 1899.

F. E. RIZER,
Assignee of the estate of B. F. Drake, an insolvent debtor.
3:17-5t-wkly.

NOTICE TO CREDITORS.

Notice is hereby given that the county court of the state of Oregon for Marion county, did duly appoint John A. McIntire as executor of the last will and testament of Leonard B. Judson, deceased, and all persons having or claiming to have any claim, account or demand against the estate of the said testator, Leonard B. Judson, are hereby required to present the same to the said executor, duly verified, as required by law, at his residence at Warrenton, Clatsop county, Oregon, within six months from the date of the first publication of this notice.

Dated at Salem, Oregon, this 2nd day of February, 1899.

JOHN A. McINTIRE, Executor,
Warrenton, Oregon.
John A. Carson, attorney for executor, Salem Oregon. 2:3-5tw.

NOTICE OF APPOINTMENT OF EXECUTOR.

Notice is hereby given that on the eleventh day of March, 1899, the county court of Marion county, Oregon, duly appointed Jacob Leidenger executor of the last will and testament of Nancy Beatty, deceased, and having qualified as required by law, all persons having claims against the estate of said Nancy Beatty, deceased, are hereby notified to present them, duly verified as by law required, to the said executor, at his home in Salem, Oregon, or at the office of Brown, Wrightman & Myers, his attorneys, Tioga block, Salem, Marion county, Oregon, within six months from the first publication of this notice.

Dated this eleventh day of March, 1899.

JACOB LEIDENGER,
Executor estate of Nancy Beatty, deceased.
Brown, Wrightman & Myers, attorneys for executor. 3:17-w5.

ADMINISTRATOR'S NOTICE.

Notice is hereby given that the undersigned, Charles B. Worden, was on the 1st day of March, 1899, duly appointed by the county court of Marion county, state of Oregon, administrator of the estate of John B. Worden, deceased, late of the said Marion county. All persons having claims against said estate are hereby required to present the same to said administrator or G. S. Downing, at Salem, Oregon, properly verified to as by law required, within six months from the date hereof and all persons indebted to said estate will please make immediate payment of the same to either said administrator or G. S. Downing, at the place above mentioned.

This eleventh day of March, 1899.

CHARLES B. WORDEN,
Administrator.
G. S. Downing, attorney for estate. 3:17-5tw.

ADMINISTRATOR'S NOTICE.

Notice is hereby given that the undersigned by an order of the county court of Marion county, Oregon, has been appointed as administrator of the estate of James Whelan, deceased. All persons having claims against such estate are required to present them within six months from the date of this notice, with the proper vouchers, to the undersigned, at the office of Geo. C. Bingham, Salem, Oregon.

Dated this fourteenth day of March, 1899.

D. D. GORSLINE.
3:17-5tw.
