BATTLING WITH SNOWBALLS.

Struggle Between the Girl Sophs and Freshies of Smith College.

Smith college girls have just had a novel experience. It was a snowball battle between the "sophs" and "fresh when everybedy speaks so well es," and the former won after a spirited | it. fight. The sophs were led by Capt. Wileox and the freshies by Capt. Gain. The young ladies were drossed in their 'gym" suits, and were prepared for a regular rough and tumble racket. The signal for the commencement of hostilities was given by the gymnasium instructor, Miss Adams, and the fun began. Capt. Wilcox's shot hit a daring freshman in the front rank directly on the right ear.

A cheer went up from the fort, and the old gold banner was waved aloft; but one shot does not win a battle. The freshmen had marched upon the came trotise tree. Dr. Bosank pus with a determination to win the Soid by Smith & Stetner. ort, and the flag if they could, in the half hour allotted to the battle. The most reckless sallied up to the very walls. Here they met a perfect volley of grapeshot, from which all but one tall, handsome brunette flinched.

She threw three balls inside the fort at three of the largest sophomores with unerring aim. One hit a set of dazzling white teeth, another would have pierced the heart had it been a bullet, but before the third had taken effect there was a sophomore cheer. A bold sortic had been made, and sophomores were manling the daring besieger, but or a moment only. The freshmen rushed back like a drove of prairie ponies wildly charging. Then began a hand to hand encounter which muddied the amateurs with kodaks awfully. It was muscle, and nothing else.

"Why, those horrid things actually threw me down and walked on me. said one of the sophomore lieutenants indignantiv.

The cascades of hair came tumbling down like Humpty Dumpty, and one Syrup of Figs is taken; it is pleasant warrior's eye had a dismal hue. There was some "tackling" that would have done credit to football at Jarvis field. The Chicago and Pennsylvania recruits distinguished themselves by special acts of bravery. Again and again did the crimson freshmen enter the in 50c and \$1 bottles by all fort, until it looked as though they would rout the gold utterly, but the plucky sophs succeeded in driving back the invaders at every onslaught. When the bugle blew at the end the sophomores held the fort, with their golden banner still floating.-Cor. New York

Manners, Not Mannerism. "Mon's behavior," observes Bacon. should be, like their dress, not too straight or point device, but free for exercise or motion." There can be no genial fellowship between affable, courteous people and your stiff backed formalists; while the intercourse of the latter with one another is necessarily nots de Comptes Courants is in a By so doing you will confer a favor dull and dreary to the last degree. They can no more enjoy society in their strait fackets of cold reserve than a wretch in the stocks could enjoy the hilarity of the crowd around him. Whoever desires to make friends millious. The directors of the bank cat, can't sleep, can't think, can't do should be cordial and conciliatory.

Australia's Pastoral Areas

Australia has in her vast pastoral areas sources of wealth as great and St. Clair county, Illinois, in 1814, more permanent than those of her and was 76 years and 9 months old. mines. Already she has nearly 100, With her husband, Samuel Kinney, 000,000 of sheep, which in the mild NEW YORK, March 12. Senator she came to Oregon in 1847 and set- climate and under the sunny sky of the Stewart in an interview yesterday tled in Yamhill county, where she country require no shelter throughout lived till his death in 1875, since the year and no food beyond what which time she has made her home they get on the open plains. It is true that the summy sky may change to a sky of brass, and that drought is the dread of the Australian shepherd, herdsman and farmer. Occasionally there is a succession of dry seasons, and then sheep have perished by millions and cattle by thousands on the more remote stations.

To master recurring droughts is the great problem of Australia's inland future. Here, as elsewhere, nature challenges man's free advance and places some special obstacle in his way. Australians are facing their task with energy, confidence and with promise of much success. They have learned the yet to find a case of Catarrh that it art of drawing wealth even from scrub land, of which a single sheep requires several acres for its support. Irrigation works on a large scale have been begun in Victoria and south Australia -Century.

Baising Sand by Suction. An improved process for raising sand F. J. CHENEY & Co Props. To- has been patented in England. A barge is used, having a tank to receive drainage or overflow of water there from. A pulsometer or other pump is furnished with a suction pipe-part rigid and part flexible-to reach to the bed or bank of sand, which is drawn pass. Two receive first grade, through it and deposited in the tank seven second and sixteen third grade Around the mouth of the suction pipe are placed a number of hollow prongs. suitably connected with another pump Through these prongs jets of water from the water hole of the barge are forced, and the sand thus loosened is readily taken up by the suction pipe. -New York Telegram.
