LANDS AND HOMES.

Marion county is situated in the heart of the magnificent Willamette valley, the central gem in the cluster of rich counties that form the princely domain.

It is in its agricultural resources, in its cultivated and uncultivated lands, in its water powers, and minerals; rich in its colleges and schools of learning, and with a climate unsurpassed for its salubrity.

Much has been written of this western country that requires no stretch of the imagination to comprehend, and numerous complaints are heard from the class who have been misled by them.

Marion county is bounded on the north by the Willamette river and Butte creek which separates it from Clatsop county.

PHYSICAL FORMATION. The county contains, including valley, prairie and mountain lands about 10,000 acres.

There are two main divisions, the mountain and the valley. The latter extends from the Willamette river to the foot of the Cascade mountains, a distance of about 100 miles.

The mountainous portion contains some thirteen townships of mostly surveyed land; lying in a strip twelve miles north and south.

A decided advantage Marion county has over many others is the diversified farming interest that can be carried on throughout the entire year.

FACILITIES FOR MARKET. The Willamette river, with two lines of railroad running the entire length of the county from north to south.

GENERAL. All things considered, the Willamette valley has the best country in the world, and Marion county is about centrally located therein.

The sales of diamonds in New York are estimated to be up \$50,000,000 a year.

Blacks with yellow hair and white eyes inherit the eyes, nose and blue should be chosen, even if they are not so becoming.

To extract ink from wood, scour with sand and water and ammonia. Then rinse with strong alkaline water.

Highest cash price paid for wool in the Opers House block.

Prof. H. Diamond, Teacher of Music. And dealer in all kinds of Musical Instruments.
