A Chamber of Horrors.

The apartment to which the unhappy wretch is confined by influminatory rheumatism is indeed a chamber of horrors. Appalling are the tortures inflicted by this agonizing complaint, and those endured by persons sufering from milder forms of it are sever enough. Obstinate as it is in its mature development, it is surely remediable at the outset with Hostetter's shomach Bitters, an infinitely safer as well as more effective remedy than the poison often used to subdue h. Always should it be borne in mind by those seeking relief from rheumatism, that though conquerable in the incipient stage, it is not only stubborn but dangerous when fully developed, on account of its tendency to attact the vital parts. This consideration should lead to the early adoption of curative measures. The Bitters will overcound trouble.
