

Royal Baking Powder

ABSOLUTELY PURE

PROGRESS IN INDIA.

What Railroad Building Has Accomplished.

Travelers recently returned from India are impressed with the changes wrought by the introduction of railroads. It may be said that there is hardly ever any stoppage in the work of railroad building in the British East Indies, and connections with the far north have been largely extended in recent times. It is eighteen years since the completion of a line between Bombay and Madras, from the Arabian sea to the bay of Bengal, a line which is over 1000 miles in length, running through one of the most densely populated regions on the globe, and forming a prominent feature of an immense network of railroads with which British capitalists have covered the Queen's East India dominions.

These railroads are working out profound results, tearing up the politics, society, religion, industry, trade and commerce of the hundreds of millions of people who have been planted in India from time immemorial. They have given the British government a far firmer hold upon India than it had before their construction. They do not seem to have shaken the ancient system of castes, but they have unquestionably had a powerful influence upon the life of the Hindoos, liberalizing their minds, undermining their superstitions and offering them all the advantages of extensive intercourse with their fellow-men.

They have given an immense impetus to reciprocity, opening new markets to British manufactures of every kind, and furnishing a new means of outlet for native productions. It is evident to every observer who is able to compare the India of half a century ago with the India of our day that railroads, telegraphs, newspapers, missionaries and the British system of public administration are bringing about profound changes there, and preparing the way for developments that will probably be heard of in the twentieth century.

Mr. Philip Miller, the great English horticulturist, writing in 1740, says: "The best method to have cabbage good is to procure seed from abroad every year, for it is apt to degenerate in England in a few years." The above is a simple illustration of the fact that seed will rapidly degenerate in a few years under favorable conditions. The wise will take heed, therefore, and buy their seeds of D. M. Ferry & Co., Detroit, Mich., whose world wide reputation as the best and most reliable, as well as the most extensive seed growers and dealers, is due to the fact that they take advantage of every circumstance of culture, selection of seed plants, etc., to procure the best possible seeds and keep them up to that high standard. Send your name to the firm's address, and you will receive a copy of their seed annual for 1891 free.

BRIDGE TRAVEL.—Mrs. Jane Pentland, of Halsey, who is laid up with a sprained knee at Dave Matheny's residence across the bridge, undertook to keep track of the amount of travel over the new viaduct a day or two ago. She enumerated fifty-four farm wagons, twenty-six carriages, thirty horsemen and two hundred and nine pedestrians between eight in the morning and six in the evening. The attempt to keep a record on Sunday's travel resulted in bewilderment. It would take two persons to keep accurate count on that day.

Electric Bitters.—This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise.—A pure medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum and other affections caused by impure blood.—Will drive malaria from the system and prevent as well as cure all malarial fevers.—For cure of headache, constipation and indigestion try Electric Bitters.—Entire satisfaction guaranteed, or money refunded.—Price 50 cts. and \$1.00 per bottle at Fry's drug store.

Excitement runs high in this city over System Builder, as everybody is using it for catarrh of the stomach, Consumption—Dyspepsia, Impure blood and to build up the system—it certainly must be an excellent preparation, when everybody speaks so well of it.

Prices Baking Powder

Used in Millions of Homes—40 Years the Standard.

AN OCEAN HEROINE.

She Conquered Mutiny on Shipboard and Saved Her Little Stream which divides the States of Connecticut and New York, in the village of Port Chester, in a pretty cottage, resides a little woman of unassuming manners, whose deed of heroism, as related in the columns of this paper, has won for her the admiration of the press and the people.

January 3, 1895, a little after midnight, and on the ocean near St. Helena, was the good American ship Frank N. Taylor, commanded by Captain Robert K. Clark. Soon after the midnight watch was changed the captain was roused from a sound sleep by hearing his name called in a tone of alarm.

Fearing that all was not right with his ship he hurried up the companion-way in his night clothes. As he neared the top of the stairs he received a number of blows in the face, neck and head, but he managed to see that his assailants were two Manila Indians, members of his crew.

He fell to the floor beneath, where the Indians followed him and plunged their knives into his side, leaving him for dead. The carpenter, the lookout man and mate were asleep in the cabins of the crew, and were locked in or terrified, and the captain, his wife and daughter were left to the mercy of the infuriated Manila Indians.

The captain, faint from the loss of blood, was assisted to the cabin by his wife. One of the lungs of the officer was protruding. The brave woman, with a nerve as firm as adamant and with a care as guarded as that of the skilled physician, forced the vital parts back and sewed up the frightful wound. She then bandaged his face and head and set herself to the task of making their position safe by securing the windows or as in the defense of the cabin.

The precaution was taken just in time, for, firing of the vigil they had kept about the captain's cabin, they determined to finish him. But he and the intrepid woman had as he repelled the murderers, who had broken open the cabin window.

What words can describe the courage of this wife, who stood with firm hand by her husband's side, ready to do or die, hearing meanwhile the tread of 'do Indians' threatening to break down the door.

The skulking crew, by the courage of the wife and captain, were at last urged to action. One of the Indians jumped overboard. The other sought refuge in the hold, and when discovered it was found that he had set the ship on fire. He jumped overboard and was lost.

Then came renewed heroism on the part of the wife. Tenderly the loved captain was nursed in a boat, and after a long and tedious sail of several hundred miles they reached the island of St. Helena, having been nine days adrift in a boat insufficiently provisioned, with a man almost cut to pieces. But the brave woman was the master spirit of the shipwrecked crew, and day she is pointed out as the brave wife of the equally brave Captain Robert K. Clark.
