FAIR TRANSPORTATION. - The report is correct that the Union Baggage & Transfer Co., of Portland will send three of their large wagons to Salem to run during the coming fair. The agent of the Portland company seems to think the South ern Pacific cannot be prevailed upon to run a train between this city and the fair grounds during fair week. Salem has not given up the idea that she must have at least one train for that occasion. There seems to be a few persons in the city who think that vehicles can do all the business, but let the most sanguine advocate of vehicles ride out there in a wagon with fifteeen or twenty in it with a cloud of dust surrounding him and he will soon be convinced of the necessity of trains on the road. It may seem much like "vid times." but Salem is a progressive city, and the activity of the times demands that the memories of the past be allowed to sleep. A good many of the people of Salem think it was through the influence of Portland largely that belped to do away with the fair ground trains and now it is in place of the trains. Salem is

A SALEM PEACH ORCHARD. Air Drainage the Big Thing-One Thousand Trees Net \$4.66 a

Bushel. An article in the JOURNAL prepared by B. S. Pague, chief of the State Weather and Crop Bureau, has attracted a great amount of at tention among fruit growers, and in this case the predications of science are borne out by the practical results. Mr. Pague asserted, in the article referred to weekly, Aug. 29,) that corn and peaches can be successfully grown in this part of the Willamette valley wherever sufficient warmth of the night air during time of germinati on and growth can be ecured. This can be secured, Mr. Pague argued, wherever land slopes upwards, and by radiation the air is cooled and as it cools it descends to lower ground. It follows that peaches, corn, grapes and other Brushes, Windowglass, Etc. Sole tender fruits likewise, of course, on Agents for Epicure Tea and Big rising ground are not exposed to the night found on lower or flat lands.

intensity of frosts and cooled air at sad death of Thomas Hunt, one of The two chief causes which counteract the effects of terrestrial radi ation are forest and sheets of water.
