The Oregon Land Co.,

Home Office at Salem, Oregon.

(In the State Insurance Building) and branch offices in Portland, Astoria and Albany. Has for sale a large list of Grain, Stock and Fruit Farms; also City and Suburban Property.

The Oregon Land Co. was especially organized for the purpose of buying and sub-dividing large tracts of land, and has during the past two years bought and subdivided over 3,200 acres into

Five to Twenty Acre Parcels.

The success of this undertaking is shown in the fact that out of 280 tracts placed on the market, 225 have been sold. We claim that ten acres of choice land in Fruit,

Will Yield a Larger Income

than 100 acres of wheat in the Mississippi Valley. We also make valuable improvements in the way of roads, clearing the land, fences, etc. We can sell a small tract of land for the same price per acre as you would have to pay for a large farm.

Now, the ladies will ask what is there cruel about the overhead check-rein? Is it not in general use? Do not the most fashionable turn-outs have their horses harnessed in that way? Very well, ladies, but read the following from the Youth's Companion of July 10, and see for yourselves whether it is cruel or not:

THE OVERHEAD CHECK. A gentleman in Boston, who had become convinced by his observation of the behavior of horses when driven with the overhead check-rein that they often suffered great pain from it, and whose study of its effect upon their health had led him to the conclusion that it caused distressing and fatal diseases, some time since set about doing what he could to correct the evil.

His ordinary business often took him about the city of Boston, and also to other cities in New England, and wherever he went he interested himself directly in the case of horses upon which he found the overhead check, asking and often obtaining permission to uncheck them, and entering politely into conversation on the subject with their owners or drivers.

Horses were found tossing their heads fretfully under the check, evidently in pain, and, upon being released by this gentleman, they often pressed their heads upon his shoulder, as if in gratitude for the relief he had secured them.

Very often the owners of the horses, when courteously addressed on the subject, admitted that they had never thought of the pain and injury which might be inflicted by the overhead check, and promised to have it removed from the harness.

In order to carry on his humane work on a larger scale, the gentleman had printed a great number of small leaflets, each bearing at the top a picture of a horse with its head drawn up into an unnatural position by the overhead check, and beneath it these words:

"About five hundred Veterinary Surgeons in Great Britain signed a paper condemning overhead check-reins as painful to horses, and productive of disease.

"It is cruel in the extreme, causing distortion of the windpipe to such a degree as to impede the respiration ever afterwards, and various other diseases, such as excoriation of the mouth and lips, paralysis of the muscles of the face, nystagmus, apoplexy, coma and inflammation and softening of the brain, all these resulting in shortening the life of the horse.

"The writer begs of you to consider that this cruel thing has been but a short time in use; that we managed our horses very well before, and it is not necessary now.

"A good authority says that the overhead check-rein is generally put upon poor animals, whose wearied and haggard appearance the owners attempt to disguise by this instrument of torture.

"Pray abolish it at once, and use your influence with others, for it is a cruel, senseless fashion. The same may be said of blinders, seventy-five percent of which can be removed with perfect safety to-day."

W. M. SARGENT, Dealer in Wall Paper, Mouldings, Pictures Frames, Window Shades, Baby Cabs, Express Wagons, Notions and Toys of all kinds. A Fine Line of Etchings and Engraving, Oil Paintings and Chromos. Prices as very lowest.

THE CAPITAL JOURNAL.

PUBLISHED DAILY, EXCEPT SUNDAY, BY THE Capital Journal Publishing Company, (Incorporated.) Office, Commercial Street, in P. O. Building Entered at the postoffice at Salem, Or., as second-class matter.

HOFER BROTHERS, - - - Editors.

THE ABUSE OF HORSES.

It is not only the street car companies and livery stable keepers who allow their animals to suffer, and to be abused. The writer saw two ladies speeding their horses on Court street the other day, both animals having their heads checked up so they could hardly turn them in the least degree to either side. They resembled not a real giraffe, for that is a graceful animal, but those painted giraffes that we see on the circus bill boards, their attitude was so unnatural.

Now these good ladies would not knowingly violate a state law. But we invite their attention to page 952 Code of Oregon which provides that "if any person shall cruelly beat or torture an animal, whether belonging to himself or another, such person, upon conviction thereof, shall be punished by imprisonment in the county jail not less than ten nor more than thirty days or by fine of five to fifty dollars."

The next section provides a further definition and penalty, as follows: "Whoever overdrives or overloads, drives when overloaded, overworks, tortures, torments, deprives of necessary sustenance, cruelly beats, mutilates," etc., or causes these things to be done, or allows it to be done, etc., shall be punished by imprisonment 60 days, or pay a fine of \$100, or both.

The next section provides a punishment for the ordinary cruel way of carrying calves, sheep, poultry, or pigs, lying on their side with their legs tied, over stony roads.

Now, the ladies will ask what is there cruel about the overhead check-rein? Is it not in general use? Do not the most fashionable turn-outs have their horses harnessed in that way? Very well, ladies, but read the following from the Youth's Companion of July 10, and see for yourselves whether it is cruel or not:

THE OVERHEAD CHECK. A gentleman in Boston, who had become convinced by his observation of the behavior of horses when driven with the overhead check-rein that they often suffered great pain from it, and whose study of its effect upon their health had led him to the conclusion that it caused distressing and fatal diseases, some time since set about doing what he could to correct the evil.

His ordinary business often took him about the city of Boston, and also to other cities in New England, and wherever he went he interested himself directly in the case of horses upon which he found the overhead check, asking and often obtaining permission to uncheck them, and entering politely into conversation on the subject with their owners or drivers.

Horses were found tossing their heads fretfully under the check, evidently in pain, and, upon being released by this gentleman, they often pressed their heads upon his shoulder, as if in gratitude for the relief he had secured them.

Very often the owners of the horses, when courteously addressed on the subject, admitted that they had never thought of the pain and injury which might be inflicted by the overhead check, and promised to have it removed from the harness.

In order to carry on his humane work on a larger scale, the gentleman had printed a great number of small leaflets, each bearing at the top a picture of a horse with its head drawn up into an unnatural position by the overhead check, and beneath it these words:

"About five hundred Veterinary Surgeons in Great Britain signed a paper condemning overhead check-reins as painful to horses, and productive of disease.

"It is cruel in the extreme, causing distortion of the windpipe to such a degree as to impede the respiration ever afterwards, and various other diseases, such as excoriation of the mouth and lips, paralysis of the muscles of the face, nystagmus, apoplexy, coma and inflammation and softening of the brain, all these resulting in shortening the life of the horse.

"The writer begs of you to consider that this cruel thing has been but a short time in use; that we managed our horses very well before, and it is not necessary now.

"A good authority says that the overhead check-rein is generally put upon poor animals, whose wearied and haggard appearance the owners attempt to disguise by this instrument of torture.

"Pray abolish it at once, and use your influence with others, for it is a cruel, senseless fashion. The same may be said of blinders, seventy-five percent of which can be removed with perfect safety to-day."

Grant's Pan Courier: We wish to call attention to the fact that of the over \$300,000 state revenue yearly collected, nearly all of it is expended in the Willamette valley. While the tax gatherer knows every nook and corner in the entire state, the tax disburser seems to know only the Willamette valley. We know that the present constitution of Oregon was made by the people of that Willamette valley, and for the people of that valley, and, therefore, in a great measure, compels the disbursement of a large portion of the state money in that locality; yet we trust that in matters where the constitution has not preordained in favor of the Willamette that the people of that valley will show a willingness to deal justly with other parts of the state.

Before you start for the sea shore or mountains don't forget to order the EVENING JOURNAL to you!

aided him in circulating it, and it was taken up and sent broadcast by the Massachusetts Society for the Prevention of Cruelty to Animals. That the overhead check is cruel and hurtful does not seem to admit of doubt. Horses upon which it is placed almost always acquire a habit of lifting or tossing the head in order to relieve the strain upon the neck, and its continued application produces well-established diseases.

STILL HARPING ON SILVER

The Oregonian is so everlastingly wrong on the silver question that it cannot let the subject rest, even now that a limited silver bill has passed and is now a law. On the 15th of July it devotes a column, and a half to a rehash of Grover Cleveland and Mantou Marble's views on the subject of international silver coinage. It quotes with a great degree of relish the ultimatum of Mr. Marble, whose greatest financiering was probably done as a financial agent of Mr. Samuel J. Tilden in the famous contest of 1876, which is as follows:

There is no indication that the subject of bimetalism has received any intelligent or serious consideration outside of a small circle in each European country named as a probable cause of alleged depression in trade.

"This is the last word on the subject of an international agreement for the coinage of silver to date. It ought to satisfy every sane and honest person that the idea is chimerical," says the Oregonian. So the learned friend of the poor who dominates over the great Portland paper sets every bimetalist down as neither sane nor honest!

No such authority as Mr. Scott or Mr. Marble, or even Mr. Cleveland's opinion, can affect a final judgment upon bimetalism. Bimetalism is a growing idea. It is the growing idea of the West against the East. It is an idea that is hostile to that greatest of all monopolies, the issuing of our nation's circulating medium upon an exclusive gold basis, with the gold cornered by Wall street and its branch agencies all over the country, and all the paper money coming to the people only by the grace of that monopoly, and only after paying the plutocrats big round interest. That is what the Oregonian wants.

That is not what the people want. The Oregonian is only one of a great number of metropolitan papers in the service of Wall street, that are trying to force the people to keep up a financial system which pays banks fifteen to twenty-five per cent, and barely allows the agricultural interests to live. So long as the government loans its money-lending power out to banks, and so long as the government does not issue an abundant national circulating medium direct to the people, without expense and without the intervention of a monopolistic syndicate that is expensive as it is inadequate, just so long will the laborer and producer be at a disadvantage.

SOME SOLID FACTS. Ex-Senator Thurman is reported to have said to a New York World reporter.

It is the solid south that has made the solid north. When the solid south is broken there will be no longer a solid republican north. The race issue has been practically the sole one since the war.

There is some solid sense in the first sentence of the above statement. The truth of the whole statement may be challenged, however, for there is not to-day and has never been a solid north. Let a few facts of history answer Mr. Thurman. It is a remarkable fact that the same states of the north that gave democratic majorities for Cleveland in 1884, Connecticut, New Jersey, and Indiana, gave majorities against Lincoln. The great empire state of the north, New York, is always a doubtful state. It is never solid for the republicans or the democrats. There has never been a time when all the northern states were solidly republican. Some of them were democratic during any year that can be named, even during the war. Where is there a southern state that is not solid for democracy? If there is a race issue and sectionalism, who is to blame? Not the north for the north is not solid.

Gov. Hill in his Indianapolis speech quoted this sentence from Andrew Jackson: "There is but one safe rule and that is to confine the general government rigidly within the sphere of its appropriate duties."

According to a new ordinance passed at Astoria peddlers who use horses will have to pay \$50 to \$100 per week license, and foot peddlers, \$35; book agents, \$10; fortune tellers, \$30; lung testers, etc., \$30; museum, etc., \$25.

Real estate in Marshfield, as many blocks back from the river, brings as high a price as in Salem; which only goes to show that Salem prices, which seem so high to many, are very moderate.

The colored porters on the Pullman sleeping cars, have demanded that their employers pay them living wages instead of compelling them to accept alms from the public. The porters on these cars are paid but from \$8 to \$15 per month.

The children are coming to the front for a report of the Stanley marriage says: "The bride was attended by five pages, three of whom were 7 years of age, and by two bridesmaids aged 6, all of them dressed in white, the costumes being of the time of Charles I."

Marshfield has organized a chamber of commerce, A. Nasburg was elected president; J. W. Burnett, vice-president; F. A. Golden, secretary; Eugene O'Connell, treasurer; and an executive committee appointed consisting of W. H. S. Hyde, Theo. Minott and Henry Sengstacken.

WHAT IS A TUBULAR WELL?

Be Sure to Read and Get the Other. A genuine Tubular Well is constructed by pulling down a three inch iron pipe, with an opening except top and bottom. No dirt can get in and only pure water can be got out. This is the only kind of well that is absolutely water-tight, and that is forced through the cement strata to the pure living water. It is positively the only kind of well that is worth building in this country. James A. Roberts, Salem, residence near his grounds, makes these wells. Terms reasonable. 10 years experience. Salem, Oregon.
