

Esop has told the tale of a man who, from overeating, collapsed about and felt gray, saying to himself: "My father, surely, was a high-spirited rascal, and I am his own child in speed and spirit." Next day he was sick and weary; he then exclaimed: "I must have made a mistake; my father, after all, could have been only an ass!" A man, after eating a good dinner, may feel a little drowsy, but next morning he will be as fresh and alert as ever. If he is not, he is suffering from indigestion, and his stomach and liver are sluggish. He is morose, despondent and "out of sorts" generally. For indigestion, Biliousness and all the nervous troubles of the Stomach, Liver and Bile, Dr. Pierce's Golden Medical Discovery is an unequalled remedy. Contains no alcohol to inebriate; no syrup or sugar to ferment and debase the digestive process. It cleanses the system and cures indigestion, flatulence, eruptions and all Skin and Scalp Diseases. Scarcely an affection of the Liver, Stomach, Bile, or any of the organs of the Digestive System, which does not yield to its superior restorative properties.

\$500 REWARD offered for an incurable case of Cancer in the Head by the proprietor of Dr. J. C. Smith's Cancer Remedy. Only 60 cents. Sold by druggists everywhere.

PROFESSIONAL CARDS.

J. J. SHAW, Attorney-at-Law, Salem, Oregon. Office first door to the left of the head of stairs in the rear of Ladd & Bush's bank.

TILMON FORD, attorney at law, Salem, Oregon. Office upstairs in Patton's block.

J. A. APPELGATE, attorney at law, Salem, Oregon. Office in the Commercial and State block, Salem, Or.

JOHN A. CARBON, Counselor and Attorney-at-Law, Member of the Bar of Ontario, Canada. Office 102 State street, Salem, Oregon.

PRATT & HUNT, attorneys at law, Salem, Oregon. Office over Barr's jewelry store, State street.

W. F. WILLIAMS, STENOGRAPHER, and Typewriter. Office with Capital City Bldg., Co., 115 State St.

C. B. KNIGHT, Eclectic Physician, Office 127 Court street, Salem, Oregon. Pulmonary diseases a specialty.

D. B. J. M. KEENE, Dentist, Office over the White Corner, Court and Commercial streets.

C. S. MCALLIS, Architect, No. 132 State Street, Plans and specifications of all classes of buildings on short notice. Superintendence of work promptly loaned after.

GOBALET & WILLACH, Civil Engineers and Draftsmen, Railroad surveys and estimating a specialty. Office 132 State street, up stairs, Salem, Oregon.

BUSINESS CARDS.

A. M. CLOUGH, Undertaker, Embalmer and Cabinet Maker, 107 State St., Salem.

E. H. MORSE, Contractor and Builder, 111 High street, Salem.

JOHN GRAY, Contractor and builder, First inside building, a specialty. 405 Commercial street, Salem, Oregon.

JOHN KNIGHT, Blacksmith, Horse shoeing and repairing a specialty. Shop at the foot of Liberty street, Salem, Oregon. 22nd St.

F. B. SOUTHWICK, Contractor and Builder, Well prepared to do all kinds of building and guarantee satisfaction. 4-21-12m

P. J. LARSEN, Manufacturer of all kinds of vehicles, Repairing a specialty. Only the best work turned out, Shop 45 State street, next door to Scriber & Pohl's.

F. O. HAKER, Collection, Commission Collections made at reasonable rates. Goods sold on commission. Advertisements inserted in street cars at bedrock rates. 283 Commercial St., Salem, Ore.

G. E. HOEYE, Barber and Hair-dressing parlor. Finest bath in the city. 20 Commercial Street, Salem.

SOCIETY NOTICES.

G. A. R.—Sedgwick Post, No. 10, Department of Oregon, meets every Monday evening at the hall over the Oregon Land company's office. Visiting comrades are cordially invited to attend.

D. C. SHERMAN, Post commander.

S. A. HANDLE, Adjutant.

A. O. U. W.—Protection Lodge No. 2, A. O. U. W., Salem, Oregon. Meets each Wednesday evening at its hall in State Insurance block, corner Commercial and Chemsaketa streets. Visiting and sojourning brethren invited. F. R. SOUTHWICK, M. W. Ina Elm, Recorder.

Morgan & Mead, City Draymen!

All work done with promptness and dispatch. Only the best men are employed.

ELLIS & WHITLEY, LIVERYMEN,

South of Chemsaketa Hotel, SALEM, OREGON.

T. H. HUBBARD,

—Agent for—

Loans money on improved farms at a low rate of interest. No delay. Money ready when papers are completed. Privilege of paying in installments. W. A. JARVIS, Mgr. Office with Hunt & Pratt 100 State St., Salem.

STATE AGRICULTURAL COLLEGE.

Notes on Some of the Departments that May Interest Our Readers.

Editorial Correspondence.

A JOURNAL representative spent part of two days at Corvallis during the week past. The town has a thrifty appearance and some new buildings erected of late give the whole community an air of prosperity. For natural beauty of location and surrounding country it has always been noted, as well as for healthfulness. The clear, cool breezes that pour over the coast mountain range here have a marked exhilarating effect upon the citizens of Corvallis, and the traditional Oregonian sluggishness, sometimes whispered of to the traveler, is conspicuous by its absence.

No more beautiful city as a site for a state institution could have been selected than this choicest spot in Mary's valley. The richest treasures of Oregon's native agricultural wealth are spread before the eye, grain land, grass land, hill land, fruit land, and every elevation from the white soil that requires under-draining to the mountainous butte that requires a system of waterworks to keep it green, but affords splendid grazing and forests as its best natural produce, but can be successfully cultivated to its full potential. We mention this variety of soils to show that Oregon's Agricultural College and Experimental station are really well located to be of practical value to the people of every section of the state.

The writer had secured a collection of bulletins, catalogues and other printed matter issued about the college but has mislaid them, and will confine his notes to impressions made on the spot. Some severe criticisms are being published in a few state papers of the management of this college, and we had no small opportunity to post ourselves on the matters bro't up by those who make a specialty of criticising and objecting. We do not fail to sympathize with proper reforms in all public institutions and may at some other time give place to them. But the purpose of this brief sketch is rather to familiarize our readers with some points in favor of this young institution of learning. Our aim shall be rather to urge citizens to go and look the scheme over and give their children the benefit of the advantages here offered for securing a valuable education, of a highly practical and comparatively inexpensive character.

A few hours' study of a college of the men at the head of it cannot afford a visitor materials for conclusive opinions, except as comparisons may be made with similar institutions in other states. It is safe to say that Oregon has a very good start towards an agricultural college. The grounds, buildings and equipments are on a liberal yet not extravagant scale. The college buildings proper will accommodate nearly three hundred students. First year's enrollment was 100, last year's 151, and there are indications of constant growth in attendance.

At present there are about forty acres devoted to the horticultural department, and some two hundred acres to agriculture. The horticultural land was only this year turned over to that department, and does not make much more of a showing than could be expected in so short a time. The old orchards have been wonderfully improved by cultivation. One orchard that yielded no fruit last year will this year have hundreds of bushels of sound apples. Spraying has been carried on scientifically and accurate records of sprayed and unsprayed trees are kept, even to counting the apples that fall from each tree. That interesting animal, the codlin moth receives a proper share of attention. In the horticultural department we met with Prof. G. Coote, practical greenhouse gardener and botanist, with a natural aptitude for experimental science. The station has two good sections of conservatory, well filled, and there are a number of ornamental flower beds about the college grounds that attest the skill of the landscape gardener.

One of the practical features observed was about forty rows of tomatoes, each row of a different kind. The results obtained in early ripening, quality and yield will be valuable to Oregon gardeners. The same system will here be conducted with other crops. The land for the horticultural department is not as extensive or of the kinds necessary to try experiments in fruit growing, but we suppose additions will be made.

The agricultural department is under Prof. French, whom we found preparing an extensive collection of grains and grasses for the state fair. He has harvested some good grain crops, has a number of fields of corn in various stages of development. He is a graduate of Michigan Agricultural college, and seems to understand practical farm management. There is a little stock in the barn, a silo, and a good start all around for a successful experimental farm. More land is needed to carry on this work in all its branches.

Allied to this department is the work of the chemical laboratory and the entomologist. Prof. Irish in the former branch, is a hard-working young man, who closed his career as a college student with two years in the best chemical schools of Germany, and he seems conversant with the valuable scientific literature of that country. His laboratory is one of the best equipped in the United States and his perfect familiarity

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889

Royal Baking Powder

ABSOLUTELY PURE

with his work shows him to be a valuable man as a demonstrator. He is conducting a series of analyses of sugar beets, expecting to test some forty samples from different parts of the state. The result of this trial alone will be worth a great deal to the state as demonstrating the amount of saccharine matter in the crop that can be produced here.

We were shown through all the various lecture and recitation rooms, in all of which are found matters of interest and evidence of good, live, practical work by students and teachers. There is a chapel and society hall, armory, and kitchen, and sewing room in the college. President Arnold's room is an interesting one, on account of its library, a collection of books showing that the professor is a man of culture. All the books show rare taste, literary subjects predominating, with a strong leaning toward philology. Philosophy and political economy seem favorite subjects of research with Pres. Arnold and, he seems to be an educator on a free and broad basis.

We passed rapidly through the mathematical room under Prof. Letcher, who makes figure work very popular with the boys; Mr. Lampkin, who has charge of the signal service station, is finely equipped with all the modern scientific instruments; Prof. Washburn, entomologist, seems to be a clear-headed, energetic worker with a finely equipped cabinet, and acquiring a collection of native insects, moths and beetles; the industrial department is in charge of Prof. Covell, a Cornell college man, graduate in mechanical engineering; his work in field surveys, draughting and applied mechanics is evidently conducted from an intelligent basis. The carpenter shop is fully equipped and about thirty young men took in the rudiments of jack-plane and try-square, as well as Haswell. The recent act of congress, (allowing \$15,000 a year additional for each state experiment station), will enable the trustees of the Corvallis college to equip the blacksmith and machine shop, and make the industrial department a valuable feature of the college.

The department of household economy and hygiene is in charge of Dr. Snell, a lady connected with a highly literary family. Miss Snell instructs about forty young ladies in cooking, plain sewing, and hygiene. Here are the range, and cupboard and pantry—all as neat as wax. Dressmaking and fourteen kinds of stitches are taught. Dr. Snell is a substantial lady with a kind, motherly face, strong hands and arms, and silvery hair that offsets a blooming complexion—a combination of features that joined by sound sense and intellectual attainments constitute her a powerful working force for good in the college. Practical hygiene is taught, and among other things the abominations of corset-lacing are represented on the walls, where are shown outline drawings of withered waists, curved spines and deformed backs. Miss Snell carries such enthusiasm into her work that she not only inspires the young women of Oregon under her charge to become good cooks, but she persuades three-fourths of them to burn their corsets and go home relying on the bones and muscles nature gave them to hold themselves erect. Miss Snell's department has become one of the most interesting and valuable in the school.

We hope more of our readers will feel an interest in upbuilding the Oregon Agricultural College. It has a fair start for a young institution, and while many improvements can yet be made, intelligent persons and friends of higher education should be swayed by a generous spirit of helpfulness rather than fault finding alone. We hope to visit the school again.

AT THE BUSINESS COLLEGE.—Mr. Staley, principal of the Capital Business college, is now in charge of the work, and may be found at the college office each day from 9 till 12 in the forenoon, from 1 till 4 in the afternoon, and from 7 till 9 in the evening. Students who expect to begin on the opening day, Monday, Sept. 8th, are requested to call and register this week. 8-25-91

A Deadly Weapon.

Carelessness in purifying the blood leaves you at the mercy of that insidious enemy, RHEUMATISM, which sooner or later will strike its fatal blow. Hubbard's Rheumatic Syrup has no equal as a blood purifier, and should be taken by every person in the spring. Its efficacy has been proven by thousands of testimonials like the following:

"Gentlemen: I have been a great sufferer for over ten years. My whole system became deranged from diseased blood, and I was attacked with the worst form of kidney and liver trouble, dyspepsia, neuralgia and rheumatism. My sufferings cannot be described. The salowness of my skin disgusted me, and the neuralgia of my eyes so severe that it obstructed the muscles of my face, partially closing my right eye. The slightest motion gave me pain, but I am now entirely cured by Hubbard's Rheumatic Syrup, and wish to recommend it to all as a wonderful blood medicine."

Mrs. A. D. NOBLE, Mich. For sale by Smith & Stetson.

Before you start for the sea shore or mountains don't forget to order the EVENING JOURNAL to your camp.

T. H. BARNES, PRES. H. V. MATTHEWS, TREAS. WM. HOWARD PHELPS, SEC.

SALEM LAND COMPANY

—Incorporated 1889—Capital Stock \$30,000.—

POSTOFFICE BLOCK, -- SALEM, OREGON.

THE TIME IS NOW RIPE!

Our City is a No. 1, and Our Property is the Best.

MONEY TO BE MADE BY BUYING NOW.

Salem is just now offering opportunities for investment such as her citizens will never have again. With advertisements for the Capital City of Oregon reaching two million Eastern readers every week we are bound to have an ocean tide of emigration to our beautiful, healthful and prosperous place. Salem is the making of a city because it is already a city. It is the second city in Oregon, has state institutions, factories and the best advantages to be found on the Coast. Salem is not a city of wind and platted on unsurveyed land, a community suffering from the nervous excitement, nor nervous prostration, chronic in the boomed towns.

The time money is made on real estate is by buying before the boom. Salem has had no boom, her property is still cheap and there is no possible doubt of her going forward.

BUY NOW AND SELL

when the prices have doubled. One of the factors that will insure a return from an investment at Salem is the numerous crop failures in various parts of the Mississippi valley, and even as far east as Ohio, which not only depreciates the securities offered by those sections to investors, but will discourage thousands of settlers, who will gather up their effects and start for a region where crop failures are unknown, and the climate is devoid of extreme heat or cold.

NO DECLINES.

No honest property has declined a penny in Western Oregon, through what is known as the dull season of July and August, when so many of the well-to-do people of the Pacific Coast suspend work and go to the seaside. Prices have not yielded a particle, but so far as placed on the market it assumes a firm and rigid valuation, that has never been known to decrease, but for five years has steadily advanced, until now prices are far beyond the anticipations of the most sanguine citizen a few years ago.

DID YOU EVER THINK OF THIS FACT?

One general fact is always very potential with thinking men and women, because it is made up of a multitude of other facts all tending one way. That tendency has all been to advances in Salem real estate. Several hundred sales in the past few months all showing sharp advances constitute the general fact of all-around rise in valuations. This is significant to the most dull and at the dull season of the year.

IF YOU LEAVE THE CITY

Even for a month and approach it from any direction, upon your return you will express surprise and the conviction will be forced upon your mind that "she grows." When a city has the room to grow in that Salem has, and is spreading out into the surrounding prairies, but one thing will result—a great city. Americans love to build a city on a sightly place. On a beautiful river, with natural forest, it is no wonder our city spreads out like another Philadelphia. You need not go to Puget Sound cities to see streets lead out through native forests. That can be seen right here in Salem, where miles of avenues and streets have been graded this year through natural thickets of evergreens.

EXPERIMENTS ARE COSTLY

at all times, but none are so expensive as real estate experiments. In ninety-nine cases out of a hundred a real estate experiment is a clean out-and-out sacrifice, as all know who have tried it. If you are going to do anything at all in real estate that will be satisfactory, get into something that has passed beyond the experimental stage. Salem real estate has, no one doubts that. Whatever doubts anyone may have about any Pacific coast real estate, it does not attach to investments in Salem property. That is certain. You can place money here with a certain assurance of rise. Not a piece of property in Salem held five years that has not advanced one to five hundred per cent. It will do better in the next year than it has in the past. It is impossible in justice to make this statement any milder. Well placed confidence in the Capital City of Oregon will repay you ten-fold more than other places that seek notoriety temporarily and will soon have relapsed into oblivion.

THE BEST PULL IS A PULL FOR YOUR OWN TOWN

if it is a good town, and that's what we've got in our splendid Capital City of Oregon. While the city has doubled and quadrupled since the last census, it has not begun on the growth it will reach in the coming decade, and you want to be in to take advantage of it. We handle property on merit and believe in setting forth the steady growth and solid merit of Salem. That is all that is necessary. No over-statement is required.

ENGLEWOOD!

IS THE FINEST ADDITION TO SALEM. It is High, Slightly, Beautiful, good Soil, convenient to the business portion of the City and cheap, growing right along, new, neat houses, graded streets—a splendid residence locality.

— OUT ON THE GARDEN ROAD —

We have 5 and 10 acre tracts, most desirable and Cheap. In HAMPDEN PARK we also have some choice 5 and 10 acre tracts, and a list of Farm, Suburban and City property, on which we offer the best bargains.

We repeat it, people right here at home might as well have some of our rare bargains as to let them all go to strangers. Come and see us, whether you have much or little to invest. We can give you some eye-openers.

SALEM LAND COMPANY.
