THE 4.50 PER CENT.  
WASHINGTON, June 3.—Notice was given yesterday by Secretary Foster that the principal and interest of such 4 per cent. bonds issued under the acts of July, 1870, and January 20, 1871, as being outstanding on the 24 day of September, 1891, will be paid on that day and interest on said bonds will then cease.

SUGGESTIONS HAVE BEEN MADE OR THE part of some holders of those bonds, that of a desire to extend the payment thereof at option of the United States at the rate of one and one-half per cent. per annum, and the secretary of the treasury will hereafter consider whether acceptance of such offers or any of them will be profitable to the government, and in that event he reserves the right to except such bonds from his call. It is officially stated that the suggestion as to extension of the 4 per cent. loan added to the call made today, is made more as a matter of precedence than of necessity. The treasury department, it is said, is abundantly able to pay all of the fifty one million 4 per cent. out standing, but in view of the uncertainty of future receipts and expenditures, it is deemed better to take the side of safety. The secretary not only believes he has ample means to defray all expenses of the government, but is confident he will be able to retire a considerable amount of the public debt in addition to the \$236,000 already paid during the present administration.

IRELAND AND THE IRISH.  
LONDON, June 3.—The Irish census shows a total population of 4,706,162, of whom 2,317,076 are males. This shows a decrease in population of 468,674 since the last census. This result has caused some surprise, showing as it does notwithstanding the condition has improved in some respects, the country continues to lose population. It is the first census in this century that has shown the population of Ireland below the 5,000,000 mark. In 1801 the figures were 5,395,456, over 600,000 more than the present population. It was thought that the home-rule movement during this decade would have diminished the tide of immigration, but such does not seem to be the case.

CHARLESTON EXPECTED A FIGHT.  
SAN FRANCISCO, June 3.—A private letter just received from an officer on the United States cruiser Charleston describes the warlike preparations on the cruiser at the time she entered Acapulco harbor, while on her chase after the Chilean steamer Itata. The letter says the Charleston arrived at Acapulco at 7:30 a. m. May 16, and at 4 o'clock in the morning she encountered the Esmeralda. The Charleston was endeavoring to enter the harbor unobserved, but the Esmeralda threw out her search lights and all hands on the Charleston were called to general quarters and the ship was cleared for action. The crew were at their stations for three hours as it was supposed the Itata was in the harbor and everything was in readiness to take her. Six and eight-inch shells were piled on the deck and every gun was loaded. The Esmeralda followed the Charleston into the harbor, but the latter left and resumed her chase as soon as possible.

Kohlhaas of Chicago. From all directions crowds have poured into town since last night and fully 20,000 are now here. The city is in gay apparel, the main thoroughfare is one panorama of red, white and blue, arches are upon the principal crossings and mottoes betoken the reverence in which the name of the hero of Appomattox is held by his old neighbors are promiscuously displayed. CONFEDERATE VETERANS.  
JACKSON, Miss., June 3.—Five years labor and effort on the part of the women of Mississippi culminated today in the unveiling of a monument to the confederate dead of Mississippi. Ex-confederates, their wives, sons and daughters are here from all parts of the South. Several Eastern and Western states are also represented. The total number of visitors are estimated at about 20,000. Early this morning a reception was tendered to the confederate veterans at the capitol building. At 10:30 the procession began to move. Ten companies of Mississippi National Guards came first, behind them, and drawn by ten white horses came a float carrying fifteen young ladies representing the Southern confederacy and the different states which composed it. Next to the float came the officers of the ladies monument association, the organization under which the monument was erected. Then came distinguished visitors from abroad and confederate veterans in carriages.

Then the organized body of confederate veterans and sons of confederate veterans. The procession which was two miles in length was greeted with cheers by the crowds which lined the streets through which it passed. The stars and stripes were carried at the head of every division and floated from the capitol, side by side with them were carried the torn tattered confederate battle flags.

The monument was unveiled by Mrs. Margaret Davis Haines, daughter of Jefferson Davis, amidst prolonged applause. Senator Waltham delivered the oration upon "The Confederacy" which elicited repeated applause. Gov. Lowry followed with a brief oration on the life and character of Jefferson Davis in course of which he said: "When partisanship had given place to sober reason and judgment, historians would accord the late president of the confederate states a front rank among the great statesmen of his day as well as those who preceded him."

AN IMPOSTOR.  
KANSAS CITY, Mo., June 3.—A number of business men, citizens of Kansas City, met Monday as a vigilance committee, and decided that Schweinfurth, the self-styled Christ, from Rockford, Ill., who is visiting and holding meetings here, is an abominable impostor. It was decided that he should be made to leave the city, or suffer the consequences. The committee sent a notice to Schweinfurth to leave within twenty-four hours, on pain of being treated to tar and feathers. Schweinfurth declined to send a reply to the committee by the messenger. The twenty-four hours expire at midnight.

Spreckles & Bros. to send two tow boats up to the sound guaranteeing them all the business they can handle at fair rates. Reason is said to be that towing prices on the Sound have gone up to unreasonable figures. ## A FARCE IN REAL LIFE.

### How People with Good Intentions Get Into Awkward Situations.

One of the best known literary men of Boston has two sisters. One is unmarried and keeps house for him and two or three congenial friends. The other is married to a gentleman who is an amateur politician—statesman if you prefer. Not long ago this statesman was called from home on some important business and expected to be gone over night. His wife sent to her sister to come and divert her in her temporary divorce. But this was impracticable, and word was sent to that effect.

Shortly after the messenger had departed it occurred to the sister that she might at least ask one of her brother's friends to go and stay in the house and frighten away possible burglars. About 9 o'clock a young man rang the door bell of the statesman's house, and when the servant appeared walked in without being invited, much to the alarm of the maid, for her mistress had accepted a sudden invitation to the theater.

The young man, annoyed at the persistency with which the suspicious servant kept guard on him, and finding nothing better to do, made his way to the spare room, went to bed and soon fell into the dreamless sleep vouchsafed by a clear conscience and a good digestion. The house was still. No lights shone in the windows. Stealthy steps mounted to the front door. It was the master of the house, who had unexpectedly returned, and finding no signs of life supposed that the family had retired. He noiselessly opened the door, noiselessly climbed the stairs, and with the intention of not disturbing his wife, went to the spare room, which was wrapped in profound darkness.

He flung his grip sack on the bed. It struck the sleeping visitor full in the stomach. There was a rude awakening. "Who are you?" called a startled voice from the pillow, and "Who are you?" answered indignantly that voice which had so often charmed select audiences at political meetings. A hand-to-hand conflict was only averted by the quick ear of the visitor, who recognized the statesman's sonorous voice.

The statesman and the guest talked a little while, and then the former went to his room. He was just about falling asleep when his wife came home from the theater, looked the front door, which the statesman had forgotten to do, and went up stairs. She wore her best dress and usually kept it in the spare room closet. She therefore returned to the spare room to remove it. Then her husband came to her rescue. He heard her steps. His keen intuition leaped to the right conclusion. He sprang out of bed, ran to the door, opened it on a crack, and in a stage whisper gave her to understand that there was a young man sleeping there. In the morning explanations were in order on all sides, and much Homeric laughter was evoked. Here are the elements of a farce from real life which might be worked up into equal popularity with Mr. Howells' "Sleeping Car" or "Elevator."—Critic.

Fugate's Limited Education.  
The Empress Eugenie, though naturally intelligent, was in some respects extremely ignorant. Educated as were the high born young Spanish girls of her generation—that is to say, not educated at all—she was forced all through her palmy days to struggle against this great disadvantage. She never could learn the art of spelling, and all her private notes and letters are thickly peppered with faults of orthography. She ascended the throne at the age of twenty-six—a period in life rather late for the commencement of one's education.

But, to her credit be it said, she did her best by incessant reading to supplement the defects in her early mental training. She spoke English to perfection, and the emperor and she were wont to converse in that language when they did not want their attendants to know what they were talking about. She was an elegant and fearless horsewoman, and her skill in equestrianism was among the first of her accomplishments that attracted the notice of Napoleon III, himself an accomplished rider. But her principal talent was for art, and she drew in crayon exceedingly well.—Cor. Philadelphia Telegraph.

Patens in California.  
Although it has been shown that the climate of certain parts of California is suited for the growth of the date palm, but little effort is made to introduce the species into general cultivation there. The reason alleged for this is that too many years must elapse after planting before the trees come into bearing. Here and there, however, there are a few specimens that, having come to maturity, yield good crops. On the farm of Mrs. M. H. Wolfskill, on Patah creek, Solano county, in the Sacramento valley, are four of a Persian variety, of large proportions and great beauty. They are thirty-four years old, and bear fruit of good quality. Two others of the African variety, of about the same age, are growing on the neighboring farm of J. R. Wolfskill. The date palm is the palm of the Bible, and has handsome drooping fronds from eight to ten feet long.—Philadelphia Ledger.

A Significant Present.  
Mrs. Benson—What did your husband give you as a present for your wedding?

Mrs. Benson—The mean thing gave me a handsomely painted deuk deuk.—Munsey's Weekly.

The Way is Marked.  
The publisher of the present day for the production of everything that will contribute to the material welfare and comfort of mankind are almost unlimited, and when Hyrup of Pigs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to cleanse the system gently in the Spring-time or, in fact, at any time, and the better it is known the more popular it becomes.

A Miracle of the Nineteenth Century  
Owing to a bad state of the blood, I have been afflicted with rheumatism for twenty years. I have expended large sums of money for remedies recommended to me, and from using powerful liniments, my joints and knees had long nearly given out. When I commenced to take Hubbard's Kidney and Bladder Cure, I felt a relief from all my afflictions, and in a few days I was enabled to walk without the aid of a cane. I can now move with ease and walk without my cane. I am relieved of all my ailments, and the merits of this wonderful medicine are well known to all who have tried it.
