Counterfeits, Imitations and "Just-as-good" are but Experiments, and endanger the health of Children—Experience against Experiment.

The Kind You Have Always Bought Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years.

Lee's Lice Killer

Price one quart, 25c. Half Gal., 50c. One Gal., \$1. Five Gal., \$4.

The use of this preparation has become so universal, and results are so satisfactory, that most poultry-rasiers would not know how to keep house without it. It is no longer necessary to dip or dust poultry to kill the lice. A can of Lee's Lice Killer, a paint-brush, and a few minutes' work in applying it to the roosts, means all the expense and labor now necessary to keep the fowls free from both mites and body-lice. A can of it should be in every poultry-house. It kills and prevents mites and lice, and keeps the air in the poultry-house pure and sweet, killing disease-germs and preventing the other enemies of the poultrymen—rump and cholera.

SAVAGE & REID, Seedmen

322 and 324 Commercial Street, North of J. D.

Reduced Prices

On Woven Wire Field Fencing, Netting for Belgian hares, Poultry, etc. Shingles and Screen doors.

COST OF THE PRISON

QUARTERLY REPORT OF SUPT. J. D. LEE PLACED ON FILE.

A Decrease in the Number of Convicts During the Past Three Months—Cost of Keeping.

(From Daily Statesman, July 18.)

Supt. J. D. Lee, of the Oregon penitentiary, yesterday filed his report in the office of Secretary of State P. I. Dunlap, for the quarter ending June 1st. The report shows a decrease of twenty-seven during the quarter, in the number of convicts. The earnings of the prison aggregate \$7197.17, and the expenditures during the three months, including salaries paid, were \$9487.39. The following statistics are taken from the report:

Table with columns: No. convicts close of quarter, No. convicts close preceding quarter, Discharged during quarter, Sent to Asylum, Escaped during quarter, Daily average, Earnings, Expenditures during the quarter are given as follows: Salaries, Officers and employes, General Expense Fund, Meat, Flour and feed, Groceries, provisions, etc., Dry goods, cloth, blankets, Drugs, Stationery, postage, etc., Paints, glass, lime, Laundry, Hardware, implements, etc., Expense not classified, Total, Receipts, Paid U. S. prisoners, Expenditures during the quarter are given as follows: Salaries, Officers and employes, General Expense Fund, Meat, Flour and feed, Groceries, provisions, etc., Dry goods, cloth, blankets, Drugs, Stationery, postage, etc., Paints, glass, lime, Laundry, Hardware, implements, etc., Expense not classified, Total, Relief Fund, Paid discharged prisoners, Rogues Gallery, Photographing convicts, Electric Light Fund, Lights and lamps, Public Road Fund, Wagon, New Wing Fund, Hose, Plans and specifications, Advertising, Casting for brick machine, Total, Total disbursements.

WORK OF EXPANSION.—Prof. C. H. Jones went to Portland on yesterday afternoon's train. From there he will go into Columbia county, to work for the Northwest's leading farm paper, the Pacific Homestead, of that city. He will probably be gone until the first of September. Frank Morrison is working for the Homestead in the vicinity of Condon, Gilliam county. G. L. Savage in Lane county, having just canvassed the Siuslaw country and C. Hughes in Clackamas county; besides a large number of canvassers throughout the Northwest who are not devoting their whole time to the work. The result is that just now new subscribers for this farm paper are coming in at the rate of about a thousand a month, and for the Twice-a-Week Statesman, which is being pushed in connection therewith, nearly half as fast.

FOR A TOMBSTONE.—Rev. W. A. Daly, administrator of the estate of John Hayes, deceased, yesterday petitioned probate court for an order authorizing him to erect a tombstone, to cost \$25, over the grave of the deceased.

HE BLED TO DEATH

SUDDEN DEMISE OF BRUCE E. SKEEL YESTERDAY AFTERNOON.

Experienced a Severe Hemorrhage of the Lungs—Was an Employee of S. L. & T. Company.

(From Daily Statesman, July 18.)

At 3:45 o'clock yesterday afternoon, Bruce E. Skeel, an employe of the Salem Light & Traction Company, was seized with a severe hemorrhage of the lungs while at work in the company's office on Court street and died ten minutes later, before medical attendance could be summoned.

The deceased, young man was aged about 22 years and was the son of Mr. and Mrs. M. W. Skeel, of Medford. He entered the employ of the Salem Light & Traction Company last November, as inside trimmer. He continued his work until about January 15th when the broods of that dread disease, consumption, so impaired his health that he was obliged to resign his position and return to his home at Medford, but he failed to regain his health, and subsequently wrote Superintendent Lambirth that his condition remained unchanged and that he would prefer to return and resume his work. He re-entered the company's service last May and was continuously employed since that date.

Young Skeel was a competent and faithful employe, of whom Supt. J. L. Lambirth speaks in the highest terms. He was very popular among his co-laborers who deplore his untimely death. It was known for some time that young Skeel was a consumptive, and, not possessing a strong vigorous constitution, his hours of labor were abbreviated so as not to overtax his

DAMAGE TO CLOVER

A NEW PEST APPEARS IN THE OREGON FIELDS.

The Army Worm, or a Species of that Destructive Insect, is Ravaging the Valley.

(From Daily Statesman, July 18.)

There has appeared, in the clover fields of the Willamette valley, a worm that is eating off the leaves of the plant and destroying the crop, at least so far as a seed crop is concerned, for the present year. Some of the farmers think they are also killing the plant, as they are working on the roots.

The Pacific Homestead of this city yesterday received a sample of the worm from a farmer in Tillamook county, who says they have made their appearance there by the million. This sample, together with one secured on the farm of George Savage, about one and one-half miles from the Fair Grounds, was forwarded yesterday to Prof. A. B. Cordley, Entomologist at the Oregon State Agricultural College Experiment Station at Corvallis, for his opinion concerning the pest.

On the farm of Mr. Savage the worms have eaten off a large field of clover. In spots it looks as if a fire had run through it, so destructive has been the work. Mr. Savage thinks they have killed the plant on his field. His neighbors are suffering in the same way, and the damage has been thousands of dollars even if nothing but the seed crop has been destroyed.

Some farmers have been disposed to call it the "Army Worm," but an Eastern lady, who is visiting at Mr. Savage's place, says it is not the Army Worm.

MORE ORIGINAL STATE CAPITALS.

Changes That Have Been Made in the Seats of Government of the Various States.

Very few American states have now their original state capitals, a circumstance which is being recalled by the observances in various parts of the country of anniversaries of the establishment of the present capitals.

The original capital of Indiana was Corydon, of Illinois, Vandalia; and of Ohio, Chillicothe. Corydon and Vandalia are small towns, but Chillicothe has grown to be a city of some importance. The original capital of New York was this city, and for a short time New York had two capitals, New York city and Jamaica, L. I. Afterward, the course of capital moved northerly; first to Poughkeepsie, then to Kingston, and finally to Albany, where it has been situated for more than a century.

The original capital of Alabama was Tuscaloosa; and of Georgia, Milledgeville, until superseded by Atlanta after the close of the civil war. Iowa City was the original capital of Iowa, now Des Moines; and in some of the new Northwestern states, notably North Dakota, it has been necessary to put the matter of capital selection to the determination of the voters on several occasions, and not without considerable contention and friction in the settlement of the dispute. New Orleans, for a time after the civil war the capital of Louisiana, has been superseded by Baton Rouge, Detroit, the largest city in Michigan, was originally the capital, a position now occupied by Lansing. Leavenworth was the first capital of Kansas; Topeka is the capital now.

Omaha was the capital of Nebraska as a territory and remained such for a short time after its admission, until Lincoln succeeded it. Wheeling was the first capital of West Virginia before the selection of Charleston, and Virginia City was the capital of Nevada before the selection of Carson City, or Carson, as it is called locally. Denver has always been the capital of Colorado, state or territory. Yankton, South Dakota, was the capital of Dakota territory before its admission into the Union as two separate states, but the present capital of South Dakota is the town of Pierre and it was not established as such until after some controversy.

By what may best, perhaps, be described as a paradox, Rhode Island, the smallest of the states in the country, has had the largest number of capitals. It now has two, Providence and Newport and originally had five simultaneous capitals, so to speak, Providence, Newport, South Kingstown, East Greenwich and New Haven, and it is sometimes found difficult, at present, why a small state with a sparse population and having little official business to transact should have found it necessary to maintain more than one capital. It is explained by the fact, however, that in early times and for some years after the revolutionary period, local jealousies existed between the several towns of the state, and it seems to appease these jealousies that the concession was made of two capitals, Rhode Island, though not the pioneer, is now the last survivor of this custom and its citizens are to vote in November on the proposition to do away with Newport as a capital and to establish Providence as the only one.

Another reason which has had considerable to do with the establishment of capitals in early times in country districts was found in the definite boundaries of the states. All the original states had fixed boundaries when admitted, but most of the Western and Southwestern states were subdivisions of former territories and the capital which was appropriate at one time would not serve after the different boundaries were chosen. The territory of Michigan, for instance, including a part of Northwestern Ohio including the city of Toledo, Ohio was admitted into the Union in 1802 and the Northwestern counties were not annexed to it until 1836. This change in the boundaries justified the selection of a more northerly town for the capital, and Columbus was chosen.

The United States has changed its capital, originally in New York and afterward in Philadelphia, like most of the separate states.

Polish women in Pennsylvania celebrate the close of the Lenten period by switching their husbands and deluging them with water. It is a custom imported from Poland.

The thing in the world I am most afraid of is fear, and with good reason; that passion alone, in the trouble of it, exceeding all other accidents.—Montaigne.

The reason why so few marriages are happy is because young ladies spend their time in making nets, not in making cages.—Swift.

Sentiment is intellectualized emotion precipitated, as it were, in pretty crystals by the fancy.—Lowell.

The way to be safe is never to feel secure.—Burke.

My foot is on my native heath and my name is MacGregor!

THE CLEANSING AND HEALING CURE FOR CATARRH

is Ely's Cream Balm

Easy and pleasant to use. Contains no injurious drug. It is quickly absorbed. Gives relief at once. It opens and cleanses the nasal passages. Cures Catarrh of the Nose, Throat, Larynx, and Bronchitis.

Herbs and Prokrets the Membrane. Restores the Forces of Taste and Smell. Large Size 50 cents at Druggists or by mail. Trial Size, 10 cents by mail. ELY BROTHERS, 16 Warren Street, New York.

Man only—rash, refined, presumptuous Man—Starts from his rank, and marks Creation's plan! Born the free heir of nature's wide domain, To art's strict limits bounds his narrow reign; Resigns his native rights for puerile things, For Faith and Fetters, Laws and Priests and Kings. Poetry of the Anti-Jacobin.

Metals never rust in the waters of Lake Titicaca. A chain or an anchor can be left in it two weeks and will be as clean and bright as when it came from the foundry, which is probably owing to action of some of the chemical salts in the water.

In Patagonia ostriches are not bred as at the Cape of Good Hope, but run wild and are being gradually exterminated. The Indians chase them on horse-back and catch them with bolas—two heavy balls upon the end of a rope woven of leather strings, which they throw in such a manner that the birds are ensnared.

With the Hindoos of to-day the ruby is esteemed as a talisman which is never shown willingly to friends, and is considered ominous of the worst possible fortune if it should happen to contain black spots. The ancients accredited it with the power of restraining passion, and regard it as a safe-guard against lightning.

Another odd sort of item in manufactured rustic work is the rustic bridge. Owners of country places of large or of small extent buy such bridges for various purposes, to put over a brook or larger stream that runs through their property; on large estates, where it may be ponds have been made and artificial streams, bridges are required. Rustic bridges are made in large variety. They can be found in stock up to thirty feet in length and larger ones are built to order.—Sun.
