

KANSAS CITY IS THE MFCCA

Of the Democratic Hosts from Every Part of America.

SLOGAN OF 16 TO 1 IS IN DANGER

Many Delegations Have Signified Opposition to the Phrase—Bryan May Be Heard.

KANSAS CITY, Mo., July 3.—With flags flying, bands playing, streets resplendent with a blaze of bunting and of myriads of lights, and with the ear assailed by a deafening conglomeration of bombs, rockets, crackers, and the marching of clubs and drum corps with their confusion of patriotism and politics, Kansas City is tonight ushering in the National holiday and the National Democratic Convention.

The steady influx is straining the city's accommodations to the utmost, and tonight the people are being packed in rooms and hallways without much regard to comfort, so long as they can get a place to lay their heads.

The most remarkable feature of the situation is the sudden shift of sentiment since yesterday, when the dominating influence of Bryan was everywhere manifest, whereas today, many delegations took formal action against a specific 16 to 1 declaration, which is supposed to be Bryan's sine qua non.

WILL BE THERE. Kansas City, Mo., July 3.—Unless the plans perfected tonight are upset, Bryan will attend the National Democratic Convention after his nomination, if he is put in the field early enough to render it practicable for him to do so.

A SENSATION. Kansas City, July 3.—The New York state delegation furnished the sensation of the day, when, after a stormy session of three hours they put forth a candidate for Vice President in the person of Judge W. Keller, commissioner of charities of the city of New York.

SENT TO THE LAUNDRY. EASTERN MAN WANTED HIS GREEN BACKS MANGLED.

The Currency Was Luckily Recovered, However, Before Being Consigned to the Wash-tub.

(From Daily Statesman, July 3.) It is quite an unusual thing for an individual to send a roll of greenbacks to a steam laundry but that is exactly what D. E. Wynkoop, a recent arrival from Traverse City, Michigan, did yesterday.

Mr. Wynkoop is a timber man and reaching Salem last Saturday evening from the East and registered at Hotel Salem. Yesterday morning he departed for Mehama on the 11 o'clock train to look at some timber.

Mr. Fennell allowed the package to remain in the hotel office until after the noon hour and at 1:30 o'clock carried it to the Salem Steam Laundry where he carelessly deposited it upon the receiving table among a number of other packages.

they were put in the case of Dr. Alvaro Ramos. The two were joined in a manner similar to the Siamese twins, only still more closely. Use of the X ray two legs.

There was a sensation in New York medical circles in the spring of 1885, when Mrs. J. Koehler, of 342 East Forty-second street, gave birth to girl twins, who were joined diagonally from the lower part of the spinal column to the upper part of the pelvis. A peculiar feature of this case was that though joined at the back, the ligaments were so elastic as to allow the twins to face each other.

Mrs. Henry Jones, of near Kokoho, Indiana, gave birth to twins connected at the hips and lower abdomen in June, 1887. No vital parts were connected except the spinal column, which was continuous from one end to the other.

Radica and Daddica, natives of Orissa, India, who were exhibited several years ago, are two little girls who are attached from breast to breast by a flexible bony connection, below developed the fact that the seventh ribs were united by a solid osseous formation, and that there was but one liver for the two. It was not difficult to sever the flesh and bone, but when it came to dividing the liver Dr. Ramos hesitated. Nevertheless, there have been cases where part of a diseased liver has been removed, so the physician was encouraged to make the attempt.

The first part of the operation was completed early in the winter when the ribs were cut apart. The shock was so great to the patients that it was deemed necessary to wait for a time before completing the separation.

Cases like this are rare. The most famous is that of the Siamese twins, Chang and Eng, born in Siam in 1811, who were united at the anterior part of the chest by a fleshy ligament. All attempts to separate them without endangering their lives proved futile.

After a long season as museum freaks they married two sisters and settled down on a plantation near Salisbury, N. C. They died on January 20, 1847. Paralysis was the cause of Chang's death, and the other, falling into a stupor immediately, died within two hours.

Millie and Christine, known as the "double headed nightingale," were another example. Born in Columbus, S. C. in 1851, they were exhibited for several years in this country and in Europe.

THE TOCCEL TWINS, of Italian birth, who were exhibited here, had only which there is a visceral attachment. Food and medicine given to one affects both.

HARVEST AFTER THE FOURTH. Eastern Oregon Farmers Will Celebrate, Then Commence Cutting Wheat.

Pendleton, E.-O. A very large number of farmers are coming to Pendleton to celebrate this year, so say those who have made inquiries among them. But Umatilla county is green, while harvest will be in almost full blast on the day after the Fourth of July.

That has been the date set most generally for the machines to be started in good earnest. In a few localities cutting has been in progress for two weeks, but this has been only where the grain always ripens earlier than is common in this county.

And in a few sections the grain will not be quite ready on July 5th. But as a rule, the cutting will begin on that day. From the most reliable sources it is learned that, while the yield in total will be very large, the yield per acre will not likely be so great as has been all along looked for.

Increased acreage must give the increase over last year's production, as the heads are not so large, the number of grains in each mesh being less than in years when phenomenal crops have been harvested.

But the increased acreage will more than make up for what would be the loss from smaller meshes, so that the crop of Umatilla county will surely be not less than 5,000,000 bushels.

As to quality, it is found to be superb. There are thousands of acres that will go number one, and, as a matter of fact, little comparatively will grade below number one.

This is the consensus of opinion at this stage of the crop production, a large number of farmers having been interviewed on the crop situation.
