

FROM TUESDAY'S DAILY

A SOUVENIR OF 1840.

L. B. Geer, State Land Agent, Recently Received a Campaign Button Used That Year.

L. B. Geer, state land agent, was recently presented with a campaign button that was worn during the memorable campaign of 1840, preceding the election to the presidency of William Henry Harrison. The souvenir is highly prized by Mr. Geer and the fact that the button has an interesting history associated with it, causes its owner to place even a greater value upon it.

It is a bronze button circular in form and equal in size to the penny. On the front side of the button is a log cabin and near by a barrel presumably containing the celebrated hard cider that figured largely during the campaign. Upon the cabin door, which stood ajar, was hanging a coon skin. Beneath the cabin was the inscription: "The people's choice in the year 1840." On the reverse side is a raised picture of William Henry Harrison together with the following wording: "Major-General W. H. Harrison, born February 9, 1773."

The button was worn during the campaign of 1840 by Judge J. W. Grimm, now deceased, a pioneer who resided near Aurora. Judge Grimm was a young politician together with Mr. Geer's father-in-law, Hon. R. C. Geer, now deceased, who lived for many years at Willard and represented his county in Oregon's legislative assembly for a number of years. The two men went to Illinois during the 1840 campaign, and seven years later emigrated to Oregon. Several years ago the button was lost by Judge Grimm, on the site of the log cabin on his donation land claim, near Aurora. While plowing in the field shortly before his enlistment for service in the Philippines, Lieutenant Edwin Grimm, son of Judge Grimm, unearthed the long lost souvenir which he retained in his possession until one day last week when he presented it to Mr. Geer.

The button is very highly prized by Mr. Geer, who proposes to have it suitably bound in gold and use the same for a watch charm.

FOUR BOYS PAROLED.

Action of Board of Trustees for the Reform School—Appointment of a Tailor.

The board of trustees for the state reform school held a brief business session at the capitol yesterday, when upon recommendation of Supt. H. E. Bickers, paroles were granted to the following named four boys: Guy Millspaugh, Charles Daniels, Oscar Walworth and Adolph Warshauer.

Mrs. W. L. Cummings was elected as tailors at a salary of \$25 per month to fill the place recently made vacant by the resignation of Ernest Lane.

The position was tendered to a man named Loveless, of Lebanon, but he declined, and the action taken yesterday was the result.

The board ordered \$10,000 of fire insurance on the buildings re-written, as the same expires.

UNION COUNTY PROPERTY.

The Summary of the Assessment Roll Received in the State Department Yesterday.

In the state department yesterday, the summary of Union county's assessment roll was received and filed, showing the following statistics of property valuations:

138,895 acres tillable land.....	\$1,047,985
236,497 acres non-tillable land.....	495,367
Imp. on deeded lands.....	392,605
Town and city lots.....	201,408
Imp. on town lots.....	347,451
Imp. on undeveloped lands.....	14,325
75 miles railroad.....	250,550
R. R. rolling stock.....	45,288
23 miles telegraph and teleph.....	11,860
Merchandise.....	230,774
Farm implements.....	91,330
Stocks, etc.....	72,560
Money.....	63,290
Notes and accounts.....	183,284
2696 shares of stock.....	101,109
Household furniture.....	135,874
9401 horses.....	124,850
16410 cattle.....	193,464
43,219 sheep.....	49,205
4955 goats.....	10,825

Gross valuations.....\$4,071,304
Exemption.....389,899

Total taxable property.....\$3,681,305
Number of polls, 1870.

ABOUT SALT LAKE CITY.

C. T. Doty Writes Interestingly Concerning His Trip to Tolono, Illinois.

The following excerpts are taken from a letter written by C. T. Doty while en route to his old home at Tolono, Illinois:

"We are now in Ogden, Utah. It seems strange that beef is so high after seeing large bands of cattle all along the road this morning. Prosperity seems to reign supreme in Utah. Ogden is quite a railroad center. We were met here by J. E. Williams of the scenic line east.

"Have arrived in Salt Lake City, two hours late, but the weather is perfect and much warmer than when we left Salem. Ten of the passengers, including myself and family, engaged a carry-all and went sight-seeing. We first visited the fine public school and Chamber of Commerce buildings. On Main street, the electric light and street car poles are stationed in the center of the street with the street car tracks on either side. There are many fine business blocks on this street. The Methodists have a fine church here. A federal building is also being erected on this street. The city and county jointly have a fine stone building. State street is twenty-five miles long. We saw on this street a small yellow building in which the Mormons hold services every Sunday, presided over by a bishop. Our guide told us there are about fifty of these buildings in the city. There are a number of fine buildings on this street, one of which is stone and six stories high. The Deseret National

bank, which is owned by the Mormon church, is located on this street.

"We passed the statue of Brigham Young, which seems to be a fine piece of work. Around the base of the structure are inscribed the names of all of the pioneers who crossed the plains with him. We visited the Mormon temple, the construction of which was begun in 1853 and completed in 1883. We went in to see the temple, but the keeper had gone to dinner and we were unable to inspect the interior of the building. We visited the grounds, however, and again entered our conveyance en route to the depot.

"A bill was pointed out to us, upon which the Mormons had a skirmish with the Indians at an early day. We also visited a cemetery in which seven of the wives of Brigham Young had been buried. We also saw the old stone wall, which is now almost in ruins, that once surrounded a large building, furnishing protection to the Mormons in an early day. Workmen were engaged excavating for a Catholic church which, when completed, will cost \$100,000. A man named Kearns made a donation of \$50,000, and the balance was made up in \$1,000 subscriptions."

He Fooled the Surgeons.

All doctors told Benick Hamilton, of West Jefferson, O., after suffering 18 months from Rectal Fistula, he would die unless a costly operation was performed; but he cured himself with five boxes of Bucklen's Arnica Salve, the surest Pile cure on Earth, and the best Salve in the World. 25 cents a box. Sold by Dr. Stone, druggist.

A REQUISITION.—Gov. T. T. Geer

yesterday issued a requisition upon the governor of Idaho, for the arrest and delivery to the agent of the state of Oregon, of one John Allison, wanted in Burns, Harney county, for the crime of rape, committed upon a child 8 years old, Sheriff J. J. McKinnon, of Harney county, who is now in Boise, Idaho, has the fugitive under arrest, and is awaiting the requisition in that city.

THE HOMLIEST MAN IN SALEM.

As well as the handsomest, and others are invited to call on any druggist and get free a trial bottle of Kemp's Balsam for the Throat and Lungs, a remedy that is guaranteed to cure and relieve all Chronic and Acute Coughs, Asthma, Bronchitis and Consumption, Price 25c and 50c.

A LOST MAN.—A letter reached

Governor Geer's office yesterday, from Mrs. Annie Dooley, of Harrold, Texas, asking as to the whereabouts of her cousin, James Roland, who was believed to be a resident of Oregon. She desired to be placed in communication with her lost relative, but Governor Geer knows no such person, and is unable to aid the woman.

THE EXCITEMENT NOT OVER.

The rush at the drug store still continues and daily scores of people call for a bottle of Kemp's Balsam for the Throat and Lungs for the cure of Coughs, Colds, Asthma, Bronchitis and Consumption. Kemp's Balsam, the standard family remedy, is sold on a guarantee and never fails to give entire satisfaction. Price 25c and 50c.

Geo. Gans, formerly of this city, but

for the past several months in the civil service employed at Warm Springs agency, has been transferred to Washington, D. C., in the Indian department. He spent Sunday in this city with relatives, on his way to Washington.

TO CURE LAGRIFFE IN TWO DAYS

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

BEECHAM'S PILLS for Stomach

and Liver Ills.

Frederick C. Penfield, for four years consul general of the United States at Cairo, Egypt, says that when Great Britain gains control of the Transvaal the railway northward from the cape will be extended to Cairo.

Little Pimples Turn to Cancer.

Cancer often results from an impurity in the blood, inherited from generations back. Few people are entirely free from some taint in the blood, and it is impossible to tell when it will break out in the form of dreaded cancer. What has appeared to be a mere pimple or scratch has developed into the most malignant cancer.

"I had a severe cancer which was at first only a few blotches, that I thought would soon pass away. I was treated by several able physicians, but in spite of their efforts the cancer spread until my condition became alarming. After many months of treatment and growing steadily worse, I decided to try S. S. S., which was so strongly recommended. The first bottle produced an improvement. I continued the medicine, and in four months the last little seed dropped off. Ten years have elapsed, and not a sign of the disease has returned."

R. F. WILLIAMS, M.D., Gillisburg, Miss.

It is dangerous to experiment with Cancer. The disease is beyond the skill of physicians. S. S. S. is the only cure, because it is the only remedy which goes deep enough to reach cancer.

S.S.S. For The Blood

(Swift's Specific) is the only blood remedy guaranteed Purely Vegetable. All others contain potash and mercury, the most dangerous of minerals. Books on Cancer and blood diseases mailed free by Swift Specific Company, Atlanta, Georgia.

ASYLUM BOARD IN SESSION

Monthly Report of the Superintendent

SUBMITTED AND AUDITED

The Cost of Maintaining the Institution During Oct. Was \$6,249.59
—Pay-roll is \$5,443.72.

(From Daily Nov. 7th.)

The board of trustees for the Oregon insane asylum held its regular monthly meeting at the capitol, yesterday afternoon. Dr. D. A. Pelne, superintendent of the institution, was present and submitted his report for the month of October, showing the condition of the asylum and the cost of maintenance for the month of October, and the same was audited by the board.

The total of the pay-roll for the month was \$5,443.72, and bears the names of 150 officers and employees.

The report, showing the number of patients in the asylum on September 30th, the number received, discharged, died and eloped during the month of October and the number under care on October 31st, is as follows:

No. patients Sept. 30.....	789	365	1154
No. received in October.....	15	10	25
No. discharged much imp.....	3	3	6
No. discharged, recovered.....	6	6	12
No. discharged, improved.....	1	1	2
No. discharged, not imp.....	1	1	2
No. died.....	4	4	10
No. eloped.....	2	2	4
Dischgd, died, eloped.....	19	9	28

No. patients, Oct. 31st.....785 366 1151
Average number daily, 1157 22-31.

The number of persons, officers, employees and patients fed and lodged during the month is shown in the following:

No. officers and employees.....	150
Average No. patients.....	1157 22-31
Total.....	1307 22-31

The report shows the average monthly and daily expenses for October as follows:

Per capita, monthly.....	\$10 09 9-11
Per capita, daily.....	32 58-100
The cost of maintenance, for the month was \$6,249.59, divided among the various departments in the following amounts:	
Kitchen and dining room.....	\$2,515 79
Male department.....	772 40
Female department.....	418 32
Bakery.....	448 50
Laundry.....	93 71
Engine room.....	315 23
Farm, garden and dairy.....	109 95
Stable.....	11 47
Repairs.....	90 16
Drug store.....	200 00
Sewing room.....	237 18
Center building.....	78 63
Office.....	13 25
West cottage.....	1 48
Stanley farm.....	772 40
Expense.....	191 47
Infirmary.....	90 44
Carpenter shop.....	9 46
Factory.....	50 04
Tailor shop.....	77 95
Total.....	\$6,249 59

This amount was distributed for supplies, as shown in the following itemized statement:

Flour.....	\$ 488 00
Meat.....	1,537 39
Sugar.....	282 90
Tea.....	81 60
Syrup.....	116 50
Potatoes.....	7 83
Butter.....	226 62
Coffee.....	89 93
Fish.....	128 65
Poultry and eggs.....	126 26
Beans and peas.....	14 55
Rice.....	60 90
Cornmeal.....	7 84
Fruit.....	99 25
Salt.....	32 12
Vinegar.....	16 20
Small groceries.....	82 99
Soap and potash.....	22 16
Drugs.....	200 00
Tobacco.....	130 45
Dry goods.....	382 21
Clothing and hats.....	89 82
Shoes and leather.....	53 30
Blankets.....	408 00
Furniture and crockery.....	66 32
Hardware and tinware.....	103 30
Spoons and cutlery.....	7 16
Grain and feed.....	60 25
Building material and repairs.....	90 16
Brooms and brushes.....	21 29
Books and stationery.....	18 41
Oil.....	7 00
Paints and glass.....	32 82
Fuel.....	898 04
Bedding.....	15 14
Cracked wheat.....	7 81
Oatmeal.....	49 94
Expense.....	191 47
Total.....	\$6,249 59

NOTES ON SCIENCE AND INDUSTRY.

The fact is worth noting that at the present time America leads in the world's supply of the two metals foremost in the electric field, copper being the positive metal and zinc the negative; but, though only a negative metal, no substitute for the latter has yet been found. The smelting of zinc is expensive a large amount of coal being usually required to smelt it, this being done by vaporizing the ore and then condensing and there are few ores so volatile. The world's production of this remarkable article is estimated at about 400,000 tons of the ore, of which this country produces 265,000 tons each year. It is also figured that three-fourths of the zinc ore comes from the Missouri-Kansas-Arkansas fields, where the ore runs about 50 per

cent. metallic zinc. The production this year will, it is thought, reach 270,000 tons.

Much interest is exhibited in the recent experiments made by Sir Norman Lockyer with a flexible film, his idea being to adapt it to spectroscopic photography. The large concave Rowland grating which he has in use for his solar spectroscopic photographs is 21½ feet radius and has some 2,000 lines to the inch ruled on its surface. It gives a spectrum 30 inches long. The focal plane of this grating is of necessity considerably curved, and it is, therefore, impossible to get a sharp photograph of the whole spectrum on a glass plate; in fact, not more than 18 or 20 inches of the spectrum can be brought into focus on the same plate, the difficulty in question being gotten over by using a flexible film which is bent to the curvature of the field. The point of the photographs taken with this Rowland concave grating is the longest solar spectrum photographed at a single operation, viz., 30 inches.

It seems that abroad the demand for the new fuel, asphalt, as a steam producer is constantly on the increase. As already explained, it is a product of the oil wells of Baku, a dark, viscous fluid, not more inflammable than vegetable oil and less so than coal; nothing else is now burned on the railways in central Asia, the Caucasus and southern Russia, on the Black Sea, Caspian and river steamers, and in the innumerable industrial works now springing into existence on the Azov littoral. In feeding furnaces with asphalt the principle in all cases is that of the Root blower. A current of steam, or preferably air, carrying with it the fuel in minute subdivision, is forced at high pressure through the nozzle or "pulverizer" into the tubular interior of the boiler to be heated; the result is an intensely white, roaring flame, and in pulverizers of the latest type the value of the material as compared with coal as a steam raiser, is rated at two and a half to one. Then, too, no force of stokers is required, all that is necessary in the largest steamer being a man to regulate the supply by taps, and there is no smoke, litter or dust.

The very general introduction of "patent back" mirrors, in place of the formerly universal mercury back, is one of the remarkable industrial facts to be noted, the advantages claimed for this substitution being that the first-named article can be produced in one-tenth part of the time for one-fourth part of the labor and at about the same expense of raw material. The process of manufacture, as now simplified and improved, consists in placing the glass, of absolute clearness, on a table heated to a temperature of 120 degrees; a chemical solution composed of four ounces of nitrate of silver dissolved in nineteen ounces of water two ounces of tartaric acid and three ounces of stronger water of ammonia—which forms a clear, transparent fluid—is then poured on the surface of the glass and allowed to remain there for about an hour, the glass being at stages tilted and the surplus solution drained off. The surface is now washed with distilled water and placed in a rack in a drying room at a temperature of above 90 degrees, being left there for half an hour, after which the silvering is coated with shellac varnish, to which is added later a heavy coat of paint; this is allowed to dry, when the mirror is ready.

INDEX MAKING.

A young woman in London has for some years carried on the business of index making. During that period she has trained in her office forty women index-makers, and she has indexed such works as Nansen's "Farthest North," "Science of International Law," 485 volumes of "History," and numerous papers and periodicals. According to this enterprising woman indexing affords a field for women workers that is as yet unoccupied. It is her belief that the feminine intelligence is particularly successful in this line, and that she has found her pupils patient, enduring, accurate and conscientious. Moreover, women's well-known tendency to jump to conclusions become a legitimate exercise as a quick intuition has a great value in successful index making.—New York Tribune.

It is effort rather than achievement that counts with God.

Scrofula and Consumption

People tainted with scrofula very often develop consumption. Anemia, running of the ear, scaly eruptions, imperfect digestion, and enlargement and breaking down of the glands of the neck, are some of the more prominent of scrofula symptoms—are forerunners of consumption. These conditions can be arrested, consumption prevented and health restored by the early use of

Your doctor will tell you so.

At all druggists; get, and \$2.00. SCOTT & BOWNE, Chemists, New York.

TO PREVENT HOG CHOLERA

Protection Provided by the State.

NEW RULES AND REGULATIONS

Adopted for Guidance of Transportation Companies—A Strict Quarantine Provided.

The Oregon domestic animal commission, consisting of the governor, secretary of state and president of the state board of agriculture, yesterday issued its rules and regulations for the guidance of transportation companies, to prevent the importation into this state, and the spread, of the hog cholera prevalent in some of the states in the Mississippi valley. The rules and regulations adopted, which will be sent to every transportation company doing business in Oregon, are as follows:

"Whereas, it appearing to the board of domestic animal commissioners, from the report of the state veterinarian, that the hog industry of this state is endangered by the introduction, from other states, of the disease known as hog cholera; that the disease has already made its appearance in this state, which is directly traceable to hogs shipped into Oregon from other states, and that, unless prompt and vigorous measures are taken to prevent the spread of said disease by the establishment of quarantine stations, and the prescription of rules and regulations relating thereto, great and serious loss may result to the farmers of Oregon:

"Therefore, be it resolved, that the following rules and regulations be and are hereby adopted:

"1.—That stations for quarantining hogs introduced or brought into Oregon from any other state are hereby established at the following places to wit: Baker City, Pendleton, Ashland, Umatilla, and Portland.

"2.—That all railroad cars, steamboats, and other conveyances running through any of the said quarantine stations, and all persons having charge of such railroad cars, steamboats and other conveyances are hereby required to discharge from said railroad cars, steamboats, or such other conveyances, at said quarantine station, any and all hogs carried which have been brought from any state or territory into this state, and turn the same over to the person having charge of such station; provided, that said railroad cars, steamboats, or other conveyances shall transport no hog or hogs into this state, unless such hogs are accompanied by a clean bill of health from the state veterinarian, or his deputy, where said hog or hogs are loaded on said railroad cars, steamboats or other conveyances for shipment; provided, further, that such hog or hogs, accompanied by a clean bill of health, if intended for slaughtering purposes, may proceed to their destination without quarantine, and upon their arrival shall be killed immediately.

"3.—All hogs discharged at any quarantine station, as hereinbefore provided, shall be held at such station in strict quarantine for a period of not less than thirty days, and until all danger from disease in such hogs has passed, which shall be determined by the decision of the state veterinarian.

"4.—All expense in quarantining such hog shall be borne by the owner thereof, or to be paid to the person having charge of such station before removal of said hogs.

"5.—All railroad companies operating railroads within this state are hereby required, to disinfect all cars, yards, and premises used for transporting or confining hogs, and keep all stock cars that are under their control, where any hogs are affected with cholera or any other contagious or infectious disease, in a cleanly and healthy condition.

"The act to prevent the spread of contagious animal diseases provides that any person violating any of these rules and regulations is liable to a penalty of not less than \$10 nor more than \$250 for each of such diseased or exposed domestic animals."

BEECHAM'S PILLS—No equal for Constipation.

DIRECTORY OF SALEM LODGES.

P. J. W. W. SALEM CAMP No. 118. Meets every Friday evening, 7:30, in A. O. U. W. hall, State Ins. bldg. Scott Bldg. C. C. W. A. Moore, clerk, room 16, Moore bldg.

DIRECTORY OF FRUIT AND PRODUCE DEALERS IN MARION COUNTY

CHAS. L. DAILEY.	DRIED FRUIT OF ALL KINDS. POTATOES. At Wallace Warehouse, Salem.
H. S. GILE & CO.	Buy Oregon produce, potatoes and produce of all kinds. Deal in California and Southern products, oranges, lemons, bananas, honey, etc. State Insurance bldg., Salem. Phone 901.
A. M. HUMPHREY & CO.	Buy and store wheat, oats and other grain. Buy potatoes. Also do chopping and cleaning. 270 Commercial st. Phone 2763.
W. S. HURST & CO.	Aurora, Oregon. Buy wheat, oats, hops, potatoes, wool, onions, green and dried fruits, etc. Highest market prices paid for all kinds of produce, and shipments made from any point where carload lots can be secured. Correspondence solicited.

The Kidney Complexion

The pale, sallow, sunken-checked, distressed-looking people you so often meet are afflicted with "Kidney Complexion."

Their kidneys are turning to a purplish color. So is their complexion.

They may also have indigestion, or suffer from sleeplessness, rheumatism, neuralgia, brain trouble, nervous exhaustion and sometimes the heart acts badly.

The cause is weak, unhealthy kidneys.

Usually the sufferer from kidney disease does not find out what the trouble is until it is almost too late, because the first symptoms are so like mild sickness that they do not think they need a medicine or a doctor until they find themselves sick in bed.

Dr. Kilmer's Swamp-Root will build up and strengthen their weak and diseased kidneys, purify their diseased, kidney-poisoned blood, clear their complexion and soon they will enjoy better health.

You can get the regular sizes at the drug store, at fifty cents and one dollar, or you may first prove for yourself the wonderful virtues of this great discovery, Swamp-Root, by sending your address to Dr. Kilmer & Co., Binghamton, N. Y. for a sample bottle and a book that tells all about it, both sent to you absolutely free by mail. When writing kindly mention that you read this liberal offer in the Oregon Statesman.

FAME'S PATHWAY.

Thomas Brackett Reed has been formally admitted to the bar in New York. In his application he declared "that he now resides, and for 30 days has resided, at the Cambridge hotel, Thirty-third street and Fifth avenue, and that he intends to reside permanently in the state of New York." He is now a practicing member of the law firm of Reed, Simpson, Thatcher & Burnham.

Age is a matter of feeling, not years.—G. W. Curtis.

LANDS, PATENTS, PENSIONS AND CLAIMS.

Washington Law and Claims Company, Rooms 5 and 7, 472 Louisiana avenue, N. W., Washington, will, on very reasonable terms prosecute land claims, including mineral lands and mines, applications for patents and pensions, and all other claims before congress, the District of Columbia courts, the several government departments, the court of claims, and the supreme court of the United States.

The company will also aid lawyers, at a distance, in preparing their cases for the supreme court of the United States, and for a small consideration will furnish correspondents information concerning matters in Washington that they may desire to know. Send for circulars.

JOHN G. SLATER, President. (In writing please mention this paper.)

LEGAL ADVERTISEMENTS.

EXECUTRIX NOTICE.

Notice is hereby given that the undersigned has this day been appointed executrix of the last will and testament and estate of John Waddell, deceased, and all persons having claims against said estate are hereby notified to present the same, duly verified, to me at the Salem hospital within six months from the date of this notice. Dated at Salem, Oregon, this tenth day of October, 1899.

ABDIE MILLS
Executrix of the last will and testament and estate of John Waddell, deceased.
10-13 ftw

EXECUTORS' NOTICE.

Notice is hereby given that the undersigned were duly appointed by the honorable county court of Marion county, Oregon, at the October term thereof, 18
