

his mind to be more democratic in the future. He stated in a winning way, and there was an utter absence of the stolid hauteur which the prime used to wear to such effect.

FROM FRANKLIN MINES.

Harmonious Republican Convention in Iowa.

SEX. BRICE WRITES A LETTER.

Tried to Break Jail, Drowned While Bathing, Killed his Brother, Earthquake, Sausage Meat, State and Foreign News, Etc.

FRANKLIN MINES.

SEATTLE, July 1.—Everything is quiet at Franklin today, the presence of the militia on the ground between the hostile forces restraining both from continuing the race war, but from New Castle, Black Diamond, and Gitman, come threatening rumors that denote serious trouble within the next forty-eight hours. There are now nearly two hundred negroes at work at New Castle, the number taken there Sunday having been quietly augmented since.

The strikers have done nothing yet, but are reported as making secret preparations for some decisive move, the character of which can not be told. Company D, now at Franklin, has been placed under marching orders, and will be taken to New Castle thirty miles away in a special train kept ready for the purpose, on the first intimation of trouble there. At Black Diamond the situation has changed for the worse. When the miners struck six weeks ago, it was not because of any dissatisfaction with the Black Diamond Coal company, but because of sympathy for the miners who had been driven out by the negroes taken into Franklin by the Oregon Improvement company, which is a rival of the Black Diamond corporation, and it was supposed the men would return to work as soon as matters cooled down. One week ago the miners agreed to return to work upon the old terms, but Tuesday they notified the superintendent that, if they returned, the miners' union must have the employing and discharging of all men. This the superintendent refused to accede to, and he immediately posted a notice that any white man who wishes work may secure it, whether he belongs to the union or not.

The Black Diamond is only a short distance from Franklin, and the camps will probably join forces in fighting the two corporations. A detachment of militia is held in reserve to move to Black Diamond upon a moment's notice. At Gitman, home guards, composed of miners, are drilling daily. The Seattle Coal and Grain company has been sending up a few non-union miners daily, but they have been met at the train by a large body of armed men.

A large force of guards and deputy sheriffs are at Gitman for the purpose of protecting all men who wish to go to work, but out of one hundred sent only eight or ten have dared to stay, and these have a strong guard protecting them day and night. It is thought that the company will take in several hundred men today, protected by Company E, now assembled in the armory here, and that a military guard will be maintained until the strikers give up the conflict. A large number of rifles were shipped to Gitman from Tacoma today.

It is thought that within the next forty-eight hours every coal-mining camp in this county will be manned by non-union miners, working under the protection of the national guards. It is feared that serious trouble will result at all the places, as there are over one thousand strikers, who will see in the introduction of negro and scab labor the disappearance of their last hope of employment in the mines of King county.

IOWA REPUBLICANS. CEDAR RAPIDS, July 1.—The Iowa republican state convention meets in this city today. It is believed that Hiram C. Wheeler, of Odebolt, Sac county, will be nominated for governor on the first ballot. He is an extensive farmer and stock raiser. Lieut. Governor Alfred N. Poyner will probably be re-nominated.

REPUBLICAN CONVENTION IN IOWA. CEDAR RAPIDS, Iowa, July 1.—One of the most enthusiastic republican conventions ever assembled in Iowa convened in this city today. The convention was distinguished for its harmony and good feeling as have been most conventions of recent years for their discord and dissensions. Among the audience are many persons of state and national reputation. Mrs. J. Ellen Foster, representative of the Non Partisan Woman's Christian Temperance Union was at the head of a delegation of enthusiastic lady republicans who occupied a private box. Promptly at 11 o'clock Chairman Mack of the state central committee called the convention to order, John Y. Stone was chosen as temporary chairman. In assuming the chair Stone made a rousing speech which was interrupted many times by applause, having thanked the convention for the distinction of being called upon to preside over it he said the most important crisis is upon us, the political power of state is at stake, and the good results achieved by the republican party during its life of 30 years are endangered by the 600,000 party in Iowa. He said he is in a state of mind to give his life for the party.

NEW AGENCY. The White Sewing Machine hereafter Exclusively Handled by Mrs. C. Will.

SALEM, Or., June 18, 1891. We have today changed the agency for our sewing machines in this territory, having passed it in the hands of Mr. Geo. C. Will, two doors north of post office.

WHITE SEWING MACHINES Co. By C. A. H. WARDEN, law firm

of Odebolt, Sac county was nominated on first ballot.

PERSONS FROM THE DIFFERENT STATES ARE REQUESTED TO REPORT TO THEIR RESPECTIVE COMMITTEE CHAIRMEN AT ONCE.

THE POLAR BEAR.

Thanks to the high latitudes which it inhabits, the polar bear is not likely to be killed off. The polar bear is an enormous animal, weighing about as much as a fair sized ox, but it is not at all fierce, and will always run away, so that it is not hard to kill. I once saw an Aleut woman dispose of one in a very remarkable manner. She saw it asleep on the ice, and approached it with great caution from the leeward side, having previously improvised a weapon by fastening the knife she carried to a stick with laces of seal leather which served to hold together her garment. Having got close to the unconscious beast, she thrust its spear deep into the body behind the left foreleg. It died almost without a struggle. It is a curious fact that the liver of the polar bear is actually poisonous, though the meat is very wholesome, and toothsome as well, resembling beef somewhat.—Chicago Herald.

A DREADFUL CHARGE.

Some twenty years ago, when prosecutions for "ritualism" were in vogue, a high church clergyman was appointed to a country parish near to a low church town. He was youngish and unmarried, and so was his curate. The local newspaper, ever zealous for evangelical truth, soon informed its readers of the new rector's crimes. He turned to the east; he loved to the Gloria; in the pulpit he wore a surplice; that characteristic garment of the scarlet woman. And there was one accusation which touched both the rector and his curate. "Will it be believed," said the pious print, "that they openly practice celibacy, even in the public streets?" This was meant to arouse, and no doubt it did arouse, the spinners and widows of the neighborhood to a timely vindication of the rights of woman.—Notes and Queries.

Sanitary Item.

Gilbroy—Rheumatism again!

Hostetter's Stomachic—Yes, and complicated with grip. The thought that I might not live to enjoy it is the only thing that keeps me from committing suicide.—Texas Sittings.

The Great Benefit.

Which people in run down state of health derive from Hood's Sarsaparilla, conclusively proves that this medicine "makes the weak strong." It does not act like stimulants, imparting feebly strength, but Hood's Sarsaparilla builds up in a perfectly natural way all the weakened parts, purifies the blood, and assists to healthy action these important organs, the kidneys and liver.

THE WOOL CROP.

This year's crop will be a success. Clean gobs and low prices have largely increased the trade at the Salem Woolen Mill Store.

DOCTORS CLAIM THAT TONSILLITIS IS CONTAGIOUS THROUGH KISSING.

Is tonsillitis contagious? Is a question which has been puzzling many prominent physicians of late.

During the past two years a great increase in the number of cases has been noticed, until at present it almost resembles an epidemic, but hitherto has not been considered a contagious disease.

In an interview with a prominent physician I learned that the only way of overcoming its progress is to protest against kissing. These are his own words:

"Any charming young lady possessing a sweet, rosy mouth, with a voice upon which phlegmonitis has fastened itself, cannot be kissed without phlegmonitis being the price paid by the person who takes part with her in the dual bliss. Her perfumed breath, with its silvery tones and soft whispers, is filled with marvelous, form fly to new fields of pasture. Hosts of cunning but riotous bacteria linger upon her coral lips waiting to board those of the unsuspecting one who recklessly approaches."

"Thus it is very plain that young gentlemen and their sweethearts should be very careful that no kissing is done before it is learned by both parties whether tonsillitis has settled in the throat of either."

"Phlegmonitis," said the doctor, "is a sort of tonsillitis. The ordinary commonplace tonsillitis is not contagious. Indeed, the ordinary form is merely an inflammation of the tonsils, which are glands in the back of the throat with secretions aiding the process of swallowing. An invasion of the glands by hosts of lipothrax, a bacterium, which is normal in the mouth, are the cause of this most troublesome inflammation. They are a vegetable microbe, which is always raging in the mouth and is nourished by the saliva and bits of food that get into the holes of decayed teeth. This is the reason why people who have had bad teeth are more apt to be troubled with tonsillitis."

The doctor paused for a moment and continued:

"Although phlegmonitis is an inflammation of the tonsils it is vastly different from the ordinary tonsillitis, as it is contagious and the inflammation extends all through the entire mouth and all adjacent tonsils. Then, too, the ordinary tonsillitis very seldom lasts longer than a week and can be cured in about twenty-four hours, while phlegmonitis lasts longer, is more severe and harder to cure."

"Many great singers have been troubled with it, among whom are Patti, Nilsson, Lucca, Campanini and others."

Thus it is evident, if the decision of prominent physicians may be believed, that kissing is really a dangerous pleasure, and that those who take part in the dual bliss should be very cautious not to approach their real enemy as a friend with open arms only to be deceived by the friendly greeting of its spy who awaits them with a fascinating smile, while behind the scenes an army of bacteria is impatiently waiting the time which is sure to come when they can spring upon the innocent person who is conquered by its cunning, scheming ways.

But will this advice of these physicians be considered?—New York Herald.

CRIME CAUSED BY JEALOUSY.

MOBILE, Ala., July 1.—From the backwoods of Baldwin county comes a report that Lesse Cartwright shot and killed his brother John and afterwards cut his own wife's throat. Jealousy was the cause.

SAUSAGE MEAT.

CHICAGO, July 1.—An officer of the health department asserts that he has discovered that the fresh of broken down, emaciated and diseased horses is being made into sausage meat and sold in the poorer quarters in the city. An investigation is made.

FOREIGN.

MUST NATURALIZE OR LEAVE.

LONDON, July 1.—The Odessa correspondent of the News says: Governor Kieff of Podolia and Volynia has issued a decree announcing that all foreigners of those provinces must either become naturalized citizens or leave the country. Decree is aimed at popular German colonies adjacent to the Austrian frontier.

NOTES FROM LONDON.

LONDON, July 1.—Gladstone was able to take a short walk yesterday. The stopping of the tin plate works, it is estimated, will keep 750,000 boxes of the market, the average consumption being 1,000,000 boxes per month.

A deed has been signed renewing the advance to the Murrlettas until February 1892. The deed gives them the option of redeeming the securities pledged.

Dispatches received here from Constantinople state the sultan of Turkey has ratified the Brussels anti-slavery convention act.

AN EARTHQUAKE IN ITALY.

ROME, July 1.—Inhabitants of province Verona last night were thrown into a state of excitement and fear by a series of severe earthquakes shocks. Houses in some cases collapsed. In spite of the damage done there was no loss of life.

INTERNATIONAL CONGRESSIONAL COUNCIL.

LONDON, July 1.—One hundred American delegates arrived to attend the annual meeting of the International Congressional Council of London July 13. They will be entertained at a public breakfast.

FROM CHILL.

LIQUOR, July 1.—There is rumor of heavy fighting between the Huasos and the forces at Coquimbo, on land and sea.

KISSING DANGEROUS.

Doctors Claim That Tonsillitis Is Contagious Through Kissing.

Is tonsillitis contagious? Is a question which has been puzzling many prominent physicians of late.

During the past two years a great increase in the number of cases has been noticed, until at present it almost resembles an epidemic, but hitherto has not been considered a contagious disease.

In an interview with a prominent physician I learned that the only way of overcoming its progress is to protest against kissing. These are his own words:

"Any charming young lady possessing a sweet, rosy mouth, with a voice upon which phlegmonitis has fastened itself, cannot be kissed without phlegmonitis being the price paid by the person who takes part with her in the dual bliss. Her perfumed breath, with its silvery tones and soft whispers, is filled with marvelous, form fly to new fields of pasture. Hosts of cunning but riotous bacteria linger upon her coral lips waiting to board those of the unsuspecting one who recklessly approaches."

"Thus it is very plain that young gentlemen and their sweethearts should be very careful that no kissing is done before it is learned by both parties whether tonsillitis has settled in the throat of either."

"Phlegmonitis," said the doctor, "is a sort of tonsillitis. The ordinary commonplace tonsillitis is not contagious. Indeed, the ordinary form is merely an inflammation of the tonsils, which are glands in the back of the throat with secretions aiding the process of swallowing. An invasion of the glands by hosts of lipothrax, a bacterium, which is normal in the mouth, are the cause of this most troublesome inflammation. They are a vegetable microbe, which is always raging in the mouth and is nourished by the saliva and bits of food that get into the holes of decayed teeth. This is the reason why people who have had bad teeth are more apt to be troubled with tonsillitis."

The doctor paused for a moment and continued:

"Although phlegmonitis is an inflammation of the tonsils it is vastly different from the ordinary tonsillitis, as it is contagious and the inflammation extends all through the entire mouth and all adjacent tonsils. Then, too, the ordinary tonsillitis very seldom lasts longer than a week and can be cured in about twenty-four hours, while phlegmonitis lasts longer, is more severe and harder to cure."

"Many great singers have been troubled with it, among whom are Patti, Nilsson, Lucca, Campanini and others."

Thus it is evident, if the decision of prominent physicians may be believed, that kissing is really a dangerous pleasure, and that those who take part in the dual bliss should be very cautious not to approach their real enemy as a friend with open arms only to be deceived by the friendly greeting of its spy who awaits them with a fascinating smile, while behind the scenes an army of bacteria is impatiently waiting the time which is sure to come when they can spring upon the innocent person who is conquered by its cunning, scheming ways.

But will this advice of these physicians be considered?—New York Herald.
