

SILVER GOING UP.

Prospect of all Farm Products Advancing.

PROPHETIES OF GOLD BUGS FAILING.

A Heavy Order From England Causes the price to go Up.

A LOVELY WOMAN
experiencing every day of her "By heaven over painted," "Yes," reported she indignantly, "and by heaven only!" Buddy had been mangled here and there, and suffering from a dry, hacking cough, night-sweats, and spitting of blood, seemed destined to die. Dr. T. C. Wilson's treatment was successful, however. After spending hundreds of dollars on physicians, without benefit, she tried Dr. Pierce's Golden Medicine, and was soon well again. Her skin was mackerel, and in a few months she was plump and rosy again. A general picture of health and strength, a new world-famed as a remedy for consumption, which is really lung-scarification, is now on the market. It is a terribly fatal malady, when taken in time and given a fair trial, but also affords all forms of Scrofula, Skin Disease, &c., &c. **W. H. SWINSON, Fever-Doctor, His-joint Disease, Salt-rheum, Tetters, Eczema, Boil, Carbuncle, Erysipelas and other Skin Diseases.** All said cures are guaranteed. All said cures are guaranteed. All said cures are guaranteed.

\$500 REWARD
offered for an incurable case of Cataract in the Head, by the proprietors of Dr. Sam'l March Remedy. 16 cents, by druggists.

PROFESSIONAL CARDS.

SALEM LAND COMPANY
Incorporated 1889—Capital Stock \$30,000.

POSTOFFICE BLOCK,

SALEM, OREGON.

New York, July 31.—The Herald says the exportation of silver bullion from New York to London has increased very much recently. The movement began about three weeks ago, and some very heavy shipments have been made. During the last week about 1,500,000 ounces have been sent away, and for this week 700,000 ounces have been ordered so far. Zimmerman & Forsday announced yesterday that they would ship an additional 100,000 ounces on the steamship Lahn, and 300,000 ounces more on Saturday's steamer. The price of silver, meantime, has steadily advanced, and there is a spice of speculation in it. When the present movement began, the New York price was \$1.00 per ounce. Silver was quoted \$1.10 yesterday, and the prediction of Wall street dealers who ought to know, was that it will reach \$1.15 before it goes lower.

The situation has caused a surprise in some quarters because it had been predicted that as soon as the silver bill passed congress this country would be flooded with silver of other countries. The reverse, however, has proved to be the case. A few weeks before the silver bill was passed London speculators shipped to New York 1,500,000 ounces of silver bullion, in the belief that the silver bill would become a law and that prices would go up because of the demand for bullion that would follow; but the stream has now set the other way and the demand for silver in England is greater than here. As to the cause of this movement the following explanation is given:

Every summer England needs a large amount of American silver to be sent to India to pay for wheat and cotton. This demand usually comes in August or September. This year it has set in a month or so earlier, probably because of the fear of English speculators that after August 13th, when the silver bill goes into effect, requiring treasury agents to purchase 4,500,000 ounces every month, the price of silver in New York will have a sharp advance. London orders on New York, all coming in at once, have thus brought about the advance in price earlier than it would otherwise have done.

Senator Mitchell, who was one of the leading free coinage advocates during the discussion of the silver bill, and said this afternoon that with the advances in the price of silver bullion, there would be a steady increase in the price of fastenings.

The Pacific coast trading circuit will open at June 1st on Aug. 1st, and continue until the close of the Panama meeting, Oct. 1st. The prices are larger than ever offered before, and the season will very likely prove a great one for the production of fastenings.

C. C. Scammon, of San Diego, Cal., former owner of the 1,000,000 Bell Boy, has a gold mounted tour of the unfortunate man, the only substantial portion of him that remained after his death by fire.

The Pacific coast trading circuit will open at June 1st on Aug. 1st, and continue until the close of the Panama meeting, Oct. 1st. The prices are larger than ever offered before, and the season will very likely prove a great one for the production of fastenings.

A two-year-old colt by Ambush, now being handled by Ed Geers of Nashville, Tenn., with six weeks' breaking and training, paced a full mile in 20 sec. last quarter by 35 seconds. Geers expects to give him a record of 2:20 in his two-year-old form and then train him for trotting.

Every summer England needs a large amount of American silver to be sent to India to pay for wheat and cotton. This demand usually comes in August or September. This year it has set in a month or so earlier, probably because of the fear of English speculators that after August 13th, when the silver bill goes into effect, requiring treasury agents to purchase 4,500,000 ounces every month, the price of silver in New York will have a sharp advance. London orders on New York, all coming in at once, have thus brought about the advance in price earlier than it would otherwise have done.

Senator Mitchell, who was one of the leading free coinage advocates during the discussion of the silver bill, and said this afternoon that with the advances in the price of silver bullion, there would be a steady increase in the price of fastenings.

The bullion being the main item of the standard money values, it will naturally lead the way to market prices for all kinds of American products. When we began the discussion on the silver bill some months ago, bullion was worth 94 cents an ounce. It is over \$1.10 today, and it is stated it will continue to rise till it reaches at least \$1.15 and probably \$1.20 within 40 steps. This is an increase already of about 25 per cent. in the price of bullion, and from what I learn through my mails and the telegraph, farm products, taking the country over, are increasing proportionately. I have no doubt that when the whole effects of the silver coinage law are distributed over the country, the farmers will find themselves readying from 25 to 50 per cent. more for their products than they get a few months ago. The silver law has long more than \$50,000,000 now lying idle in the treasury and contemplates putting into circulation about \$55,000,000 annually. Of course, silver coinage is to cease after the 1st of next July, except when the secretary of the treasury finds that there is a demand for the silver dollar, the tendency to be purchased and stored away and certificates issued to represent this talk by the democratic press all over the country of there being a cessation of silver coinage, and that this law will not have any better effect than the old one is all lame come and intended to mislead the public. There will be a continuance of silver coinage whether there is a demand for the standard dollar. I see that the effect of our new coinage laws are being felt in England, where the minister of agriculture says that a decided rise in the price of farm products is felt, and that it is owing to the new American silver law. The new silver coinage law will prove thoroughly satisfactory to every element. It will make money plentiful and times better. It will increase prosperity and prevent the slightest possibility of any kind of a panic or stringency in the money market. Every safeguard is thrown out to stop the schemes of speculators in bullion, and at the same time the people are guaranteed that no arbitrary action of the secretary of the treasury or the administration in general can cut off the supply of silver dollars or the certificates representing them which will be put out monthly. To my mind it is by far the most important legislation we have had in

many years and will go further toward the prosperity of the country and the people than anything we have had.

HORSE NOTES.

[From the Boston Horse and Stable.]
The Pittsburgh Association has offered a special \$500 for Harry Wilkes to break his record of 2:13, made in California.

Mr. James S. Hazard, Newport, R. I., has sold his peer Littleton, with a record of 2:20, to J. J. Hamman, of Youngstown, Ohio.

The revenue received for fees from the English stallion Economy amounts to about £3000 per annum, and his book is full of three years.

Nimbus is another Vermont bred horse to enter the charmed circle, making a record of 2:23, at Philadelphia.

The revenue received for fees from the English stallion Economy amounts to about £3000 per annum, and his book is full of three years.

There is said to be a faster two-year-old in California this year than Regal Wilkes (2:20). It is a filly by Guy Wilkes, dam by Nutwood.

A stallion named Robinson, D., that entered the 2:30 ranks in Central New York has been identified as the Maine trotter, Baby Dean, by Daniel Bourne.

The great California stallion, Palo Alto, 2:12, and the Chicago horse Jacky, 2:15, are to trot in Cleveland, Detroit or Chicago as may be decided, for a purse of \$1000.

Perhaps the most noted foal dropped in Kentucky this year is a stallion colt by King Wilkes, out of Miss Russell, the dam of Maud. This is the first foal that Miss Bussey or any of her daughters have dropped of a representative Wilkes stallion.

Every summer England needs a large amount of American silver to be sent to India to pay for wheat and cotton. This demand usually comes in August or September. This year it has set in a month or so earlier, probably because of the fear of English speculators that after August 13th, when the silver bill goes into effect, requiring treasury agents to purchase 4,500,000 ounces every month, the price of silver in New York will have a sharp advance. London orders on New York, all coming in at once, have thus brought about the advance in price earlier than it would otherwise have done.
