## Proposal to Provide a Permanent Census Bureau Discussed

THE MEASURE, AS PRESENTED, DID NOT MEET WITH GENERAL FAVOR IN THE HOUSE.

Dates Fixed for Hearing the Applications of Territories to Be Admitted to Statehood—A New Territory May Be Formed—French Agent of the Panama Canal Company to Be Heard.

WASHINGTON, Jan. 10.—The House spent the day in considering the Hopkins bill to create a permanent Census Bureau. While the general sentiment was in favor of a permanent bureau, there was a strong opposition to the bill as drawn, on the ground that it was not well matured. There also was an overwhelming demand for a provision to place the present employes of the Census Bureau under the protection of the civil service law, and the bill was finally recommitted with instructions to report back a bill containing a plan for the detailed organization of a permanent Census Bureau, to include also a provision to place the present employes under civil service.

TO RAISE WAR FUNDS. England Talks of Heavy Income Tax, Tax on Tea, Sugar, Etc.

LONDON, Jan. 10.—The approach of the re-assembling of Parliament and the necessity of meeting a difficult financial situation is bringing out a new discussion as to the means of recasting the system of taxation.

The Times, commenting on letters contributed to its pages by the statistician, Sir Robert Giffen, who advocates the replacing of the heavy income tax by a system of increased indirect taxation, and who estimates the coming deficit at 10,000,000 pounds, presses approval of Sir Robert's ideas and thinks that increased taxes upon tea and sugar might be imposed with the restoration of the shilling duty on corn, and this latter might even be doubled.

The Times also suggests a tax of one penny a gallon on petroleum, and of one shilling per load on timber.

LASCELLES ARRESTED. Noted Swindler, Who Posed in America as an English Lord, Arrested.

BOSTON, Jan. 10.—The police here have captured Sydney Lascelles, a noted swindler, said to be known to the police of both continents as Lord Walter Beresford. He is held on request of the authorities at Hot Springs, Ark. Lascelles admits his identity. He has been known under many aliases besides Lord Beresford, among them being Sir Harry Vane, R. N., and Lord Courtney, Claude E. Lascelles and Jas. B. Lasalle.

The charge against him is the agency in 1891 of \$1200 from Lyman J. Haney, proprietor of the Arlington Hotel. It is said that Lascelles, as Lord Beresford, eloped from Algiers with the daughter of an American millionaire, who, after learning of the man's character, secured a divorce. He has served terms in New York and Georgia for swindling and forgery. It is said he is now the husband of a wealthy young woman of Providence, R. I.

HEART IN WRONG PLACE. BLOOMINGTON, Ill., Jan. 10.—A man with his heart on the right side instead of the left has just been discovered by the physician board of this city. The man is George W. Hurst, of Lexington, a veteran of the Civil War, who recently applied for a pension. In the course of the physical examination the physicians made the remarkable discovery that the applicant's heart was on the right side instead of the left. Hurst says that he never experienced any discomfort or inconvenience as a result of this unusual location of his heart. The pulsations are as even as those of an ordinary man of his age, and there appears to be nothing unusual about the heart ex-

cept its location. It is normal in every other way. The physicians say that the case is extremely rare, and only a few are known to the medical fraternity.

LEAPED TO DEATH. AN ALASKA PATIENT AT THE INSANE ASYLUM. Committed Suicide by Jumping from a Third Story Window—His Relatives Reside in England and Australia, and Have Been Notified.

(From Saturday's Statesman.) Thomas A. Wilson, a patient at the Insane Asylum, who was brought down from Alaska August 18, 1901, committed suicide by jumping out of a third-story window on Thursday evening, January 9th, while in the passage to the chapel gallery, falling to a bed of rocks on the ground in the yard. Wilson was assisting in carrying chairs to the gallery for an entertainment to take place in the evening, when he took the fatal leap. There were no bones broken, but he sustained internal injuries to which he succumbed to yesterday.

Wilson was committed to the Insane Asylum from Alaska, and he had recently shown marked signs of improvement. When realizing that he was in an insane asylum, he was very much distressed. He had thus far shown no signs of suicidal tendencies, and was generally considered a model patient.

Relatives of deceased in England and a brother in Australia, were notified of the sad occurrence, and Governor Brady, of Alaska, was telegraphed. The remains will probably be interred in this city for the present.

ADOPT RESOLUTIONS THANKING HIM FOR HIS EFFORTS IN BEHALF OF THEIR STATES.

And Endorse His Action in Preventing the Northern Railroads from Falling into the Hands of the Union Pacific, Thus Securing to Them an Independent System of Railroads—They Are Grateful.

FARGO, N. D., Jan. 10.—The features of the Tri-State Grain and Cattle Growers' Association here today, was the address of J. J. Hill, and the adoption of resolutions commending President Hill for his work on behalf of the Northwest. An attempt was made to have these particular resolutions stricken out, but the attempt failed and the resolutions stand as the sense of the convention.

The resolutions adopted say in part: "It is the sense of this meeting that, in resisting the attempts of the Union Pacific Railroad and its allies on the one hand, and the Canadian Pacific and its feeders on the other, to secure control of the Northern Pacific Railroad, Jas. J. Hill has performed a notable public service, and once more displayed a far-sighted and business-like policy that has characterized his long career as the great developer of Northwestern resources, and the most watchful guardian of Northwestern interests. "In recognition of the honorable and upright course of James J. Hill, in his dealings with the farmers of the Northwest, we congratulate the country on his success in preventing the absorption of the Northern Pacific by the Union Pacific interests on the one hand, and the Canadian Pacific on the other, and express our confidence in the purpose and ability of Mr. Hill to give to the states of Minnesota and North and South Dakota the best and cheapest transportation facilities to be had by the people of any section of this Nation."

## WILL BUILD A STADIUM

A LARGE STRUCTURE TO BE ERECTED IN CHICAGO. To House the Olympian Games in 1904 —It Will Seat Nearly Twice the People Held by the Stadium in Athens.

CHICAGO, Jan. 10.—The stadium, which will seat 75,000 people, and which in point of size, elegance and excellence of arrangement will probably exceed any other building ever erected for a similar purpose, is outlined in a set of preliminary plans just placed in the hands of Mr. Harry J. Furber, Jr., president of the Olympian Games Association. The structure, it is asserted, will house the Olympian games to be held in Chicago in 1904.

The building will cover approximately 11 acres, the arena alone being 800 feet long and 130 feet wide. The stadium at Athens, where the Olympian games were held in 1896 was but 670 feet long and 109 feet wide. The stadium at Athens seated between 45,000 and 50,000 persons. The plans for the Chicago stadium provide for more than 75,000 seats in case they may be necessary on the days when there will be special attractions at the games.

A striking novelty in the way of a roof is provided for. The area over the seats will be roofed in the usual way, but the arena will be protected by a roof or left without one with almost the ease with which an umbrella can be opened and closed. The roof of the arena will consist of a series of waterproof curtains arranged on the rollers operated by electric motors. When the games are in progress the curtains will be rolled back. In the event of a storm all that will be necessary to put the roof over the arena will be to "press a button." So in good weather, while the audience will be protected from the sun's rays, the contest will really take place in open air; and with the aid of the adjustable roof, postponements will be unnecessary "on account of the weather."

An unusual feature is an arrangement of dividing the stadium into three or more buildings for special occasions, when the whole space will not be required. At either end, or in the center, a hall for any sort of a gathering can be made in three or four days at a nominal expense. Another feature of construction is that there will not be a pillar or post in the whole interior to shut out the view from any point. The first row of seats is five feet above the arena and the topmost row eighty feet above.

The Olympian games of 1904, it is predicted, will be greater than any ever held at any period in history. Athletes have advanced with the arts and sciences, and where the ancient Greeks had but few tests of strength and endurance, there are now scores. The ancient sports will be reproduced in Chicago, but the modern games of all nations will doubtless attract greater attention. There will be the old Greek races and wrestling and the Egyptian chariot racing, but also modern fencing, boxing, wild cowboi racing—everything in fact except medieval jousting.

The athletic end of the games will be under the direction of William Hale Thompson and A. G. Spalding. The former's duties will be the rounding up of every sort of sport on the globe and Mr. Spalding is to select the contents which are to make up the program for the best available athletic material. President Furber feels assured that the program at Chicago will be better than that at Athens in 1896, or at Paris in 1900, and with a view of adding features not seen at Athens or Paris, it has been decided to keep the stadium open for a month instead of 15 days, as was at first planned.

CASTORIA. The Kind You Have Always Bought Bears the Signature of *Wm. D. Gifford*

Dairy and Food Commissioner J. W. Bailey is on the lookout for short weight butter these days, this being the time of the year when manufacturers and dealers are apt to forget themselves in working up their rolls. A few ounces cut from every pound of butter makes a pound in time, like the proverbial stitch, and when the product is at its highest market value, then these extra pounds come in like so much clear profit. Mr. Bailey says, however, that he finds most of the dealers honest, and there is little prospect of the pure food fund being swelled through fines this season.—Evening Telegram.
