country. We can have the trade of other countries without ruining our own manufacturiers and producers or reducing our laborers to a state of pauperism. What is vasily more important, we can preserve our home markets, the best in the world, and bound to continue the best as long as our people are prosperous, our laborers employed at remunerative wages.

There are chances, no doubt, to make additional reciprocal arrangements, such as would not affect injuclously, our producers and laborers;

It is an "eucouraging force" to all Americans, for their eyes and hopes and fortunes rest on "Empire"-that is the empire of this Republic, representing popular government and freedom; in which all the people have a voice; which represents the highest ideals of civilization, progress and education; in which the enlightenment and happiness of individuals is the concern of all. This is the kind of an Empire the world has been waiting for all the centuries. It is encouraging to know that popular government is not a failure; that the people of the United States are not afraid to undertake the solution of the problems that destiny has thrust upon them.

LOOKING BACKWARD.

Said the New York Sun Nov, 5th The campaign that ends tomorrow has been on the 'Democratic side an imposture. It was a flow of inflammatory talk in which no debate upon a political principle was discernible, except that upon the relation of the Constitution to new territory, a question which was placed in the hands of the Federal Supreme Court before the campaign began. The Democratic campaign has the peculiar distinction also of having seen its foremost candidate, Bryan convicted of falsification, on various counts, by one of the most serious public men identified with the opposition, the Hon. Will am Pitt Frye, of Malne,

In their attacks upon the Administration the Democrats have used slander. In their appeals to the public they have played the demagogue of the lung timue to a healthy condition and pro-the lowest grade. TO PREVENT DECAY.

Wood Preserver Used by Uncle Sam on Yamhill River Work.

Merits of Avenarius Carbolineum Recognized by National, State and Municipal Govern-

ments. The fame of Avenarius Carbolineum has steadily extended, as the only bona tide preserver of wood, since its discovery in Germany thirty years ago. It has stood all tests of climate, soil and much, for Bryan's chances of being water and steadily lived down all pretended rivals. Today it is not only employed in all countries for the preservation of wood used for household articles such as houses, barns, fences, etc., but the national government, both of Europe and America, have recog-

nized its value in saving public constructions from decay. Following their example cities and counties have also adopted avenarius carbolleum for will soon provide the ships to carry bridges, pavements, cfc, and the leading ship builders and railroad companies have shown their faith in its merits by treating ship timbers, cars, telegraph poles and ties with the same never failing preventative against climatic decay and repacious wood boring vermin both of land and water. Great bodies move slowly, and only

act after mature deliberation. It may therefore be safely stated that governjents and corporations did not employ avenarius carbolineum until fully convinced of its money saving as well as wood preserving qualities. Private individuals desirous of lengthening the life of wood work and at the same time curtailing expenses, need not fear to

follow the precedents established. Recent local examples prov. ag the truth of the above statements are not wanting. The reconstructed Madison street bridge in Portland has been treated with avenarius carbolineum, as has also the pavement at the intersection of four streets in that city where the heaviest street car and wagon traffic converge. The latter use of the compound was made at the earnest solicitation of street car managers who confidently look for gratifying results. The gentlemen in charge of the Unifed States engineer department for Oregon are now applying avenarius carbolincum to the dams and lock work on the Yambill river, a flattering tribute to its merits which was certainly not extended until searching investigation

would appear that the individual who does not protect his own, or the taxpayer's pockets by using this compound, thus saving from decay, and lengthening the life of all frame struct-
