Minneapolis--Its Rapid Growth and Immense Water Works.

THE SCANDINAVIANS AROUSED.

The Norsemen Turning Prohibis--Minnesotians Joining the Movement.

This is a large city, it contains 200,000 people. They boast that it has doubled in population more often than any other city in the world; for some time every three years; and even now they predict it will double again in five years. It obtained its start from the magnificent water power of St. Anthony Falls, on the Mississippi. The power utilized for immense flouring mills and many of them, and also for other industries. The largest Pillsbury mill turns out 10,000 barrels of flour a day, and others from 7,000 down. The soft rock of the river bed began to wear away, so that the channel was rapidly deepened to a point so low as to threaten its utility. So the government tunneled the bed, and

BUILT IN SOLID MASONRY.

Wings are also built across, so as to raise the water for the mills on the higher ground. The falls are very handsome, but the water is much discolored by rains, and this detracts from its beauty. The water power drives immense pumps on both sides of the river, and supplies the city with hydrant water. But the supply is taken from a point too near the city to be wholesome. Last winter 80,000 cases of cholera were reported, in more or less virulent form, and this was largely attributed to the drinking water. Many houses have cisterns for rain water, or they have wells.

Yonder is a wagon full of demijohns and stone bottles for delivery to family residences. But they are not filled with the liquor that inebriates, their contents is water from Inglewood spring. Restaurants advertise "Inglewood spring water used here." And for \$2.50 per month you can get a filter and have it supplied with the same water. If you are a stranger, and prefer a drink of it, you can purchase a glass for a cent.

THE SEASON IS BACKWARD.

It rains incessantly, as in Oregon in winter; the streets are muddy, and they don't scrape the crossings. I have many a time wished I could see Mr. Churchill making a crossing passable. The shade trees are slowly leaving out; not a lilac or snowball in bloom. Gaudy tulips are almost the only open air flowers to be seen, except where pansies, geraniums, fuchsias, heliotropes, etc., have been set out from green houses. The florists' windows are radiant with plants from the same source. Men are peddling them by the wagon load, and many a woman may be seen going home with pot plants in bud and bloom.

BUILDING IS QUITE ACTIVE, but much more would be done were it not for the rain, which interferes with foundation digging. They do not put buildings on the surface of the ground, as with us. The first thing is to excavate for a cellar or basement, and put in a solid stone foundation. In the basement they place a furnace to heat the whole building, to supply which with fuel runs up a big bill. One man told me that from October till May--the snow months--his fuel bill was over \$100, and his house is but of moderate size. Last winter, in this city, the mercury fell to 46 below. Prominent members of the Christian church have expressed a cordial desire that I would take charge of a church here, since there is need of a second one. But my courage is hardly equal to face

SUCH ARCTIC WEATHER.

My wife would commence proceedings for divorce if I should propose such a change. Only for that drawback I should like this city, as there is a great deal of life, business and stir among the church people here. In prohibition party work their energy is simply astonishing, and greatly encouraging, (except to republicans), who are not hearty in their praise.

At 5 p. m. to-day, spoke to a large hall full of people, for the eighth ward club, largely officered, as it happened, by members of our own church. They had the Fisk glee club, who sang stirring campaign songs. Ten such clubs held meetings this same afternoon, with chaplains to open them, and preachers speaking at many of them. Another club has been started this week.

At 5 o'clock spoke in Freya hall, to a Swedish club, 400 persons present. These Scandinavians are coming over to the party rapidly. One of their preachers preceded me in Swedish. He has organized three prohibition clubs among his own people.

Preached temperance sermons at the Christian church in St. Paul in the morning, and here at night. Both parties are prohibis. The pastor in this city addressed a prohibis club in the afternoon. The Northwestern Prohibitionist, with a big circulation, is published in Minneapolis. Remembering that young Mr. Ladue was here attending the State University, I dropped him a card, requesting an interview. He came to my afternoon meeting, and we had a very pleasant handshake. He looks well and hearty, likes his school and studies well. He has every appearance of a steady, industrious, bright young fellow, and from present appearance of moustache, etc., bids fair to return to Oregon a "bearded" man. He desired to be remembered to all friends. Did I tell of meeting Miss Rosa Frost, of Aumville? She is very advantageously situated with Mr. and Mrs. Underwood, her uncle and aunt.

THIS TWIN MARVEL OF THE NORTHWEST

has long, crowded business streets, with five, six and seven story buildings of mammoth proportions; cable, steam, motor, and horse cars; two fine, large railway depots; and expensive private residences by the thousand. But I must stop to mail this on the cars.

Disturbed the Army.

The Salvation Army consisting of two women and a bass drum, quartered within the walls of this city, has been disturbed again. This time it was Dave Shepard who caused the Army to be in an unsettled state. Shepard, it seems, attends the Salvation Army meetings, in the same spirit another would attend a circus--and in fact a greater number of their attendants do the same. On Wednesday night, it is said, he insisted on not only shaking hands with the female members of the Army, but he also wanted to hold the hand long enough to give it two or three affectionate squeezes. Objection being made to so public a demonstration of his feelings, Shepard is reported to have "cursed loud and long." He was arrested Saturday, and that day being a non-judicial day, he was placed under bonds in the sum of \$50, until to-morrow, when he will be arraigned in Justice O'Donald's court.

Improve the Walks, Etc.

In a great many places about the city, the sidewalks are in very bad condition, and should be repaired at once. In some places great holes are in the walks, which are liable to cost the city a damage suit at any time, unless repaired. The shade trees in many places hang too low, also, over the walks, and should be trimmed. There are lots of other improvements necessary. Notwithstanding instructions from the council for their removal, those "highly ornamental" tanks at Willson's avenue still remain there as "embellishments" to that piece of public property, along with the beautiful fence that needs painting so badly. There are several other things that could be done to greatly beautify and improve the city. A good work is being done on the streets by Supervisor Thompson, and the good work of improvement should be extended to the walks, etc.

Read From "Ben Hur."

At the Congregational Church last evening Rev. T. E. Clapp departed from his wonted custom, and instead of delivering his usual evening sermon, read that chapter from General Lew Wallace's famous "Ben Hur," relating to the crucifixion of Christ. It proved very entertaining to the audience.---Portland News.
