A Bargain For Somebody!!! EXTRAORDINARY LICENSE. "It seems to me," remarked one of our citizens the other day, "that physicians are allowed extraordinary license in the manner in which they juggle with the welfare of their patients." "Now here is Dr.—who was attending Mr.—up to the time of his death, and if he treated him for one thing he treated him for a dozen different disorders. First the doctor said pneumonia was the trouble; then it was consumption. Then the patient was dazed for heart trouble, and so on until just before he died it was ascertained that disease of the kidneys was the real trouble, and that which had been at first treated as pneumonia, consumption, heart disease, etc., were but the symptoms of kidney disease.

EASTERN PROPERTY! OREGON LAND! A GOOD CHANCE. It is generally conceded by physicians that about one-half of the population of the United States are suffering from indigestion and dyspepsia. Hurried eating and improper mastication and insalubrious food are the principal causes. Dr. Hanley's Dandelion Tonic strengthens and invigorates the digestive organs and enables one to enjoy a hearty meal without any unpleasant after effects.

These people know a good country when they see it, and after a short time Oregon is their home.

LATEST BY TELEGRAPH. Important Events of the Whole World for Twenty-four Hours. Still Unheard From. New York, April 16.—Still there is no news of the passengers and crew of the steamship Denmark. Emancipation Day. WASHINGTON, April 16.—Emancipation day is being celebrated by the colored people of the District of Columbia by a parade of military and civic associations. Underground Wires. New York, April 16.—The mayor sent to the commissioner of public works today notifying him that the poles and wires were to come down. They were all except Western Union wires on the elevated railroad structure and the fire department line. The fall of every pole was hailed with cheers by the crowd. The commissioner has sent for some more police to be ready for an emergency. A Change of Base. CHICAGO, April 16.—It is reported here today that the Standard Oil monopoly had just completed one of the biggest deals on record. For two years the company has been quietly securing property in Ohio and has now \$7,000,000 invested there. The Standard company will abandon the Pennsylvania fields for those of Ohio. The consummation of the scheme means the revolution of the oil business. Another Pool Head. TUCSON, Ariz., April 16.—When returning from hunting, Caserio Chon, a Mexican, was carelessly handling a gun, and fearing an accident was requested to remove the cartridges. After doing so, as he thought, he was told by a young man that he had shot a young woman. Upon pulling the trigger a report was heard, and the young lady fell dead, shot through the heart, one cartridge being left in the gun. No Trace of the Robber. CHEYENNE, Wyo., April 16.—Two of the sheriff's posse returned tonight from a chase after the robber who held up Cashier Smith's bank at Grover yesterday morning and successfully got away with \$1000 in cash, and stated that the officers were unable to capture their man. All traces of him were lost at Pine Bluff, where he dismantled and evidently took a freight train east, and after riding a short distance left the train and started north. It Wouldn't Work. MINNEAPOLIS, April 16.—A bold and nearly successful attempt was made today to rob the State bank. Two men went into the bank when only one or two employees were present. One covered the employees with his revolver and the other vaulted over the railing and thrust \$5000, which was on the teller's table, in a valise. At this moment a depositor entered and the robber threw the valise to his accomplice who dashed out. They were caught and gave the names of James Henry and Fred Douglas. A Beet Sugar Company. SAN FRANCISCO, April 16.—A beet sugar company was incorporated here with a capital stock of \$5,000,000, and with Louis Stillas, A. Latis, E. Ehrmann, Claus Spreckels and D. Spreckels as directors, the two latter holding half the stock. The object is to erect large sugar refineries at various points on the Pacific coast, in addition to the one already established at Watsonville, Cal., with the expectation of refining 50,000 or 60,000 tons of sugar a year. The points at which the refineries will be established are not indicated. The Southern Pacific. MENTO PARK, Cal., April 16.—In an interview today, Senator Stanford said, when asked if it were true that the Seattle & Southern road, now being built, was a Southern Pacific enterprise: "Our road ends at Portland. As to the extension and branch lines of the Southern Pacific, I can only say that the railroad business is one that will not stand still, and that we will have to build branches. At present we have no intention of going to Seattle." The senator gave it as his opinion that a railroad would be built to Alaska in a few years, and said the senator, "I have no doubt that a man can go around the earth by rail in the course of twenty-five years."

Tanner's Correspondence. WASHINGTON, April 16.—Commissioner Tanner, of the pension bureau, received during the first week of the present month 69,871 letters and other pieces of mail matter pertaining to the business of his office, and last week he received 69,000 pieces. The commissioner desires this fact made public as a general explanation of the delays in answering the correspondence. The Trial Trip. SAN FRANCISCO, April 16.—It was stated unofficially today that the cruiser Charleston would probably start on her trial trip on Friday next. She has finished coating and today took on board a large quantity of rope, hawsers and other equipments from Mare Island for the trip. A REMINISCENCE OF 1847. The Old Log School House—Progress—Religion—Civilization. (Correspondence of the Capital Journal.) EDITOR JOURNAL:—In the year above written, the people of the Territory of Oregon were all very busy hewing out for themselves beautiful farms and adorning them with such improvements as their good taste would suggest. The writer at this particular time was a resident of Polk county and lived near where Dallas the county seat now stands, and sometimes engaged in one kind of manual labor, but his chief business was farming. There were quite a number of single men in this neighborhood who had crossed the plains in the years of 1843-45-47, and had taken up land, and had commenced to improve and adorn the same with such improvements as were considered necessary. There seemed to be a spirit of contentment among this class of citizens as well as with all other classes that had made their homes in the Territory. It was very common to see people who had come in to this one of the most beautiful spots of country on God's green earth. The situation was truly grand, and one that shall recur to our memory often while we plot on our way through this life. Being thus surrounded by all the beauties of our adopted home and knowing that we were some 2000 miles away from our former civilization and therefore would have to depend upon our own resources for almost everything that would tend to make us a happy and contented people. This being the case the first thing to be done was to establish school houses and churches, which was soon done and a state of civilization thereby sustained that would render us comparatively safe from the inclination of man to always retrograde wherever there is no law, education or Christianity to counteract such influences. At this time there was but one college or seminary of learning of any note in this territory, then comprising all of Washington, and Idaho, and that was the germ of what is now the Willamette university, situated in Salem, while there were many school houses built all over the country, which were used both for school purposes and also for church, where the young buds were taught to shoot up in accordance with the best instructions that our most favored teachers were in possession of, both mentally, morally and religiously. While it is true that our facilities for knowledge, sciences and religion, were limited, yet we were able to plant the germ into which has budded and bloomed a system of education far beyond our most sanguine expectations, equal almost to any in our government. Instead of having only one school as formerly, we have many colleges and seminaries located at almost every point of any note in this state, where art, science and nature are taught in all their varied characters according to the latest improvements. Besides this we are now blessed with churches in almost every neighborhood in this state, where the gospel is taught both to the old and young from the pulpit and stand, in every community, which to my mind is the great secret of our prosperity in civilization and the fine arts. Show me a place where there is no civilization and I will show you a place where the people are nothing but savages. If this article is acceptable I will follow it with another on a different topic. T. C. SHAW.
