Republican National Ticket

For President, BENJAMIN HARRISON, Of Indiana. For Vice President: LEVI P. MORTON, Of New York.

FOR PRESIDENTIAL ELECTORS. Robert McLean, of Klanuath County. Wm. Kapus, of Multnomah County. C. W. Fulton, of Clausop County.

SATURDAY, SEPT. 29, 1888.

has found a method of exterminating the yellow fever germ. It is to sprinkle caustic soda and gasoline throughout the entire city. Said he to-day: "Gasoline has the peculiar property, besides reducing the temperature and thus killing the microbes, of displacing the water in all organic matter, eausing it to perish; but as gasoline is not easily absorbed by wet ground and would fail in a measure to do its work. I have discovered that a caustle soda will answer the purpose in these instances. The microbes being orgaule, must contain fatty acid; so in a wet place I would liberally sprinkle caustle soda, which could be done at a very small cost with the aid of a street sprinkler. Hills and dry places could be protected with gasoline."

STEAM IMPROVEMENTS.

A steam tracklayer has been tested on the Northern Pacific R. R. near Tacoma and the results are very satisfactory. Twelve men operating it, and doing the work of seventy-five men by the ordinary system. Two and a half miles of which tells of a printer who, when completed track was laid. It han-fellow workmen went out to drink dles the ralls and ties. These are beer during the working hours, put the first rails ever laid by steam in in the saving bank the exact amount the world. The machine worked he would have spent if he had to perfection from the time it commenced until it finished, and about

300 people witnessed the trial. The machine can be used on any ordinary flat car, and all the matertal is moved on rollers from the rear to the front, propelled by a smallmotor, and all the steel is placed by the same power. The rails were put T. A. Union. The membership has in place on the most difficult portion of the line. All ties were mountain grade ties, and there was also a steep grade to centend with, and the steel was larger and heavier than is generally used. There was no difficulty experienced in operating the machine, and the strength and accuracy of the work surprised all present.

WHEAT.

The rise in the price of wheat at leago to one dollar per bushel, is, rding to a local paper, an event ational importance, and is par-'arly a matter on which the

EVENING CAPITAL JOURNAL September being 674 to 714 and the average 671 cents.

Call the advance 30 cents and the increase in the wheat crap of the country is over \$124,000,000, an enermous addition to the wealth of the United States. The merchants and bankers, it is said, are watching the grain market with unusal interest. It is contended that the board's price list will make all the difference in the world to their trade and financial operations for the next twelve months, and that a permanent price of \$1 or more will affect every man, woman and child in the west, directly or indirectly.

DOES FARMING PAY HERE?

Frequently we are asked this question, and find it is capable of two answers. If a man desires to make money in the sense that a merchant, manufacturer or banker makes it and retire to live on his "surplus," it might be said it does not pay. In treating the question the Pacific Farmer says :

"If a man want simply a living, with continuous labor, little by little increasing the value of his farm, and contented when old age overtakes him at a time he is no longer able for hard labor, to have simply a competency, and the quiet and peace of a usefully spent life, then farming pays. A farmer has a hard fight of it with the monopolies and other business and governmental agencies business and governmental agencies preying upon him at every turn. And it is only by intelligence, pru-dence, caution and great industry that actual farming pays now any profit over and above the merest

daily wages.
"His land is all the time advancing in value with the increase in population, and often he can so sell out his land as to raise a handsome stake in cash. But this last item is SATURDAY, SEPT. 29, 1888.

VELLOW FEVER QUELCHED.

Edison, the inventor, according to the New York News, thinks he

stake in cash. But this last item is land speculation, not farming. Vast numbers of Western men have made money in this way. Buying land at \$5 per acre, and holding it until it is worth \$50, does not prove that farming pays, or the man who does it is a good farmer. Farming has never large and a generally profitable. never been an especially profitable business, and is less inviting to day than ever. There are other reasons than simple gain that lead men to follow farming, which are well known and need not be discussed

> WE wonder whether there is such a thing as a whisky trust with a powerful lobby. There was most as Mr. Cleveland fails to allude to passed out of existence. Perhaps the law passed not long ago, which practically permits the whisky men to pay their taxes when they please, was a spontaneous production of congress and not the result of the log-rolling of a powerful interest. Perhaps the plethoric democratic campaign fund knows nothing of dollars contributed by the whisky ring. Perhaps when Mr. Watterson was denounced by a brother democratic editor of Kentneky as a hireling of the whisky ring an injustice was done him. Perhaps.-S. F. Chronicle.

A practical temperance sermon fis preached by a New Orleans paper gone out to drink. He thus kept his resolution for five years. He then examined his bank account and found that he had on deposit \$521.85. In five years he had not lost a day from ill-health.

The chief work of temperance reform to-day is being done by the C. increased from 31,890 in 1881 to 53,-755 in 1888. Most of the other organizations for the promotion of temperance by moral suasion have been crippled by the prohibition move-ment, but the Catholic Union finds its work can be done more effective-ly outside of politics-Milwaukee

A prominent citizen of Indianapolis, who has know General Harrison "intimately for 30 years," writes: "Both General Harrison and his wife are total abstainers,"

A Woman's Despate. "Death would be preferable to this awful, dragging down sensation and aching back," desparingly complained a suffering mother. "And the worst may congragulate itself, rice is a sort of dead-line in the , as it has been declared over a gain by men in Chicago ordinions common the sufferer complained. "I suffered for years just as you do, and, found no police to the sufferer complained." opinions command respect, day of dollar wheat was of dollar wheat was of dollar wheat was of the command of the cure of the command respect, and the wealth of India would not leduce me to be without the remedy er, and each deposited for it a like affliction should return." if a like affliction should return." "Favorite Prescription" is the only medicine for women, sold by druggists, under a positive guarantee from the manufacturers, that it will not a although it has sold

OCCIDENTAL JOTTINGS.

News and Notes Of a General In terest to the Westerner.

Over 2,000,000 eggs are now in the hatchery troughs at the state fish hatchery.
