

GOMMAGEING.
An interesting or the partaking of too rich and indigestible food, is a common cause of discomfort and suffering. To remedy this, a full dose of Dr. Pierce's Food is the best remedy. They operate gently, yet thoroughly and without griping, nausea, or other unpleasant effects.

If the too free indulgence in such temperate eating has deranged digestion, causing dyspepsia and indigestion, attended with a sense of fullness or bloating after eating, coated tongue, bitter or bad taste in the mouth in the morning, on arising, drowsiness after meals, indigestible feeling of food, or of impending colic, and hypochondria—then you need to follow the use of the "Food" with Dr. Pierce's Golden Medical Discovery, to keep up the stomach, invigorate the liver, and get rid of the poisonous matter which accumulates in the system. It purifies the blood, cleanses the system from all humors and blood-poisons—no matter of what name or nature, or from what cause arising. There is nothing similar in its composition or effecting its results. Therefore, don't be duped and induced to take any substitute, and to be "just as good" as the dealer may make a larger profit.

\$500 OFFERED
by the manufacturers of Dr. Sage's Catarrh Remedy, for an incurable case of Catarrh in the Head.

BOOK REVIEW.
THE STRUGGLE FOR BREAD.—An impartial discussion of some of the wrongs and rights of capital and labor, etc. By Leigh H. Irvine, editor "The Dial," Oakland, Cal., San Francisco News Co., Pub. Price 50cts, Paper, 182 pp.
This little work of eight chapters discusses in a free manner the trite modernisms known as Capital-and-Labor, The-Struggle-for-Wealth, Railway-Problem, Henry-Georgeism, Profit-Sharing, etc. The work may interest some the more if they know that it is going into a 4th edition, is being used as a text-book in several Universities. The author makes no claim to originality of matter produced. There is such a mass of facts and statistics current in the literature of the age, that no one can claim as his own, that this author is quite right in being modest in his claims of originality. He asserts and proves that this country has seen hard times in 1837, '47, '57, '67, '78 to '78 and '82 to '87; that the new Nationalism is but another name for old Socialism and would result in the overthrow of individuality; this writer does not believe that hard times is the constitutional laziness of idlers who grow because they are multiplied and extended, but that it is a better business than general farming for those who understand it.) is also true. There is nothing about the business that any ordinary person cannot readily learn and manage; and that a twenty acre berry farm will pay a greater profit on the labor and capital required, I have no doubt. Yet many, especially grain and stock farmers, regard it as a little business, and treat it accordingly.

petition with the great staples wheat, corn, cotton, etc., in the markets of the world, consequently can pay but little, if any, better than they do. We have no "protection," nor "subsidy," in our industry. And the market has been "glutted" every year until this. The canneries offer us little encouragement, as the prices offered are usually below the cost of production, and we only send them out of the market. Facts are facts, gentlemen.

That the fruit and berry business is in its infancy in this valley, there is no question. As population increases, and facilities for transportation are multiplied and extended, berry culture will grow accordingly. That it is a better business than general farming for those who understand it.) is also true. There is nothing about the business that any ordinary person cannot readily learn and manage; and that a twenty acre berry farm will pay a greater profit on the labor and capital required, I have no doubt. Yet many, especially grain and stock farmers, regard it as a little business, and treat it accordingly.

Meanwhile the berryman continues to pocket the proceeds of his labor, and his work is not so hard nor his risks as great while his business is pleasanter than his two or three hundred acre neighbor; and while I am not disposed to "cross-color" the business, if I were young and beginning life anew, with my present experience, I should be a berry and fowl farmer in this Willamette valley. The outlook now is better than it ever has been before but I am getting too old to enjoy it.

Money is "Tight."
Daily Astorian: While in Portland last week, the writer was told by so many people that "money is devilish tight," that he went around to see if what they said was so. They are right. Money is "tight," in Portland today. This is, if you want to borrow some you'll have to put up with a good deal of interest. There's no trouble about lending it. Money is scarce not only in Portland, but all over the state. The writer has heard various reasons assigned. He believes that it is because so much of it is tied up in the Oregonian has been booming Washington at so much a line for the last two years. A great deal of Oregon money has been diverted that way. This is not criticism. It is a statement of what is believed to be a fact. People have a right to do what they like, provided they don't interfere with other people's right to do what they like. Probably ten millions of dollars have been invested by people in this state in Washington property in the last two years. Then, there is a good deal of ready money gone into Uncle Sam's possession. An immense amount has been spent by Astorians and others in the purchase of timber land, and other government land. The most of it is still there. No wonder money is tight. The one time that a few inches in diameter, that a few inches in diameter, that a few inches more than the width of this column.

FROM AUMSVILLE.
ED. JOURNAL. In the JOURNAL of June 27, 1890, is an article entitled "Oregon Small Fruits," which among much useful and instructive matter, contains some statements calculated to "provoke in the simple smile." That Oregon, especially the Willamette valley is an A. N. O. fruit country "goes without saying," but having been here thirty-seven years, and paid some little attention to fruit myself, the statement regarding Prof. Arnold's cherries that "many of the Royal Ann cherries measure two and a half inches in diameter," half an inch more than the width of this column.

SEVENTH PALATIES.
Times-Mountaineer. The Dallas Democratic exchange says: It is intended that the southern states shall send republicans to congress, no matter how the people may vote. In former times this work was guarded by bayonets, on the plea that southern people would violently resist attempts at free suffrage. It is now proposed to count in republicans without the armed aid.

Union Pacific R. R. Company

Royal Baking Powder
ABSOLUTELY PURE

Woman Again to the Front.
The only Harvard College prize open to competition from both men and women is the Sargent prize of \$100 for the best metrical translation of some assigned ode of Horace, and a young woman has captured it this year with the same assurance that characterized the recent prize-winning of her sex at Cambridge University in England. The Harvard young woman, an "Annex girl," is Miss Helen Leah Reed. She comes from a family of literary tastes, has already done meritorious work in this direction, and hopes to make writing her profession. Although a native of New Brunswick, she has spent much of her life in or near Boston.

The Yamhill Co. Ledger says of Rev. J. L. Hershner's management: Only one short year since the Lafayette Seminary was first opened and to-day we are convinced that it has in the hands of a prudent and able faculty proved a success in the superlative degree. Situated as it is in a most beautiful locality, with easy access to two leading railroad lines, on a navigable river, at least it could be made navigable with but a trifling cost, a high rolling country, excellent pure water, surrounded by magnificent farms, that for beauty and richness of soil cannot be surpassed in any country, and in the banner county of the banner state of Oregon.

Lizzie R. Read publishes a letter on "The Cruel Check Bill" in the Astorian. She says: "A horse ought to be permitted to see the ground where he is going to put his feet. But will he not drop his head too low if the overcheck is removed? Certainly not. His head is his own, and he knows how to carry it. Horses have rights as well as other people. Dominion over animals does not include the right to torture them. 'Blessed are the merciful, for they shall obtain mercy.' We shall all need a little mercy, so let us not debar ourselves by a foolish practice which hurts not us, but makes the poor horse sad indeed. When the noble animal shall give in his testimony let us not be found waiting in humanity to him. When the horse and his driver shall stand before the Judge of all, how would it look to have the horse appear the more humane of the two?"

SOME MONEY.—A letter from Quartzville to the Astorian in this city says: "The Albany Co. will put their mill up at their cabin. They have just received returns from some of their rock set off. It went \$2110 gold and 37 ounces silver to the ton. They are feeling happy and there is no doubt but that they will put in a mill right away."

Wherever Malaria Exists.
The blood is its certain prey. In interment and remission, fever, dizziness, and ague, the fever is always recurrently affected, and the blood contaminated with the cause of the disease. Dr. Harkness's Malaria Remedy is a sure blood purifier and fever and every form of malarial disease, that it does away with the liability of the disease, by removing the cause of the disease in advance of the arrival of the season when the disease is prevalent. There is no more deadly preventive for those who are visiting or emigrating to a locality where the malarial miasm exists. There is no more certain cure for the disease in its epidemic or epidemic form, to be secured by the use of Dr. Harkness's Malaria Remedy. But who can take the Malaria Remedy both in preventing and curing. Moreover, it relieves every variety of dyspepsia, and overcomes constipation, the impurity of the blood, and strengthens the nervous system.

WHAT IS A TUBULAR WELL?
Be Sure to Read and Get no Other.
A genuine Tubular well is constructed by putting down a three inch iron pipe, with 20 openings every top and bottom. No dirt can get in and only pure water can be got. This is the only kind of well that works and insects cannot get into, that is absolutely surface-water proof, and that is forced through the ground by the pressure of the water. It is positively the only kind of well that is building in this country. James A. Rankin, Salem, residence near Fairgrounds, makes these wells. Terms reasonable. Catalogue on application. 6-11-90-6-11-90.

PANT SHOP.
156 Commercial Street.
P. H. RANKIN, PROP.
A Bargain!
A desirable lot of lands in lots to sell, seven miles southwest of Salem, within eight miles of the city, containing 1000 acres of wood and some of timber—worth \$100,000. The land is good and the price is low. If you are interested, call on me at my office, 156 Commercial Street, Salem, Oregon. Terms cash. Address: P. H. Rankin, 156 Commercial Street, Salem, Oregon.
