FISH WARDEN MAKES REPORT

Of Conditions and Results Obtained in the Fish Hatcheries

HAS COMPLETED A TOUR OF IN-SPECTION TO ALL STREAMS WHICH ARE CROSSED BY DAMS AND MAKES INTERESTING RE-PORT THEREON.

(From Wednesday's Daily.)

The State Board of Fish Commissioners convened in regular session yesterday and the entire meeting was devoted to the auditing of Master Fish Warden H. G. Van Dusen's report for the month of October and the discus-sion of matters pertaining to the fish planted, should help materially to industry generally.

Mr. Van Dusen's report is replete with valuable information and inter- take of eggs there at that plant this esting accounts of the progress and year was simply that the salmon did conditions of the several hatcheries in not get that far up the river. Mr. the state, and is reproduced in full, as follows:

"A great deal of complaint has been lodged with this Department of late over the matter of mill men and mining ditch men, damming the waters of the state without providing any passageway whatever for the fish to either ascend or descend the streams. They are generally low dams and no obstruction whatever during high water, but, as our waters remain high only a very short portion of the year, I look upon them as being very serious affairs; other dams are very massive examinations made this seasoh there and substantial and are complete obstructions at all times. "Some of these I visited during the

month, and beg leave to report relative to them, as follows:

Clear Creek Dam.

"Across Clear creek, a tributary of the Clackamas river, there are three; one is near the Logan postoffice, the other two are three and four 'miles above, situated near the Viola post- enclosure, but not enough to affect his office, and are owned respectively by: Gustave Fisher, of Logan; C. G. Stone, tion he also expects to get a large of Viola, and the Walker Bres., of VIola. The Fisher and Stone dams I found to be about twenty feet high and old obstructions, having been in across should not do as well with them this the stream for years, with no pretense of a fishway. The Walker Bros.' dam was in course of construction. These people all assured me that they would of salmon than what they were last 268 bales, Eola, 25% cents; and Wm. comply with the law and provide fish- year. ways in accordance with the "Improved Cail System," but felt that a little time should be allowed them on ac-"immediate Springwater district,"

substantial manner, I feel that their over the entire river and its principal little time be allowed them in consequence thereof

Johnson Creek.

"Near the mouth of Johnson creek, Clackamas county, there are a couple of small low-water dams owned by Mr. R. G. Church, who is very desirous of retaining them there, and that he might be privileged to do so, assured me that he would comply with the law immediately and furnish proper fishways over them.

The Umatilla River.

"Across the Umatilla river, a mile and a half from its mouth, the Holbrook Ditch Company have a dam for the purpose of diverting the water from the river into their ditch for ir- ing by the 12th or 15th of November. rigating purposes. This dam is only He has about 1,500,000 young fry and two and one-half feet high, and is no obstruction to fish ascending or descending the stream during high wa- U. S. F. C. for an additional batch of ter, but, as this stream is high only a two-million eggs that we will get from very small portion of the time, 'the their Clackamas station. This, todam is sufficiently high, being constructed on a flat bed of rock, to be a him a fair batch to care for and to complete stop to fish ascending the river nearly the entire year, and during the extreme dry portion of the year, all the water that the river carthe irrigating ditch, leaving practical- egg-taking season, and up to the presries is taken from the river bed into ly no water to flow down the river bed from this dam to the mouth of the river excepting what little leaks through the dam and through their ditch flume, which is a very trifling amount. From investigations made, I find that, during high water, a sand bar forms at the mouth of this river ported. and that when the waters in the Columbia recede this sand bar completely closes the mouth of the Umatilia, and that, during the dry season, while the water is practically all taken from the river for irrigating purposes, there are months at a time that no water 210 females, from which they took 1.- Receipts for week 3,264 bales from the Umatilia flows into the Co- 029,000 eggs; October 31st was the next Receipts from Sept. 1.....9,696 bales lumbia. The river bed from the dam largest day, 873,000 eggs having been Receipts same time last yr.5,443 bales to the sand bar at the mouth of the river is of a lava or bed rock formation. Above the dam the river is quite a little stream, and is bountifully supplied with trout and other fish, but how are we going to maintain it as a trout and fish stream with the waters all practically taken for irrigating purposes will remain to be seen. The people on the upper waters interested in "fish" are very anxious about the matter and think that fish should be privileged the stream as heretofore. I met Mr. F. B. Holbrook, manager of the Ditch Company, and notified him relative to the law governing such matters, and he assured me that he would comply with it fully and furnish a fishway through the dam admitting fish at all stages of the season.

La Grande Hatchery.

"At La Grande, the La Grande Electric Light and Power Company have a dam across the Grande river for pow- the blood and mucous surfaces of the er purposes. This dam is about fourteen feet high, and I found it to be a complete obstruction, though it is prolow to remain open during certain fier known and is the only positive instages of the water, through which. they contend, that fish can ascend and descend the river. I notified them that it was not a legal affair and that they ing to directions. One bottle will conwould have to provide the dam with vince you of the wonderful curative the "Improved Call System" of fish-properties of this great California disway. Mr. Joseph Palmer, the manager covery. For sale by all druggists. Roof of the Company, assured me that this on Catarrh free. Address Smith Bros. would be done, and that immediate Fresno, Cal.

yards, the Ore Dell Ditch Company have a wing dam extending entirely across the river, made of loose rock and brush, as a lead for their irrigating ditch. It was not more than a foot high, but for all that, was a compiete obstruction and one of those very common irrigating ditch deathtraps to any fish attempting to descend the stream.

"Above the dam of the La Grande Electric Light and Power Company the Grande Ronde Lumber Company have three or four dams in across the Grande Ronde river, for logging and milling purposes. I have notified them relative to the law, and will insist on their complying with it and furnishing good and sufficient fishways for each dam,

Clackamas Hatchery.

"October 11th, I visited our Clackanas River hatchery and found everything in perfect order. Superintendent Spurgeon had very few eggs and young fry, as heretofore reported, but, what few he did have were in a perfect state and were being well cared for, keep up the supply and good effect should be realzed from them four years Spurgeon had in a good set of racks and held them throughout the entire season, and contends that not a salmon got by him; that the salmon practicalally did not get that far up the stream. also that the river generally seemed to have very few salmon in it this season as compared with other seasons, for he examined it very thoroughly for a distance of twenty or thirty miles below the station, and very few salmon were ever to be seen; that every year there are always some salmon that spawn between the station and the lower river, but from appeared to be no more than was gen-

Grande Ronde Hatchery.

"October 21st I visited the Grande Ronde River Hatchery Station and found that Superintendent Allen had been successful in securing 3,000,000 Chinook eggs. The season was practically over for this variety, though he still had more "Chinooks" within his number very materially. At this stanumber of Sockeye eggs, and from the number of Sockeye salmon that he had enclosed, I see no reason why he season as he did last and probably will do better for, present indications seem Bros., Dallas (partnership lot), 38 bales grades at present. Prices for these are to be better this year for this variety at 251/2 cents; Gilbert & Patterson lot

"This is a very promising stream for our work, but for anything permanent I think we should endeavor to get count of their being situated in the away from the moss which this year dependenc last night from S. V. Ramproved very expensive to us, and which sy to the effect that he had purchased which was burned out recently. In is liable at all times to be very serious the Walker Bros. lot, of Independence, consequence, they claimed that it for, if it should come along at any would be almost impossible for them time when there is the least of a and, later still, T. A. Livesley & Co. to get such material from the mills as freshet in the river, it would be im- went them all a shade better and necessary in the construct possible to maintain and hold a set of bought the J. E. Hubbard lot, of intion. Considering it very essential racks across the river. That we might that such fishways be built of good better our condition and get away material, and put in in a strong and from the worst of this moss, I went request might be granted and that a tributaries with Mr. Allen, and from what we found, I think it would be better, for us if we were further up the river or were on a tributary stream of which there are two very good sized ones, and is the necessary rights and privileges can be secured. I think we should endeavor to do this another season.

Salmon River Hatchery.

"At the Salmon River Hatchery we have our new hatchery building up and nearly completed. The building is 40 feet by 100 feet, and should be entirely ample for what work we will endeavor to do there on that stream. Superintendent Brown reports that he should have his troughs all set and everything all feady to move the buildeggs now on hand, and I have arranged with Superintendent Wisner of the gether with what he now has, will give

turn out into the stream. Ontario Hatchery.

"At the Ontario Hatchery Station they are in the midst of their Chinook ent date had succeeded in taking 7 .-756,000 eggs from 1,636 female salmon. Frank Brown, superintendent in charge, figures that he has fully as many more salmon enclosed between racks yet to spawn and will without doubt double the present number re-

steps would be taken towards getting THE MARKET IS CLIMBING

Twenty-Five and Five-Eighths Cents Have Been Paid

ONE THOUSAND THREE HUNDRED NINETY-EIGHT BALES SOLD YESTERDAY, THE BULK prices. OF WHICH WAS BOUGHT FOR ENGLISH BREWERS.

(From Thursday's Daily.)

From the reports of sales which are being brought in daily it is very evident that the hop market has awakened into new life and activity and has begun to advance by slow degrees, having passed the 25 cent mark, toward of George Brookman. the 30 cent notch, with indications that that price will be attained and some venture to predict, before the first of December.

That the English brewers have begun to display interest in the market the city, in some cases paying as high is evidenced by purchases which were made yesterday aggregating 477 bales, by the firm of Faber & Nels, of this has reduced the stock of 1902 hops recity, for all of which 251/4 cents per maining in growers' hands to an unpound were paid, and the hops are for usually low limit for this season of the direct shipment to England. The lots purchased by Messrs. Faber & Nels yesterday were: The C. Schneider lot, of Aurora, 60 bales; the G. S. Cooper lot, 117 bales; J. R. Cooper lot, 155 bales; Geo. Rueff lot 110 bales, and the W. Patton lot, of 35 bales, all of Independence. This news was received from Inde-

pendence last evening, direct from Mr. Kola Nels, and is absolutely reliable, E. C. Kirkpatrick, of Dallas, of the firm of Kirkpatrick & Williams, was in Salem yesterday and in an interview with a Statesman reporter stated that the best lots were nearly all cleaned up in that neighborhood, but that there were a few lots of choice

hops remaining the owners of which

were holding firm for a higher price, and would not sell for 251/2 cents. He said that he had, during the past two days, purchased several lots for two of which he had paid 25% cents The lots purchased by Mr. Kirkpatrick were: The Wilson Bevens lot, 70 bales, Independence, 251/2 cents; Gardner Brown & Co., of this city, bought what was left of the Gilbert & Patterson

hops, 100 bales, at 25 cents. Later reports were received from In consisting of 325 bales, at 251/2 cents dependence, 120 bales, at 25% cents. So far as is known, this is the highest

price yet paid. Some interesting data concerning the hops movements in New York State and abroad were contained in the Otsego (N. Y.) Farmer, of the 29th of October issue, which are reproduced herewith as follows:

NEW YORK HOP NEWS.

COOPERSTOWN, Oct. 31.-The local market is very strong and prices are advancing. Transactions are light, because the growers refuse to sell. Offers of 35 cents have been made by two dealers and refused. About 100 bales. have been bought since our last issue at prices running from 25 to 33 cents, with the ruling price above 30.-Otsego Farmer.

New York Tribune, Oct. 29: Receipts for the week, 5,828 bales; exports, 99 bales. Advancing price in the interior of this state and on the Pacific Coast have made a stronger holding here, and the stock has been moved about as fast as it has come in. Up to 33@34c has been paid for choice New York State hops, with the finest of the Pacific Coast zelling at 29@30c. Other grades range about as quoted. There is not much doing in the yearlings and older growth, but supplies, are light, and they are firmly held. The export demand seems to have ceased, largely because of the higher prices asked on this side of the water. In the interior of this state there has been considerable trading at 30@33c, as to quality, and on the Pacific Coast 25c has been quite a common price. English markets are firm but quiet. We quote: State, 1902, choice, per lb. 23@34c; do fair to prime 29@32e; do 1901, choice, 26@27e; do, "During the last five days of the common to prime, 23@25c; Pacific nonth the number of female salmon Coast, 1902, choice, 29@39c; do, fair to Exports to Europe, week 99 bales Exports from Sept. 1..... 864 bales Exports same time last yr., 964 bales Imports for week 533 bales Imports from Sept. 11,430 bales Imports same time last yr., 368 bales

The frend of the market has been quite bullish again this week, reflecting in large measure the very strong condition prevailing in the interior. As the stock arriving costs high prices, receivers have asked more money, and beginning to boom. have found buyers for the goods about is fast as they were offered. Dealers have secured most of their stock in the interior, but have picked up some lots here, and brewers have shown very fair interest, evidently realizing that it was unsafe not to have some hops on F. J. Cheney & Co., Props., Toledo, O. hands. Some choice State hops were sold on the market at 33c, and the brewers have paid 34c, or even more. There are scarcely any State lots to be had under 29@30c, and, 25c is prac- able to carry out any obligations made leally bottom for Coast stock; the hoicest of the latter sell at 29c, and in West & Trunx, Wholesale Druggists, special cases up to 30c. In the Interior of this state there has been heavy buying during the week, operators have heretofore held back are now tak ing a band; sales reported at 30@23c. number of the choicest growths reaching the latter price. There has Price, 75c per bottle. Sold by all drugiso been free buying on the Pacific ire being current in the favorite local German markets continue

strong. Advices from London do not indicate much change there. Official estimate of the English crop 311,900

Central New York Hops. Morrisville Leader, Oct. 24: Growers still continue to cling to their hops and refuse to part with them at current

Fort Plain Register, Oct. 23: Not a bale of hops has been bought by Fort Plain dealers of the 1902 crop. No contracts have been made or any hops brought to this village on previous contracts. Dealer Abbott says the market s quiet and prices rule from 28 to 301/2 cents. We learn that a dealer visited Sprout Brook yesterday and offered 30 cents to several farmers but failed to get any growers to take it. A Canajoharle dealer has bought the 1902 crop

Malone Gazette, Oct. 24: Simon Uhlmann, of New York, whose purchase of several lots of hops on the local market was noted in our last report, secured about 500 bales before his return to as 32 cents. Local dealers have been free buyers also during the week at prices ranging from 30@32e, and this year, probably not over 1,000 bales now remaining unsold.

English Hop News.

Kentish Observer, Oct. 16: There is no improvement in the trade; indeed, except for choice samples, values are, if anything, rather easier. Very few growers are on the market, it being well known that merchants do not intend to open business yet. Quotations to growers remain the same as last week, but are merely nominal.

Messrs. Wild. Neame & Co., hop factors, 33 Borough High street, London, S. E., report: There is little to report since last week. Bright hops of good quality meet with purchasers at recent quotations, other grades are somewhat difficult to place except on rather easier terms.

Messrs. Manger & Henley, 59 Borough, London, S. E., report: The demand for Bramblings and Goldings is per pound, and for another 25% cents, the principal feature of our market. and some good business has been done in this class during the past week. A moderate inquiry continues for copper inclined to favor buyers where sales are

TIRE WORKS COMBINE

MORGAN & WRIGHT, HARTFORD AND INDIANAPOLIS COMPAN-TES HAVE MERGED.

NEW YORK, Nov. 4 .- An informal combination of the Hartford Rubber Works, the Indianapolis Rubber Works Company and the Morgan & Wright Company, is reported to have been effected, according to a Time dispatch from Hartford, Conn. Lewis D. Parker, president of the Hartford Rubber Company, of this city, has been, it is stated, elected president of the Indianapolis concern, and of the

Morgan & Wright Company. The three corporations will retain their individuality, but will be operated it is understood, on a community of Interest basis, under President Parker's

supervision.

ROOSEVELT'S FIRST OFFICE

"There is the man who nominated Theodore Roosevelt for the first office he ever held," said a gentleman at the Lotus Club in New York the other night, according to the Washington Star. And then the brought over to the table the man referred to, William Leary, and introduced him to the visitors. "Billy" Leary is one of the best known newspaper men and politicians in New York.

"I remember the occasion very well," continued the speaker. "Billy was a district leader, and it came time to nominate an assemblyman from his district. The party managers got their heads together and picked out Theodore Roosevelt, a young fellow who had been doing some good work in the district in an unostentatious way.

"'Roosevelt is the man for assemblyman,' was the unanimous decision, and they told Billy to nominate him in the convention. That was the beginning of. the office-holding career of Mr. Roosevelt, which has culminated in his holding the highest office in the gift of the people."
