CALL HIM DOWN.—The callow

snipe who has been working Salem for a month past in the interest of the \$17,000 business directory should be called down. He has tried to bulldoze a number of our business men into taking space, telling them they would not be able to get their names into the book at any price unless they paid what he asked. He is especially severe on our hotel facilities, manufacturing concerns, and in his comments on THE JOURNAL, and his animosity is easily understood when it is known where he makes his business headquarters. The gift enterprise publication will far outdo any other man in Salem to work it up.

BOARD OF TRADE.—At a regular

meeting of the board of trade held at the Willamette parlors last evening it was decided not to continue membership in the state board for the present. The amendment to by-laws increasing monthly dues to \$2.50 was changed to \$1.00 per month and passed. Secretary J. L. Mitchell tendered his resignation, which was accepted, and a vote of thanks returned for his past services. Landlord A. I. Wagner was elected to fill the vacancy. The soliciting committee was granted further time to report, and the board adjourned to meet at the same place Tuesday evening, Nov. 17th.

A CARD.—Mrs R. S. Wallace

desires to express her gratitude to kind friends for assistance and sympathy during the sickness, death, and burial of her beloved husband; and to assure the people of Salem that she will cherish in grateful remembrance the spontaneous expression of grief at his loss, and esteem for his character and work, so universally manifested by them.

RUNAWAY.—Chas. Youke's horse

started to run on State street this morning at 9:30 from in front of Martin's jewelry store. At the first jump the horse tore a wheel off the top buggy, at the third he fell flat in the mud in front of Patton's book store and six men were covered with mud trying to hold him. Mr. Youke was in great danger for a few minutes.

PROBATE.—In estate of Sarah E.

Hubbard, petition to admit will to probate granted, and T. W. Davanport appointed administrator with will annexed. Bond \$4,000. In guardianship of Frank O. Johnson, Albert A. Johnson appointed guardian, bond filed in sum of \$600 and letters issued.

FIFTY DOLLARS REWARD.—A

standing reward of \$50 is offered for the arrest and conviction of any person found tampering or interfering in any manner with the electric service lamps or line in this city, see Holman, 11 3 31.

Of Chinaman Dr. Kum asking to raise front of building, put basement underneath it, etc. Granted.

For refusal of \$2 to A. N. Bush for taxes erroneously paid for Mrs. Mumper. Granted.

The council adjourned.

IN THE NEW BOOK.—A fine new marriage record has been opened by the new city clerk. It will hold six hundred evidences of matrimonial intent and the first to take advantage of the new volume are Eugene Willis, age 32, and Miss Lydia M. Hefty, age 22. Mr. Willis is the happy first man in it.

IN IT.—The boys out at the "Electric" grocery are jubilant these days. A meat market has been opened next door and trade is "A. I." That is what makes them so happy.

Can you write? If you cannot, one of Johnson's gold pens sold only by Dearborn the bookseller, can write with scarcely any exertion on part of the holder. Try one.

REFUL THE MUD.—There is a kind of shoes that will do it, and R. J. Fleming on State street keeps them.

STAY!—Would you have the benefit of years of experience when you buy the necessities of life? Then go to Farrar & Co.

ON FIRE.—Many a man's brain is on fire these days for a good hot meal. Heinenbrand's is the place to get it.

W. T. McFadden of Corvallis is in the city, having some cases before the supreme court.

It is a good deal to expect of a Democratic legislature to elect a Republican senator, as one publication proposes.

Hon. Ed. Parkhurst has just returned from a month's visit in Iowa, when he says things are in the best possible shape. Silk umbrellas newly covered while you wait at I. L. Kimbers, 256 Com. St.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore constitutional treatment. Hall's starch Cure, manufactured by F. J. Cheney & Co., Toledo, O., is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood, and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. CHENEY & Co., Toledo, O. Sold by druggists, 75 cents.

Don't forget the auction sale of E. S. Bollinger at the Evangelical parsonage Thursday afternoon at 2 o'clock.

The World Enriched.

The facilities of the present day for the production of everything that will conduce to the material welfare and comfort of mankind are almost unlimited, and when Syrup of Figs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to cleanse the system gently in the Spring-time or, in fact, at any time, and the better it is known the more popular it becomes.

Reminded Him of Business.

A man who was not entirely dissociated from the market business, and whose place is not a thousand miles from here, went to the White mountains with his family to spend his vacation. He chose a hotel that stood on high ground, and was surrounded by forests that breathed perfume through the dry, exhilarating air, but, strange to say, he was not comfortable, and eventually he began to show signs of illness. "The air's too weak, up here," he said. Even his appetite, on which he set great value, subsided, and his thoughts and desires turned cityward so strongly that he took no pleasure in the mountains.

One day he turned faint and fell back into an armchair. His family became alarmed, but a friend hurried out behind the kitchen and presently returned with a couple of fish heads that had been cast out some days before and were in a high state of pungency. He placed these under the nose of a sick man, whose eyes opened slowly, while his face widened with an expression of glad wonder. He took a few deep inhalations and broke out, "There! There! That's better. That's like home."—Brooklyn Eagle.

Varieties of Apples.

There are described by various writers as having been at some time growing in America—all of which have had names given to them—some 2,000 varieties of apples. As a matter of fact, no apple comes from seed exactly like its parent. Every seedling apple has, therefore, an individuality of its own, to a greater or less degree. The manner in which nature affects this variation has never yet been determined, though there is reason to believe rhythmic growth has much to do with it. At each rest nutrition is diverted to other directions; in proportion to the duration of these rests other portions become developed. This is known as the law of acceleration or retardation.—Thomas Meahan in Philadelphia Ledger.

Economy in Texas.

A couple of Detroit men on the Belle Isle Park ferryboat were denouncing upon political economy. "We've got too much taxes," said one. "Certainly we have," assented the other; "and now they're talking about having an income tax." "Is that so?" "Yes, it is." "Well, that ought to be a good thing, it seems to me. There's so confounded much outgo tax that if they could work an income tax in some way it would be a good thing for the taxpayers."

Places to Make Fish.

It is not generally realized that there are in this country literally millions of lakes which are available for water farming—in size all the way from mere ponds to the great inland seas of fresh water. In Illinois alone there are tens of thousands of lakes, and hundreds of thousands more can be readily created.—Exchange.

Small cups are now being used with

great success by oculists for the cure of long sightedness and kindred diseases of the eye. The cupping restores the circulation and strengthens the tissues.

ANDREW LANG'S FIRST BOOKS.

What the Famous Litterateur Read When He Was a Youth in Pinarof.

The first books which vividly impressed me were, naturally, fairy tales and chapbooks about Robert Bruce, William Wallace and Rob Roy. At that time these little tracts could be bought for a penny apiece. I can still see Bruce and Wallace in full armor, discoursing across a burn, and Rob Roy slipping from the soldier's horse into the stream. They did not then appear a precocious patriotism; a boy of five is more at home in Fairyland than in his own country.

The sudden appearance of the White Cat as a queen, after her head was cut off; the Finnish malice of the Yellow Dwarf; the strange cake of crossdile eggs and millet seed which the mother of the Princess Frutilla made for the Fairy of the Desert—these things, all fresh and astonishing, but certainly to be credited, are my first memories of romance.

One story of a White Serpent, with a woodcut of that mysterious reptile, I neglected to secure, probably for want of a penny, and I have regretted it ever since. One never sees those cheap books now. "The White Serpent," in spite of all research, remains introuvable. It was a lost chance, and Fortune does not forgive.

Nobody ever interfered with these, or indeed with any other, studies of ours at that time, so long as they were not prosecuted on Sundays. "The fighting parts of the Bible," and the Apocrypha, and stories like that of the "Witch of Endor" were sabbatical literature, read in a huge old illustrated Bible. How I advanced from the fairy tales to Shakespeare, what stages there were on the way—for there must have been stages—is a thing that memory cannot recover.

A nursery legend tells that I was wont to arrange six open books on six chairs and go from one to the other, perusing them by turn. No doubt this was what people call "desultory reading," but I did not hear the criticism till later, and then too often for my comfort.—Andrew Lang in Scribner's.
