Home Again.

Rev. Dr. and Mrs. Gray are home from California and preparing for the opening of the Oregon Institute for the Blind, which will take place some time next month. They report a very pleasant and profitable time at the Teachers' National Convention in San Francisco. They greatly enjoyed many drives with their former townsman, when living at The Dalles, Judge W. Lair Hill, who showed them all the good points of their former and his present home, Oakland. The Doctor and wife were also fortunate in being of the party that Messrs. Bancroft & Co., the well-known publishers, took to the Cliff House, Golden Gate Park, Nob Hill and other prominent places. They corroborate the universal testimony that Prof. McElroy, State Supt., was indefatigable in his efforts to spread the just praises of Oregon. They return rested, refreshed and ready for the duties of their responsible positions in their important work.

Without solicitation the JOURNAL feels like adding that any person knowing of any one in the state deprived of sight would do well to let Dr. Gray know the address.

Surprise Party.

A pleasant surprise party was given last evening in honor of Misses Mary and Alice Steiner. The party was a complete surprise, the young ladies finding the house in possession of the guests upon their return from the band concert. Following is a list of those present: Misses Mary Steiner, Alice Steiner, Mary Matthews, Ida Dinsmore, Minnie Thatcher, Laura Starr, Emma Starr, Mary Stuart, Jessie Southwick, Ida Burley, Nellie Southwick, Ella Burley and Cora Blosser; Messrs. Harry Singleton, Jos. Baumgartner and Gaylord Cooke. A delightful evening was spent by all present with games and music. Ice cream was served and the guests departed at a late hour.

Prefers Oregon to All.

After leaving Oregon last fall, Prof. M. V. Rork, a Michigan educator from Lansing, took charge of the public school at Missoula, Montana. He made somewhat of a tour of that territory, of the towns on the Sound, and of California. But, all things considered, he prefers Oregon for a permanent home. He has decided to send for his wife, and become a Webfoot.

Another Incorporation.

Messrs. G. A. Waggon, W. M. Rick and B. T. George, have filed articles of incorporation for a company having for its object the acquisition and sale of coal, iron and other minerals and wood lands and the products thereof; also for the building of roads, etc. The capital stock is \$100,000 in shares of \$100 each. The office is at Corvallis.

Coming to the Coast.

The Examiner, the San Francisco paper that naturally has no special love for Los Angeles, admits that 80,000 people are booked for the latter city this winter. This is mentioned to show that the tide of immigration to the Pacific Coast is not exhausted. Oregon will surely receive its share.

Spying out the Land.

The real estate men report a great many letters of enquiry, and are showing many people from abroad the properties for sale around here. There can be no question that as the season advances and eastern people move West, many home buyers and investors will find their way to Salem.

For Sale.

A PROHIBITION TALK.

The Prohis Raise a Flag, and are Warming Up for the Campaign.

The prohibition orator, M. V. Rork had a trying time last evening in delivering his open air speech. The flag was raised according to program, with the names of Fisk and Brooks inscribed; but the band started out shortly after the orator began speaking, and a portion of his audience showed a preference for music before eloquence. Quite a little crowd stood by the speaker, however, and he was encouraged to go on.

He took up the tariff question, of course; no man can discuss politics in this campaign without going deep into home and imported products. Tariff talk he described as political jugglery. No party can be absolutely free trade and none dare be altogether protective. The democrats in St. Louis stole their campaign thunder from the republicans, and the latter retorted with the accusation of free trade. The simple fact is, he said, there is no difference between the old parties, and no man can tell which doctrine he should hold to be a consistent member of either.

Salem does not tax the man who has a wagon, nor the man who has a buggy to build. Your school property and public buildings also go untaxed. It spreads its tax pro rata. So let the nation do away with indirect taxation, which robs in the dark, as the Turkish tax-farmer pursues his depredations in the night, and do away with the gatherers of customs and custom-houses. Then, if foreign goods come to our shores which we can't compete with, or such as we do not want, forbid their landing. If foreign laborers come here—English, Italian, or Chinese—paying no tariff duty and bringing down wages, tell them to keep on their own side of the pond. We want no more protection for capital and free trade for labor. But as this is purely a social and economic question, it would be well to get it out of the hands of politicians, and save ourselves this quadrennial turmoil.

The speaker dwelt on that jute factory in California, owned by a white man with a Chinese partner. Under the plea of protecting home industry, a tax of two cents is laid on every sack the farmer uses for his grain, which costs the country half a million dollars a year. Mr. Rork had visited that flourishing factory and found the hands employed were Chinese and newly imported Scotch girls. He regarded this as a strange way of protecting home industry.

The grand jury of San Francisco city and county in their report last week said we used to ask what shall we do with our boys? The question is now changed to what are our boys going to do with us? That city is under the control of the criminal classes—drunkards, thieves, prostitutes, and gamblers. This disturbing element is thoroughly organized to resist the law officers and there is a carnival of misrule. He saw no hope for a change so long as the citizens continue to vote as democrats and republicans, instead of combining against the thugs by electing officers of known integrity and fearless in the performance of duty. This, he said is true of every large city, it is good prohibition doctrine and it is bound to win.

The speaker was several times applauded during his speech and also at the close.

The Great Land Enterprise.

Energetic measures are being adopted by the Mexican Land and Development Co., for the carrying out of the great enterprise to which we alluded in a recent issue in connection with the Grant of Land it has acquired in the state of Tamaulipas, Mexico. The hardest of the surveying is already done, and it is estimated that in a year, 4,800,000 acres can be surveyed, of which the Company will take 1,600,000 acres. The land has navigable rivers, and harbors, and coal, and dense forests of fine timber, and petroleum, and precious metals, and other minerals; but suppose it had nothing at all except the bare land, and suppose that it does not bring more than the \$1.25 per acre, you might figure what the profit will be on some million acres. We know what land is. We can see it. It is always where we can examine it. The most successful companies for some years have been organized on land. The whole world knows what a boom there was in Southern California last year, and the many fortunes that were made. None of these begin to compare with this enterprise in magnitude, nor in its possibilities. It comprises not alone millions of acres of land but the opening for many industries.

See the Company's advertisement elsewhere.

Presbyterian Church.

There will be no preaching services at the Presbyterian church next Sabbath nor thereafter during the month of August. The Sabbath School will be held at the usual hour (12 m.) and the Young People's Society of Christian Endeavor will hold services each Sabbath at 6:30 p. m. The pastor, H. A. Newell and his family expect to be absent from the city. The audience room will be thoroughly refitted and decorated during the month.

Rupture Cured.

No charges for examination or consultation, and a cure guaranteed in every case undertaken or money refunded. Of the many cases treated by Dr. Porterfield during the past year in Red Bluff and Redding, not one but will recommend his treatment highly. Don't neglect this opportunity. The sooner a rupture is treated the easier it is cured. Dr. Porterfield will be at the Monroe House, room 9, until Aug. 7th.

Mr. D. I. Wilcoxson, of Horse Cave, Ky., adds a like testimony, saying: "He positively believes he would have died, had it not been for Electric Bitters."

Like the Light Weights

Of the profession pugilistic, the kidneys are small but active in a state of health. Their secretion contains impurities productive of rheumatism, gout and dropsy, if allowed to remain. When they are inactive, the blood becomes choked with animal debris capable of destroying life. To promote their activity when sluggish with Hostetter's Stomach Bitters, is not only to guard against the diseases mentioned, but to prevent the fatty degeneration and ultimate destruction of the organs by those exceedingly dangerous maladies—Bright's disease and diabetes. Activity of the bladder also insures it against the formation of gravel, which it sometimes requires one of the most dangerous and painful operations in surgery to remove. Gravel, moreover, is a most agonizing complaint. The Bitters further command themselves by remedying constipation, dyspepsia, debility, liver complaint and nervousness, and nullify influences productive of malarial disease.

Mr. T. S. Darby, of Stayton, brought in his little girl to Dr. Shelton this morning. Two years ago she struck her knee against a bed-post, and the limb has given much trouble since, and is now considerably shortened. The Dr. hopes to restore it to its normal proportions, by proper treatment.
