COURT DISSOLVES INJUNCTION.

Governor Mead Would Stop Big Buy of Port Townsend Bonds.

OLYMPIA, Wash., April 17.—Judge Linn in the superior court this morning dissolved the injunction granted at the suit of H. D. Crawford of Aberdeen, to restrain the state land board from buying \$250,000 water works bonds, issued by the city of Port Townsend. No opposition to such action was made by Crawford's attorneys. Promptly following the dismissal, a new action was commenced in the name of the state by Governor Mead against the state land board, and a temporary restraining order was issued restraining the board from purchasing the bonds.

Governor Mead alleges in his complaint that the water works, for which it is proposed to pay the \$250,000, and which will be sold to the city of Port Townsend, cost the contractor less than \$13,000 and that the bonds are not such as the state laws provide may be bought by this state.

Lieutenant Governor Coon is mayor of Port Townsend and is making strong efforts to sell the bonds to the state.

Fell to His Death

George Gettle, an aged German, recently fell into a spring and was drowned at La Grande, Or., before assistance reached him.

BLOCK SYSTEM

SCHEME OF NUMBERING HOUSES ON COUNTY ROADS PRESENTED TO JUDGE SCOTT.

Plan Is Invention of A. L. Bancroft of Los Angeles, Who Wants Marion County to Adopt It—Not Known Whether It Will Be Adopted Here.

A. L. Bancroft of Los Angeles, Cal., has sent a communication to County Judge J. H. Scott in an effort to induce the judge and county commissioners to take up the matter of county road blocking, according to a system originated by Mr. Bancroft. As explained by his letter, road blocking consists in carefully measuring and dividing each mile of road length into equal parts or uniform imaginary blocks, ten to a mile, the blocks having only road frontage. The center of the system is the county seat, and the roads of the entire county are included in the one system. The blocking commences at the county seat on all roads touching it; or, where they do not touch it, at the end nearest to it and naturally works outward from it. A record is made of the position in the block, in feet, of each connecting and crossing road, stream, bridge, culvert, house and farm entrance and other object of interest. The block frontages are numbered consecutively, the odd numbers always being on the left and the even ones on the right, as the course of the road is faced.

and pleasant to use. There are two road frontages and two numbers to each block; ten blocks, twenty block frontages and twenty numbers to each mile. The blocks being uniform in length, which city blocks are far from being, from the frontage numbers exact distances throughout the county in all directions can be easily calculated. Divide the even frontage number of the block, the one that completes it, by two and the number of blocks of one-tenth of a mile each is shown; divide again by ten by pointing off one decimal and the number of miles and tenths from the commencement of the

PAINLESS EXTRACTION ABSOLUTELY FREE

In order to convince those who have not tried my painless methods I will, on Friday, April 21, and that day only, extract teeth by my painless method. It doesn't matter whether you have one or thirty to extract, I will do it absolutely painless and free of cost. Reason, simply to prove my statements. When you see an assertion over my name you can depend on it. This is no exception. Come on that day and be convinced.

Dr. B. E. Wright

The Painless Dentist
Stensloff Building, Court St., Phone Main 2591. Hours—8 a. m. to 5 p. m., 7 p. m. to 8 p. m. Sundays, 10 a. m. to 12 m.

road to the completion of the block indicated by the number is given. There is no shorter or easier mathematical calculation than dividing an even number by two and that is all there is to it. The length of a block, expressed in different ways, and all without fractions, is 528 feet, 176 yards, 32 rods and 8 chains; also one-tenth of a mile.

The block frontage numbers form the bases for the numbering of country house entrances and the definitely locating of all objects upon the public roads. Each house bears the number of its block. Where there are more than one entrances in the same block all have the same number and each but the first is followed by a distinguishing letter; 1905, 1905a, 1905b, etc., and as already explained, divide the even number of the block; the one completing it, in this case 1906, across the way from 1905, by 2 gives 953 blocks and a decimal, 95.3 miles.

The marks along the roads themselves to show the position of things with relation to other things throughout the country are the block numbers put upon the guide boards at the intersections and junctions of the roads; on block stones set at the mile and half mile points, or as may be decided, at house, farm and other entrances, on bridges, culverts, water tanks, water troughs and other public and prominent places.

The road blocking system has been adopted by several counties in Southern California and is said to be a great convenience and giving good satisfaction. Judge Scott has not had time to give the matter any thought, and whether or not the plan would be feasible in this county he was unable to say.

THE MARKETS.

A Mighty Good Wagon

Wherever you go, east or west, north or south, you see Studebaker village wagons. Take a look at that. It's a three-spring, 1 1/2-inch axle, Sarven patent wheel. The gear and wheels have proven their durability in many a hard haul, for these wagons are used as farm hacks, passenger wagons, delivery wagons and most anywhere where you can imagine. Two seats, pole or shafts, brake or top if desired, red or yellow gear. Come and see.

TOP BUGGIES, RUNABOUTS, SURRIES, ROADWAGONS, DELIVERS

And in fact, everything you may need in the line of "rigs that run." If it has "wheels" we have it. Our cushion-tired runabouts at \$87.50, \$95, \$100, \$110, \$125, \$140, and \$190, are the talk of the town. If you're ready to buy, or if you're looking, we want you to see. Our spring trade on implements has been all that could be desired. Reason is, we have the articles that have proven themselves. Here's an item or two:

Our Swivel Beam, Swivel Handle, Vinyard Plow
Has suited more people than any other one plow in Salem for the apraxor can get right up against the tree or vine and not "catch and tear." See it and you'll appreciate it.

Our Guard Rail Harrows
Do the same thing for the harrow man. He can harrow orchards, hops, vineyards, or stumpy fields and not "hang up" every time he gets near a shrub. It has relief spring too, and thus saves teeth. Come and see.

Our Moline Reversible Disc Harrow
Has the implement trade all on edge. No disc harrow has ever had such a phenomenal sale in so short a time. So convenient, so light, so satisfactory, so durable. Come and see it.

Petaluma Incubators
Have an international fame for "getting chicks." Our sales have surpassed our most sanguine expectations. Now's the time to get the incubator at work to reap the profit. Send for catalogue, or come and see the incubator.

And Lastly Our Sharples Tubular Cream Separator
Wherever separators are known, there you'll find the Sharples, and a live number it is. "As good as" sort can compare. Send for catalogue or call in person. Show you the low hung supply case.

TO FIGHT PLAGUE

FOUR HUNDRED PHYSICIANS ATTEND TUBERCULOSIS CONGRESS AT ATLANTA.

Meet to Discuss Methods for Prevention and Cure of Consumption, the Dread Disease That Is so Prevalent in This and Other Countries.

ATLANTA, Ga., April 17.—The American Anti-Tuberculosis Congress assembled today with an attendance of about 400 physicians from nearly every part of the United States east of the Rocky mountains, and several prominent representatives from European centers. Addresses of welcome were made by Governor Terrell, Clark Howell, editor of The Constitution, and others. Dr. George B. Brown, of Atlanta, president of the American Anti-Tuberculosis League, in an address opening the proceedings said: "The mission that brings us here will carry with it the good wishes of the world and the prayers of many, for of all the afflicted on God's great foot-stool, who are more to be pitied and prayed for than those who would benefit."

accident in which a steamer is burned and a thousand lives are lost, our sympathies go out to the fate of miners lost by the scare in the gloomy depths of mines, and we read of railroad wrecks with a shudder of horror, but we see these doomed victims driven off one by one and we do not realize the number of them that pass to the Great Beyond from this destroyer.

All honor then to those who are here today to try to check this stream of death, which, when the cold statistics are received, chills one with horror. God grant that they may bring hope to the hearts of many a poor sufferer and brighten many a desolate household."

HARRY DUNN COMMITTED.
Harry Dunn, who has occupied a cell in the city jail during the past few days, was adjudged insane and committed to the asylum by County Judge Scott yesterday morning. The examination was made by Dr. F. E. Smith and the order of commitment was made upon his affidavit.
Harry Dunn was born in Ireland and is 68 years of age. He has been a familiar figure in and around Salem for many years, and has always been very prominent in police circles. He is possessed of an uncontrollable appetite for liquor, the excessive use of which has probably landed him in the city jail a greater number of times than any other individual known to Salem police history. His present mental infirmity is also said to be due to the long continued use of strong intoxicants.
Harry has had various delusions of late, and at times has been inclined to be very destructive. He has also shown some suicidal tendencies. He was delivered to the asylum authorities yesterday afternoon by Deputy Sheriff H. P. Mintz.
