IN STAYTON TOWN

Will Be Repaired When the Waters Recode-Republican Club Elects Its State Delegates.

STAYTON, Jan. 17.—Special reviv-al services are being held at the Baptist church this week.

Dr. A. L. Derbyshire, of Portland, has been recalled to the bedside of little Clarence Derbyshire, who has suffered a serious relapse of typhoid fover.

three months, has returned to her home in Scio: A., D. Gardner, one of Stayton's most active business men, is confined

at his home with all the symptoms of typhoid fever. Miss Edyth Caspell returned to her home in the Waldo hills Saturday, after having spent the former part of the winter in this city. Miss Caspell has many friends here who will regret her

Mrs. Geo. Ashby, of this city, had the misfortune to fall Friday morning in such a manner as to dislocate her wrist. It was thought for a while the bone was broken, but upon examina-tion it was found to be nothing more

serious than a dislocation. Saturday and Sunday the Santiam river at this point was very high, with driftwood running freely. The heavy current undermined two of the piers which support the approach of the big bridge on the Marion county side, allowing it to settle considerably. force of men will be set to work to repair the damage as soon as the waters recede sufficiently to permit it.

The sad news of the death of Mrs. John Pottice reached this city today; the cause of the demise being a complication of diseases, from which she has been a patient sufferer for several years. She fived with her busband and two children on a farm some four miles south of Stayton, and besides tf. being a fond mother and a devoted wife, she was a kind neighbor and a trusted friend to everyone. Mrs. L. A. Thomas, of this city, is a sister of the deceased.

A meeting of the Stayton republican club was held in the city hall last evening, and the following delegates were elected to attend the state republican meeting at Portland on February 6, 1900: A. L. Shreve, W. S. Watters, Hobson, Lee Brown and W. H.

BY RAIL TO BUENOS AYRES.

Chicago Inter-Ocean: The surveys of the Pan-American railway, made by a special Federal commission, are at last receiving careful attention not only in the United States but in Mexico and Central and South America. A few years ago the proposition to construct a railway from New York city by way of Mexico and Central America through the entire length of South America was regarded as chimerical; but since Russia has pushed her Siberian railway across Asia to Port Arthur, and since the Cape to Cairo railway has become a definite project in Africa, the Pan-American scheme has been discussed from the viewpoint of the practical railway man and the American trader. The engineering difficulties are great, but, according to the engineers' re-port, not greater than those already overcome in South America and in our own Rocky mountain region.

The length of the proposed railway from New York city to Buenos Ayres will be 10,221 miles, and it is estimated that it will cost \$200,000,000 to finish and equip the line. The railways already built which may be made a part of the system will measure 5,542 miles. The line from New York to the Mexican frontier is already built, and meas ures 2,094 miles. Of the line in Mexico 1,183 miles are built, and 461 miles are to be constructed. In Central America 210 miles of the railroad have been built and 829 miles are to be constructed. In South America meither Colombia nor Ecuador has any railway that can be utilized as part of the system. There will have to be built 1,354 miles of railway in Colombia and 658 in Equador. Peru has 151 miles of the rallway built and 1,633 to be constructed. Bolivia has 195 miles of railway that can be utilized, with 392 miles to be constructed. Argentina has 936 miles of the railway built, and will have to construct only 125 miles. Of the whole railway 3.738 miles will be in North America, 1,039 in Central America, and 5.444 miles in South America.

The main line of the Canadian Pacific railway from Quebec to Port Moody on the Pacific ocean is 3,025 miles in length. This was constructed for \$130,000,000. The length of the Northern Pacific railroad from Ashland, Wis., or Duluth, Minn., to Seattle or to Portland, Or., is 2,137 miles. The distance from New York to San Francisco by way of the Union Pa-cific is 3,385 miles. The distance from Cairo to Cape Town to be covered by the proposed African railway is 6,600

It is evident that a railway connecting North and South America would develop trade which has not been touched or influenced by ocean commerce. It is evident also that, whatever we may do to enlarge our ocean trade, we shall not be able to develop or control the great interior trade of America unless the Pan-American

Care of House Plants.

House plants require constant care at this season, especially when there are so many changes of weather, as they must be guarded against sudden alterations in the moisture of the room and the rise or fall in temperature. On cloudy and windy days the location in the room should be selected with the view of protecting against the winds. Tepid water should be used and the earht in the pots should not be satu-Kissing and Hugging Take Time.

It's all very well for you and Nellie and Emsie to unite in millions of hugs and kisses, but please consider the time SANTIAM RIVER UNDERMINES THE busy uncle. Try hugging and kissing Emsie for a minute by the watch, and I don't think you'll manage it more than twelve hours a day.-Letter Lewis Carroll.

CARBOLINEUM AVENARIUS.

The most radical remedy against chicken lice and the best wood-preserving paint is Carbolineum Avenarious, manufactured in Germany only. The farmers all over the country count amongst their heaviest expenses to run the farm, the lumber bill. All are undoubtedly interested to learn of a medium to reduce the same at least Mrs. C. C. Bilyeu, who has been an to half its former cost. This medium employe at the Mail office for the past is Carbolineum Avenarious, a woodpreserving paint based on 25 years' experience. Many are of the opinion that paint, tar and linseed oil will preserve the wood against rot and decay. These coatings only form an air-tight cover. but do not destroy the albuminum parts of the wood, which always start the rot. The coatings with above mentioned materials prevent the evaporation of the wood and the consequence is dry rot. Carbolineum Avenarius, on the contrary, penetrates deeply into the wood and destroys all present decay matters. The Carbolineum Avenarius is applied with a brush and imparts a nice nut brown color to the wood. It is used on the farm for painting barns. granaries, shingles, silos posts, bridges, chicken coops etc., and all woodwork above and below the ground, Carbolineum, Avenarius is also the most radical remedy against chicken lice. If you want plenty of eggs and healthy chickens, the chickens must be free from lice and mites. Carboilneum Avenarius will keep your henhouse free from this plague. One coat applied to the Liside of the chicken coop will keep it clean from vermin. Kerosening and whitewashing, which has to be repeated every month, is done away with and expenses for sulphur and insect powder are saved. Whoever disires further information about Carbolineum Avenarius should R. M. WADE & CO., Agents.

Salem, Oregon.

NORTHWEST STATES ORGAN-IZED FOR PROTECTION.

WITH FRUIT GROWERS

Packers' Union May Be Established to Control the Output of the Northwest Prunes.

TACOMA, Wash., Jan. 17.-At the second day of the annual convention of the Northwest Fruit Growers, Montana was admitted to the association, making the present membership Oregon, Washington, Montana and Brit-ish Columbia. The association will endeavor to secure new legislation, making uniform the laws governing fruit inspection and importation of diseased nursery stock for the entire territory represented by the organization. Both the Great Northern and the Northern Pacific through their genera freight agents present, agreed to again take up the request for a reduction of the shedule for green fruit a eastern terminals. The members today advocated the establishing of canneries and evaporators to handle the surplus fruit.

All members and railroad men spoke in favor of organizing a packers union to control the entire output of dried prunes. Reports from different sections of the Northwest show the crop prospects for the coming year to be flattering.

MORMON ROBERTS' CASE

COMMITTEE DECIDES TO RE PORT AGAINST HIM.

Two Members Favor Seating, Then Expelling, the Congressman from Utah.

WASHINGTON, Jan. 17 .- The spe cial committee of the house to investigate the case of Roberts, of Utah, today reached a final conclusion. On the polygamous status of Roberts the committee was unanimous, and agreed upon a formal statement of facts. the question of procedure to be adopted the committee was divided.

The majority, consisting af all members except Littlefield and Dearmond, favored exclusion at the outset. Littlefield and Dearmond will make a mi nority report favorable to seating Roberts on his prima facie rights and then expelling him.

The committee, in its statements, finds that about 1878 Roberts married Louisa Smith, his first and lawful wife, by whom he had six children; that about 1885 he married as a plural wife Celia Dibble, who had ever since lived as such and has borne him six children, of which last were twins born on August 11, 1897; that some years after his marriage to Celia Dibble he contracted another plural marriage, with Margaret C. Shipp, with whom he has ever since lived in habit and repute of marriage.

Chairman Taylor was authorized to prepare the majority report. It will be ready in a few days and prospects are hat the subject will be before the house early next week. Dearmond will submit the views of the minority. The vote on the motion to exclude

Roberts was as follows: Yeas-Taylor, Freare, Morris and McPherson, republicans; Lanham and Miers, democrats. Noes-Littlefield, republican, and

Dearmond, democrat. A TIMBER COMPANY.

Tacoma, Jan. 17.-Articles of incorporation were filed today by the Wey erhauser Timber Co., with a capital stock of \$6,000,000. This is the syndieate that recently purchased, from the Northern Pacific Railroad Co., 900,000 acres of timber land.

EMBEZZLEMENT CHARGED.

Boise, Jan. 17.-Geo. W. Lamoreaux, clerk and recorder of this county, for congressman against Binger Herrated, as too much water is as injuri- was today arrested on the charge of mann. embezzling \$2,000. His bail was fixed at \$10,000, which he was unable to give.

BULLER'S ADVANCE BEGI

The Boers' Were Completely Surprised by the Movements of the British Army

The estimates of how many men and

guns the Boers have to oppose him, are

guess work. In not replying to Gen-

eral Lyttleton's shell fire they are us-

Crossing of the Tugela River by the Relieving Column -- The Commanding General's Forces Are Concentrated and Moving With Great Rapidity.

LONDON, Jan. 18 .- (Thursday, 4:30 LONDON, Jan. 19 .- (Friday, 4 2i. m.)—General Buller completely sur-[m.)—The military critics, in affiliation prised the Boers and occupied the hills with the war office, consider that the beyond Potgieter's Drift, fifteen miles expected battle along the wide are west of Colenso, on Wednesday, Jan-uary 10th. This intelligence is con-ly be delayed beyond today. From tained in an exclusive dispatch to the Durban it is reported the fighting has Times, dated yesterday. He followed already begun.
up the movement by shelling the Boer General Buller's torces, engaged in a trenches. This news completely dis-flanking operation across the Tugela, poses of the statement that Sir. Charles are some 13,000 or 14,000 bayonets: Warren's force went in the direction of 1200 horses, and forty guns. The dis-Weenen, and it tends greatly to re- position of his other 15,000 or 20,000 store confidence in General Buller's men is not known, although the astactics. The supposition that he had sumption is that the whole army will be divided his forces into three columns in action when the hour for the comhad given cause to anxiety. It is now bined movement arrives. General Bulseen that such view was erroneous, as ler has probably 35,000 men and eighty General Buller's forces are concentrat- guns all told.

In Cape Colony General Methuen has made a demonstration in force, shelling the Boer works. General Gatacre is skirmishing around Molteno, and General French has thrown a few shells at the Boers at Rensberg. Colonel Plumer is moving to the relief of Maseking from Bechnanaland. He is now n command of less than 2,000 men. Maleking is in a bad way; the siege s being pressed with determination, and the Kaffirs are deserting because of the pinched rations and the necessity of ating horse meat.

The Standard's vivid account of the assault upon Ladysmith shows that the garrison was surprised, and that several times the situation was critical Out of a detachment of the Thirtieth Gordon highlanders, who surrendered every man was wounded, says the correspondent. Curiously enough, this is the first mention of the capture of the highlanders. The Boer repulse at Ladysmith was the heaviest counterstroke of the war. The government is relaxing its efforts to send out reinorcements.

CROSSING THE TUGELA.

London, Jan. 18-A dispatch to the Daily News, from Spearman's farm, describes Lord Dundonald's advance to Swartzkop hill, commanding Potgieter's Drift and says:

"General Lyttleton's brigade was sent o hold the position on Swartzkop hill Leaving a strong body to hold Colenso, and General Hildyard's brigade at without delay.

"After four days' halt on the south ide of the Tugela, our advance north! ward began Tuesday January 16th. "General Lyttleton's brigade crossed the drift that evening, and held the kopjes on our right. Sir Charles Warren's division has made an attack upon the enemy's left flank. The column is now crossing the river."

The Times published the following lispatch from Spearman's farm, dated January 17th, 9:20 p. m.:

"The force marched westward on January 10th. Lord Dundonald, by a dashing movement, occupied the hill about Potgieters Drift, fifteen miles west of Colenso, taking the Boers perfectly by surprise. The same evening the in-fantry followed. General Lyttleton's brigade crossed the river yesterday, and today shelled the Boers beyond with

"General Warren's force is now crossng Trichardte's Drift five miles above, He is not opposed, although the Boers are holding a position five miles from he river.

The Daily Mail has the following dated yesterday, from Pietermaritzburg: News has been received that General Buller is making satisfactory progress.

FAIR WARNING. Sterkstroom, Jan. 17 .- General Gatcre has warned the Boer commandant that if the women are not removed they must take their chances of being shot

in the event of attack. AT MODDER RIVER. Modder River, Jan. 17.—There was demonstration in force, under General Methuen yesterday, the division being engaged with the object of ascertaining the strength and disposition of the Boer forces, and also in order to try to draw the Boers from Kimberley, where lately they hav been active. The British discovered the Boers in great orce, and had been reinforced from the

direction of Jacobsdahl. At 4:30 the

artillery opened fire, the shells drop-

ping in the Boer entrenchments with

great precision. The firing continued

until sunset. There were no casualties among the British troops. HOTEL MAN DROWNED. Seattle, Jan. 17.—Thomas A. Whitten, proprietor of the Golden North hotel, at Skagway, fell from the deck of the

and ran into the ditch. One car was badly demolished, but no one was in-

As a consequence of the accident, both of the regular overlands will be delayed for several hours. The Oregon express, due in this city at 6:44 o'clock this morning, is about 12 hours late, and will hardly reach this city before 7 o'clock this evening. In its stead, how ever, a local train was formed at Roseburg, which will reach Salem this morning on the regular schedule of the express. It will consist of the usual day coaches, and will carry baggage, express and through mail.

WANT AN ESTIMATE

(From Daily, Jan. 18th) Several months ago a prominent

state officer received a letter from the New York World, asking for various statistics regarding this state for use in that paper's 1900 almanac. The answere of the official included, among other items, an estimated population of the state of 500,000. A few days ago this gentleman received a letter from Fred' H. Wines, of Washington D. C., an official of the certsus bureau, asking upon what the estimate had been based; what percentage of error it involved, and what confidence the officer himself placed in the estimate, adding that the information was desired for the purpose of aiding the census bureau in making its estimates of the probable population of the United States, next lune. The following answer was yesterday sent the census officer by the Oregon official, which will be found self explanatory, and the writer of the letter asks several pertinent questions, which many citizens of the state would. doubtless, like to see the census bureau

"You want to know 'what I based my estimate on, what percentage of error I think it involves and what confidence I myself place in it?

"Now, why, my dear sir, do you imply, from the form of your question, that I do not have a full 100 percentage of confidence in it? When a witness steps out of court where he has testified to a certain thing, do you think it would be altogather courteous for a bystander to ask him what 'percentage of confidence he had in what he had just sworn to? My estimate was in round numbers, and I have the full 100 percentage of confidence in it. If, for instance, I had had only 90 per cent of 'confidence' in my estimate, I would have knocked off to per cent of it in the first place, see?

"You say you want this estimate to aid the census office in estimating the probable population of the United States in June, 1900, when the twelfth federal census will be taken.' But why does the census office want to make an 'estimate' of the population in June when its duty at that time, as you say, is to ascertain the actual population itself? How can an 'estimate' by men who may have a very small 'percentage of confidence' in their own calculations be of any aid to a bureau that is supposed under the law to ascertain the actual population from the facts, and

"I assure you, sir, that I have the full 100 'percentage of confidence' in the ability of the census bureau to get the results it needs from the facts, without relying on mere 'estimates'

In this connection it is found that the supervisors of the census are required by the bureau, to secure information regarding the estimates of various newspapers and officials on the population and other statistics, which, under the law, are supposed to be secured by the census enumerators during the time they are in the field, instead of gathering the estimates secured by correspondence. The supervisors are not meeting with very good results, as people are chary of giving estimates to a bureau which is required, as the above official states it in his letter, to secure facts and figures by actual
