stands his pix, but we don't want no procisions, or experimenting—dectoring's what we won!

Many times women call on their family physiciana, suffering, as they imagine, one from dyspepela, another from heart discusse, another from liver or kidney disease, another from her or kidney or prostration, another with tain here or there, and in this way they ail present, alike to themselves and their casy-going and indifferent or ever-busy doctor, separate and distinct cleases, for which he prescribes his pills and potiona, assuming them to be such, when, ar radily, they are all only symptoms caused by some womb disorder. The physician, ignorant of the cause of suffering, encourages his "practice" until large bills are made. The suffering putiont gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Perce's Faveribe Prescription directed to the cause would have removed the disease, dispelled all those distressing symptoms, and instituted comfort instead of prolonged misery.
