

TELEGRAPHIC DISPATCHES.
Associated Press Report and Digest of all Important News of To-Day.

WASHINGTON.
QUAY WILL SUE.
WASHINGTON, D. C., Feb. 23.—It is stated that upon his return from Florida Senator Quay, not content with his own general denial, will institute libel suits against the newspaper which originally published charges against him.

CONGRESSIONAL.
WASHINGTON, D. C., Feb. 23.—The house has adopted the conference report on the bill amending the act providing for allotment of lands in severalty to the Indians. Only eight working days remain of the 61st congress.

The Nicaragua canal bill is unfinished business and following it are the pure food bill and Capper land bill, army reorganization bill, interstate commerce bill, bankruptcy bill, land court bill, bill to transfer revenue marine service to navy, and Pacific railroad funding bill.

The silver men expect to make some effort to compel a vote on the silver bill, although, in order to do so, it will be necessary to make some motion, commonly regarded as not within the purview of the rules of parliamentary practice.

ACCIDENTS.
A TERRIBLE WRECK.
SAN FRANCISCO, Feb. 23.—The American ship Elisabeth, Capt. Colard, 112 days from New York, with a general merchandise cargo for Williams, Diamond & Co., went ashore Saturday night at North Head and will prove a total loss. A terrible gale was blowing and three tugs went to the rescue of the ship and succeeded in saving the wife of the captain and three sailors. The other twenty-two persons aboard are thought to have been lost.

CRIMINAL.
CAN'T BE CONVICTED.
SEATTLE, Feb. 23.—The Press says: Concerning criticisms of the manner in which the recent trials of certain mistresses of houses of ill-fame have been conducted and the surprising verdicts of the juries, Police Judge Rives yesterday said: In each instance I have impaneled a jury of 18 reputable business men. From these the rule has been for the prosecution to strike six names and the defense six. Those remaining constitute the jury. I have drawn the names from the city directory.

"As to the testimony the greatest latitude has been given. My charges to the jury have been to the prosecution all that the law would possibly admit. Why convictions cannot be secured is something I cannot understand. It is must be that the juries have not believed the testimony of the witnesses."

LA BLANCHE CONDEMNED.
SAN FRANCISCO, Feb. 23.—"What do you think will be done at tonight's meeting of the board of directors?" a reporter to-day asked Col. McLaughlin, one of the directors of the California Athletic club.

"I don't see what we can do but to decide the match a fake, and it surely was one on La Blanche's part. I think that a man who beat us in this way by training up to the last moment and then going off and getting that, should be dealt with accordingly." The colonel will take this stand at the board meeting.

In betting circles there is much anxiety as to what decision will be given by the directors, who have constituted themselves the tribunal for that purpose. Poolmen and other stakeholders have not turned over any money, contending that the contract signed by the men makes a referee's decision invalid. The general feeling is that Mitchell should be given the entire purse and all bets be declared off.

MISCELLANY.
KEEPING THE DAY.
PITTSBURG, Pa., Feb. 23.—The observance of Washington's birthday has been more general here today than ever before. An equestrian statue of Washington erected by the United Order of American Mechanics, at a cost of \$10,000, was unveiled in Allegheny Park in presence of at least 10,000.

BOUND TO ENTER KANSAS.
KANSAS CITY, Kan., Feb. 23.—As the result of an editorial in the Traveler, a daily paper in this city,

which said that letters had been received from congressman Perkins and others, saying that settlers on the Cherokee outlet strip could hold their homesteads. Thousands of people have gone on the quarter sections for fifteen miles south of the Kansas border, and have occupied. At the lowest estimate 10,000 settlers have gone in.

EDITORIAL FOOLS WHO DO NOT CONFINED THEMSELVES TO WEAPONS OF WIND.
COLUMBUS, Ohio, Feb. 23.—A fatal shooting affair occurred on the most crowded portion of High street today, in which about fifteen shots were fired. The shots were exchanged by W. J. Elliott, of the Sunday Capital, and A. C. Osborne, of the Sunday World, and grew out of an exchange of slanderous articles. A bystander named Hughes was shot through the head and died instantly. Osborne was shot through the head and died soon after, while a brother of W. J. Elliott was shot through the arm and back, and a number of others were slightly wounded.

WIRES DOWN—WASHOUT IN COW CREEK CANYON.
Portland, Feb. 23.—Telegraph wires east are badly down, and reports are light. Owing to a serious washout in Cow Creek Canyon the Southern Pacific's overland passenger train due here at 9:10 this morning will not arrive until 3 a. m. tomorrow. The washout occurred in the same locality as last year.

BANCROFT'S BODY FOUND.
PROVIDENCE, R. I., Feb. 23.—The body of Prof. Bancroft, who has been missing since last Monday was found this morning in Dyer's pond. Mr. Bancroft was professor of Rhetoric and English literature in Brown's university. He has not been feeling well since last December, and Monday went out to take a walk and never returned.

A CANNIBAL TALE.
NEW YORK, Feb. 23.—The New York Herald to-day prints a terrible story from Rio Janeiro, telling of the imprisonment at Salmas, state of Minor Geroges, of a negro, by name of Clement Villasea, who tells without any reserve of the cannibal practices which led to his arrest. He says he was starving and killed his victims to sustain life. He helped consume nearly half a dozen people.

OHIO VALLEY FLOODS—GAS, WATER AND COAL SHORT AT PARKERSBURG.
CINCINNATI, Feb. 23.—No prospect of falling waters and the outlook for the Ohio river flood is growing worse to-day. In addition to the rise at Pittsburgh, this morning's weather reports show there is almost a certainty of additional rains in the Ohio valley within 24 hours. There seems to be a hope in fact of the river falling rapidly at Wheeling and Parkersburg, and also that the head waters of the Great Kanawha are falling. The effects of the flood here at this stage are inconvenient but not disastrous. The lower portions of Newport and Covington are submerged but none of the large manufacturing are as yet interfered with. The waterworks of Portsmouth are stopped by overflow, while Parkersburg has lost all gas and water supply and is in danger of a coal famine.

THE OHIO RISING.
At 1:00 this afternoon the river stood at 55 feet 5 inches, and is rising at the rate of an inch an hour. Reports from up and down the river show many towns flooded.

FOREIGN.
PARNELL'S NEW TACK.
LONDON, Feb. 23.—In his speech Sunday, Roscommon Parnell avoided all allusions to the attacks upon him and he seldom showed signs of excitement. He addressed to his auditors calm and reasoning argument on the subject of Irish home rule, and urged that it would be absolutely folly to accept anything less than the terms which he had demanded. He argued that Ireland was entitled to a parliament, armed with the fullest power to deal with Irish affairs, and subject only to the sovereign veto; that the land and police should be fully committed to Irish care, not after an interval of five years, but immediately upon organization of the home rule parliament. He advised his hearers to think for themselves, as Irishmen, and not as dependent on the opinions and guidance of any English faction or party. Mr. Parnell was cordially received by a numerous assemblage, and some rude attempt to insult him met with no success. It is believed that Parnell intends to pursue the calmly aggressive course which he illustrated in his speech today, and that he will disappoint those who expect to see him indulge in the bitterness which he showed at Kilkenny.

IN FRANTIC GRIEF.
The Spring Hill, Nova Scotia Mine Horror.
SUFFERING AND DESTITUTION PREVAIL.
Total Number of the Dead Now Reaches About 130.

CALL FOR RELIEF.
SPRING HILL, N. S., Feb. 23.—The mayor of Spring Hill has issued a public appeal to cities and towns throughout Canada and the United States, asking for aid in behalf of the widows and children of those killed in the mine disaster. The call says: "Something must be done at once for the relief of the suffering and destitute. From many families all means of support are snatched away. Today there is mourning in many houses and it is evident that suffering will ensue unless the response to this appeal is hearty and prompt."

THE SCENES ON SUNDAY.
SPRING HILL MINES, Feb. 23.—The Sunday effect of this disaster was felt more acutely. Grief was depicted on every face. A searching party entered the mine late at night, and a number of bodies were taken up. Work has been going on steadily. It is expected that most of the dead will be out of the pits today, except those who are buried beneath the falls of the roof. The total number of dead is now placed at 117. Two of those injured died last night. To several families the affliction is very great. Reid Carter and his two sons, Willard and Clarence, are all dead. Jesse Arnishaw went down, and found his three sons and two adopted sons all lying dead together. The sight sickened and unnerved him, so that he had to return to the surface without them. He is frantic with grief. These sorrowful households are only a few from the large number from which bread winners were snatched. To-day one meets everywhere women and children weeping piteously.

The deepest gloom has settled over the whole community. During the night the people were astir and little knots of men eagerly discussed the situation. Some bodies were taken out fearfully mutilated. Those dead who were beyond recognition were identified by their clothing or the marks on their bodies.

The carpenter shop has been temporarily converted into a deadhouse, to which all corpses are taken and there prepared for burial. The clergymen of the different denominations are doing what they can for the grief-stricken ones.

Eleven were seriously injured. Others, who were overcome by the damp, were resuscitated. They are all right today. The scene of the explosion was in the immediate vicinity of the east slope. There the greatest number of deaths occurred. This particular part of the mine was visited by the deputy inspector of mines, Madden, Friday. Madden's statement declared that he found in two places the fire-damp registered from 1 to 1.25 per cent. Ninety-four bodies had been recovered at midnight.

EUPESPY.
This is what you ought to have to fully enjoy life. Thousands are searching for it daily. Thousands of dollars are spent annually by our people in the hope that they may obtain this boon. It may be had by all. We guarantee that Electric Bitters, if used according to directions will oust the demon Dyspepsia and install instead Eupespy. Electric Bitters for Dyspepsia and diseases of Liver, Stomach and Kidneys Sold at 50c and \$1.00 per bottle at Fry's Druggist.

Jas K Smith and wife, Mrs Coy, Aumsville.

Now let Salem appoint a committee to work up our city's interest in a railroad to Monmouth, Independence and Fall's City. Let Salem go ahead.

MURIATIC ACID LAKE.
The Seething, Bubbling Mineral Mass Found on White Island.
White Island is nearly circular and about three miles in circumference, writes an Oakland correspondent of the San Francisco Chronicle. It consists of tall cliffs on three sides formed of rock and loose rubbish thrown up from the crater. On the fourth side is a large flat many acres in extent, broken in two places by tall and fantastic rocky eminences, which appear to have once formed part of the cliffs in which the flats would seem to be a fault. These cliffs are eight hundred feet in height, perpendicular white and gently sloping to the sea. Before you is a vast amphitheater of extraordinary tint. The walls of this basin, towering up to the sky, appear serrated at the edges and intersected along the face by an inextinguishable network of fissures and crevices. Landed in the ship's dingy you the boulder-strewn beach, we find ourselves within the awe-inspiring inclosure of this wonderful place. A large plain of mineral deposit is before one, and on the right is seen a towering ledge to what is known as the Adamant reef. In the center of this plain is the wonderful boiling lake. As we approach it along a well-beaten track the ground becomes of a chocolate color, and at once the visitor is conscious of the most pungent odors as the fumes from the surface of the boiling lake and the base of the surrounding walls of rock reach him. A few steps more and a magnificent scene bursts upon the view. Below you lies the most extraordinary painted picture that poet, artist, explorer, novelist, tourist or special ever gazed upon. The general tone of the ground line is of a deep chocolate, the walls of rock around of that warm color known to artists as madder brown, relieved with rose madder, the edge of the lake a deep orange and the lake itself a blending of the peculiar green of verdigris and lemon yellow. At the base of the rocky issue jets and clouds of vapor. The tint of this lake is probably due to the fact that as the volume of water has lessened the chemical properties in the water have become of greater strength, and some of the most extraordinary hues. The lake is simply a seething, bubbling mass of muriatic acid, and as the liquid boils up the bubbles have their sides in shadow, reflecting a green tinge, the whole surface emitting a vapor that very soon finds out your lungs and tickles the mucous membrane of your nose and throat, to say nothing of bringing to the eyes involuntary tears.

To the right, following the natural basin of the island, is chaos itself—rocks, stones, chasms, streams, pools, lakes, in fact confusion, these latter apparently all alive and each one bent on outshining if not out-noising one another. This was a sort of school-room for the apparent education of small volcanoes. And the hissing, spluttering, choking things could be seen here and there what looked like huge, mammoth golden cauliflower-like boiling. These were sulphur formations.

No animal or insect breathes upon the island. Two hundred yards will reach the bottom within half a mile of its shores. This island is the eastern limit of the extensive belt of volcanic agitation which extends from Mount Etna through Tongareva, to Taupo Rotomahana lakes to White Island and the adjacent rocks, north of which line earthquakes are rarely felt.

An analysis of sulphur deposits on this island made in the New Zealand Geological Survey Laboratory shows that one of yellow sulphur contained 99.9 per cent. of sulphur, that another of green sulphur contained 82.5 per cent. sulphur and that a third of purple sulphur contained 62.05 per cent. sulphur. The chief impurity was gypsum, which does not interfere with its distillation.

MAN-KILLING MACHINES.
Maxim's Automatic Gun That Almost Loads and Fires Itself.
An automatic three-pounder gun, which seems destined to revolutionize the warfare operations of the future, was tested at Eritra a few days ago in the presence of representatives of the War Office, who were so greatly struck by its performance that the Maxim Company has been requested to construct a few of the guns on the same principle, says the London Times.

About six years ago, when Mr. Maxim began his experiments in automatic gunnery, he made certain alterations in a Maxim gun, which while it was fired and the recoil opened the breech by dropping the block in the ordinary way, the block remaining down until another cartridge was placed in position, when the breech automatically closed and the trigger could be again pulled.

The gun lately tried is merely an application of this system on a large scale. It has the appearance of the quick firing three-pounder, is mounted on a cone in the same manner and is fired by a catch on which the shoulder of the trigger rests. When the gun is loaded and the trigger is pulled the barrel of the gun recoils a distance of four inches, the breech remaining closed during the recoil. When, however, the barrel returns to the firing position the breech block is thrown downward, the hammer is cocked and the empty cartridge is ejected, the breech block remaining down until another cartridge is introduced. The act of placing the cartridge in the chamber likewise the block, which rises instantly, closing the breech, and the gun can be fired again.

After firing the gun in the way described the trigger was fixed in the pulled position, a cartridge was fired and its empty shell ejected. On introducing another cartridge it was fired in the same way without the intervention of the trigger, and so on with an indefinite number of cartridges, the gun doing all the work except that of placing the cartridges in the chamber. This gun weighs no more than the ordinary quick-firing gun of the same caliber; the strain on the mounting is less, enabling it to be fired from a light and rapid of damage to the deck, and the rapidity of the fire is increased, with only one-half the usual gun detachment to work it.

Pretty Hawaiian Feet.
Cuban women wear shoes no larger than the No. 1. Nor is this diminutive size the result of any pinching process. She is born that way. That is, her foot. You could hold two of them in your one hand. And, whatever the woman's weight or size, the foot is universally this dainty and beautiful thing. Its arch is wonderful. But one thing about it offends the foreigner's eye. That is the high, narrow heel, two or three inches long and scarcely a third of an inch at its narrowest part. One feels afraid of accidents and contusions from it. But the foot-footed woman is a sure-footed one. She is the most graceful woman on her feet, in her walk and carriage in the promenade or in the dance you ever saw. So this sinewy, yet grace must also be a part of the grain, fiber, blood and very spirit luck of them.

A Wealthy Alaska Squaw.
Mrs. Captain Tom is the name of the richest Indian woman in Alaska. She is worth about \$20,000, and lives royally at Sitka, surrounded by slaves. She supported two husbands until lately, having to give up one when she joined the Presbyterian mission. Mrs. Tom is pretty, fat and over 40 years of age.

YAGUINA NOTES.
Steamer Willamette Valley left here for San Francisco on the 18th with a full cargo of freight and passengers.

The amount of potatoes shipped from here would indicate that Oregon potatoes were at a premium in California.

Steam schooner Geo. H. Chance touched here the 21st to take freight and passengers for points between here and Portland.

Schooner Kate and Ann left her moorings yesterday and will proceed to the Behring sea season as the weather permits. She is well rigged and a prosperous trip is anticipated.

Work at Parker's mill on the government scows will be resumed Monday, having been suspended for one week. The owner of the mill, Hon. Allen Parker, is one of Oregon's Solons.

Rev. Howell and Rev. Brink are holding a series of very successful revival meetings here.

Yaguina has a novel and effective mode of getting rid of its undesirable population. Two fellows this last week shipped between two days for parts unknown.

The pay master for the O. P. railroad came in last week and paid the hands their wages for October. He is expected soon again to pay up for two months more. We assure him that he will be a welcome visitor here at any time.

Coal has been discovered about a mile above Yaguina, near the railroad and the river on the railroad company's land. The company is negotiating with T. Cornelius, who guarantees the company a seven foot vein of coal for one thousand dollars. Chris Germausen will assist him in prospecting the mine. Both men are old experienced miners. If coal is found there in such quantities, as they are confident it will be, it will be a big thing for Yaguina.

Changes of Climate
Kill more people than is generally known. This is the case where the constitution is delicate, and among our immigrant population, especially in those portions of the west, and where malarial and typhoid fevers prevail at certain seasons of the year. The best preventive for change of climate is Hostetter's Stomach Bitters, which not only fortifies the system against malarial, and the debilitating effects of tropical heat, but is also the leading remedy for dyspepsia, indigestion, biliousness, especially apt to attack emigrants and visitors near to the equator, mariners and tourists. Whether used as a safeguard by sea voyagers, travelers by land, miners or agriculturists in newly populated districts, this fine specific has elicited the most favorable testimonials.

SALEM MARKET REPORT.
A Synopsis of the Markets—Buying and Selling Prices.
REVISOR QUOTATIONS.
Shoulders Sugar cured, per lb, 12 1/2
Breakfast bacon 12 1/2 to 13
Hams—Sugar cured, per lb, 10 1/2
Pork—Salt 12 1/2
Mutton—10 to 12 1/2
Veal—10 to 12 1/2
Timothy seed—Per pound, 7 1/2 cts. selling.
Red clover seed—Per pound, 15 cts.
White clover seed—Per pound, 20 cts.
Alfalfa—10 to 12 1/2 cts.
Red top—10 to 12 1/2 cts.
Crested grass—10 to 12 1/2 cts.
Brome—10 to 12 1/2 cts.
Oat meal—10 to 12 1/2 cts.
Hens—Per dozen, 3 1/2 to 4
Blackberries, 50 cts, best grades
Hens—Per dozen, 3 1/2 to 4
Green Fruit, Choice apples 7 1/2 to 8 cts.
Box, pears 10 to 12 cts; potatoes 6 to 8 cts.
Mushrooms 10 to 12 cts; onions 5 to 6 cts.
Fish, Salmon 12 to 15 cts; per lb, salt salmon, 7 to 8 cts.
Butter—10 to 12 1/2 cts.
Wheat—42 1/2 cts.
Flour—Per barrel, \$4.00, best 100 lbs.
Oats—Per bushel, 45 to 50 cts.
Hay—Per ton, \$10 to \$12, milled, sacked.
Shorts—Per ton, \$17 to 18, "sacked.
Coke—Per ton, \$2.50 to 3.
Hops—Quoted at 30c per lb.
Eggs—20c per dozen.
Potatoes—Per bushel, 40 cts.
Corn meal—30c per pound.
Dried plums—Per lb, 60 cts.
Dried prunes—Per lb, 10 to 12 cts.
Butter—10 to 12 1/2 cts.
Hams—10 to 12 1/2 cts.
Bacon sides—10 to 12 1/2 cts.
Shoulders—10 to 12 1/2 cts.
Chickens, 7 to 10 cts per pound.
Turkeys 10 to 12 1/2 cts per lb.
Geese 7 to 10 cts per lb.
Quacks, 12 1/2 to 14 cts per lb.

THE PROBLEM SOLVED—An Unrivaled Blood Purifier.
Found at last in Hibbard's Rheumatic Pills. A remedy which expels all poisonous matter from the blood. A well known citizen of West Lebanon, Ind., testifies to its value.

"I find much pleasure in stating that my wife has received greater benefit from Hibbard's Rheumatic Pills than from any other medicine for rheumatism. We find it to be the best family remedy and the greatest blood purifier we have ever used. It is true, it is claimed to be by its founder. You cannot receive it too highly."

FRANK WALLACE, West Lebanon, Ind. Sold by Smith & Metzger.

Take Hood's Sarsaparilla in 10 Doses One Star

The Chief Reason for the great success of Hood's Sarsaparilla is found in the article itself. It is said that wine, and the fact that Hood's Sarsaparilla actually so simplifies what is claimed for it, is what has given to this medicine a popularity and sale greater than that of any other sarsaparilla or blood purifier before the public. Hood's Sarsaparilla cures Scrofula, Salt Rheum and all humors, Dyspepsia, Indigestion, Bileousness, Constipation, Throat Swelling, Strains, Appetite, Strengthening the System, Inside of the Whole System. Hood's Sarsaparilla is sold by all drug stores. Prepared by C. L. Hood, Lowell, Mass.
