

THE LEGISLATURE.

Re-assembling for the Most Important Week.

LOTS OF BILLS TO GO THROUGH.

There Will be a Number of New Laws Added to our Statutes.

At two o'clock this evening the legislature started on their last week in this the fifteenth biennial session, it has been decided to close on Saturday and until then the daily sessions will be filled with a hurry of bills, etc. There are many questions upon which we need immediate legislation but it seems they are to suffer defeat. The Salem correspondent of the Albany Democrat sums it up in these few words. "The end of the session is very near and it can already be seen that the product of the forty days' work will be the enactment of but very few desirable laws. The greater questions will go over until another term, while the legion of minor appropriation bills and local measures will be disposed of. It is a pity the fisheries, assessment and some few of the other important questions could not be settled."

The Oregonian speaking of Senator Tongue's opposition to wagon road bills on the ground of their unconstitutionality and his support of a like bill for Washington and Clatsop counties, and seeing no objection concludes "when we get some of the flesh ourselves, men and brethren none of us are likely to inquire into the stealing of the hog." This would be better said, where it is well were it just. One wagon road bill may be in violation of the constitution, whereas another may be in strict accord therewith as our Supreme Court has clearly explained. The constitution forbids special and local road laws. The words have a purely technical meaning.

It is estimated that about one hundred of the bills proposed in the legislature may finally pass both houses. Each house must get through its own business before the three last days of the session, for those days must be occupied by bills from the other house.

Who Stanley Is.

Henry M. Stanley's real name is John Houlonds. He was born in Wales near the little town of Deuagh, and his parents were so poor that he was sent at the age of 3 to the poor house of St. Asaph. When he was 13 he was turned loose to take care of himself. He shipped from Liverpool as a cabin boy when he was 14 and reached New Orleans.

He was then adopted by a merchant named Stanley, who gave him his name. Young Stanley fought for a year in the confederate army. He was now, if alive, 41 years of age. — Ex.

There is profit in fruit raising. Speaking on this basis W. T. S. Patton said that from an acre and a half of apple trees he had, this year, netted a profit of \$400, which is equivalent to 10 per cent. interest on the price of his entire ranch—100 acres, \$4,000. Mr. P. bought his place one year ago and has realized more from its products than he expected, from fruit alone.—Ashland paper.

The celebrated sleeping girl of Troy, Tenn., died last week. She has slept since she was ten years of age till she was thirty-two years old, waking at intervals of a minute or two and occasionally for an hour or a little longer, sometimes daily, sometimes not for several days. Thousands have visited her. At one time Barnum offered her parents ten thousand dollars per year to take her and her parents with his show, he to pay all expenses, but they refused. When she died thousands attended the funeral. Her body began to decompose almost instantly, turning black.

He Didn't Mean It.

An Iowa farmer lately sent the following order to a merchant for goods, so says an exchange. They have business farmers back there: "Send me a sack of flour, five pounds of coffee and one pound of tea. My wife had a baby last night, and also one keg of nails, a screw driver and a spool of barb-wire. It weighed ten pounds, and a ton of soft coal."

An entrance fee of only twenty-five cents will be charged and the hall is ample for the accommodation of all who wish to attend. The ladies are working in a noble cause and need your kind words and recognition as much or more than your money; therefore let all come and have one nice social evening. Fathers, mothers, brothers, sisters, all are invited to come and see what a nice treat may be had for only twenty-five cents.

Paper Clothing.

The latest novelty in the way of garments is paper clothing—that is, clothing made of paper. The process was discovered not much, if any, over a year ago, and is controlled by a company in Michigan which manufactures the goods. Only recently has any of the clothing been seen. The value of paper as a retainer of warmth has always been recognized by hunters, prospectors and other people who are given to "roughing it." On cold nights these people will cover themselves over with old newspapers, which they find a great protection against cold. This is perhaps what suggested to some genius the idea of paper clothing. The goods are of a very tough sort of paper, resembling buckskin in appearance.
