JEFFERSON FEED AND LIVERY STABLE

W. M. Bilyeu, Prop. Jefferson, Oregon.

W. M. BILYEU, Prop.

First class single and double rooms for attached at reasonable rates. Transient stock carefully provided for.

AKOSMISM

As one who to some long locked chamber goes, And listens there to what the dead have said, So are there moments when my thoughts are led To those dull chronicles whose pages close Epochs and ages in the same repose.

OUR DUMB ANIMALS

Sidney, Ill., is all agog over a three legged colt. Miss Mollie Lockhart, of Socorro, N. M., has a parrot that sits on its perch and sings "Mollie Darling" all day long.

A Marietta, Ga., cat was recently put in a bag and carried in a buggy seven miles from home, and then turned loose in the woods. It returned at once to the house from which it had been taken.

At Union, S. C., a Texas pony walked into a store, went behind the counter, walked up to a mirror and admired his reflection therein, glanced contemptuously over the stock and departed without doing any damage or making any purchase.

Scranton hens thrive on strychnine. A druggist of that city placed a quantity of poison in meat, which he scattered near the chicken house as a bait for rats.

Mammoth Found in Siberia. The existence of ivory in Siberia in a subfossil condition, but still sufficiently durable to be used for all the purposes to which recent ivory is applied, has been known since the Middle Ages.

The very name given to the gigantic creature which produced the mammoth was introduced by the Arab traders who initiated the traffic in fossil ivory in the Tenth century. It was not, however, until the middle of the Eighteenth century that the trade became considerable.

These buried hoards of elephants around throughout the frozen soil of Siberia, but they are more numerous the further we advance northward and most plentiful of all on the islands above named and in those termed New Siberia. More remarkable still are the mammoth mummies—several of which have been discovered whole carcasses not infrequently standing upright in the frozen soil with their heads as fresh as if just taken out of an Esquimaux cache or a Yakout subterranean meat safe.

Hints for Those Who Travel. The journey being over and the first resting place reached, comes the unpacking. Now it will be seen if trunks have been used in filling the trunks and all possible contents packed.

Milk for the Babies. The reason why human milk agrees so much better than other milk, with infants is because it is so much diluted and the cheesy substance more soluble, and it is on this account that cow's milk succeeds so well, for all ordinary feeding cow's milk answers very well, provided that care be taken to have it as nearly like human milk as possible.

He Can't Go Home Till It's Dry. When you see a small boy standing in the sun, headless, do you wonder why he's there? The sign he's holding means he's been there.
