BROOKLYN, June 19 .- Rev. Dr. Talmage is now on the Atlantic, having sailed from New York on the 15th inst. for Liverpool, for a preaching tour in England, Scotland, Ireland and Sweden. Before visiting Sweden Dr. Talmage will go to Russia, there to witness the reception and disposition of the cargo of breadstuffs on board The Christian Herfast. Previous to his departure he dictated to his stenoghere. rapher the following farewell sermon, to be read by the vast and widely scat tered audiences whom it is his weekly privilege to address through the medium of the newspaper press. He took his text from II Timothy iv, 6, "The time of my departure is at hand."

Departure! That is a word used only twice in all the Bible. But it is a word often used in the courtroom and means the desertion of one course of pleading for another. It is used in navigation to describe the distance between two meand Paul does dine with the king. ridians passing through the extremities of a course. It is a word I have recently heard applied to my departure from America to Europe for a preaching tour to last until September. In a smaller

and less significant sense than that implied in the text I can say, "The time of my departure is at hand."

Through the printing press 1 address this sermon to my readers all the world over, and when they read it I will be midocean, and unless something new happens in my marine experiences I will be in no condition to preach. But how unimportant the word departure when applied to exchange of continents as when applied to exchange of worlds as when Paul wrote, "The time of my de-parture is at hand." Paul, the second great in heaven.

Now departure implies a starting place and a place of destination. When Paul left this world, what was the starting point? It was a scene of great physical distress. It was the Tullianum, the lower dungeon of the Mamertine prison, Rome, Italy. The top dungeon was had enough, it having no means of ingress or egress but through an opening in the top. Through that the prisoner was lowered, and through that came all the food and air and light received. It was a terrible place, that upper dungeon: stalls of solid gold, and the grounds but the Tullianum was the lower dungeon, and that was still more wretched, the only light and the only air coming through the roof, and that roof the floor of the upper dungeon. That was Paul's Paul's king. last earthly residence. I was in that lower dungeon in November, 1889. It is made of volcanic stone. I measured it, and from wall to wall it was fifteen feet. The highest of the roof was seven feet from the floor and the lowest of the roof five feet seven inches. The opening in the roof through which Paul was let down was three feet wide. The dungeon has a seat of rock two and a half feet high and a shelf of rock four feet high. It was there that Paul spent his last days on earth, and it is there that I see him now, in the fearful dungeon, shivering, blue with the cold, waiting for that old overcoat which he had sent for up to Troas and which they had not yet sent down, notwithstanding he had written for it. THE DUNGEON OF ST. PAUL. If some skillful surgeon should go into that dungeon where Paul is incarcerated we might find out what are the prospects of Paul's living through the rough imprisonment. In the first place he is an old man, only two years short of seventy. At that very time when he most ds the warmth, and the sunlight, and the fresh air he is shut out from the sun. What are those scars on his ankles? Why, those were got when he was fast, his feet in the stocks. Every time he turned the flesh on his ankles started. What are those scars on his back? You know he was whipped five times, each time getting thirty-nine strokes-one hundred and ninety-five bruises on the back (count them') made by the Jews with rods of elmwood, each one of the one hundred and ninety-five strokes bringing the blood.

Look at Paul's face and look at his arms. Where did he get those bruises? I think it was when he was struggling ashore amid the shivered timbers of the shipwreck. I see a gash in Paul's side. There is a wanness about Paul's looks. What makes that? I think a part of that came from the fact that he was for twenty-four hours on a plank in the Mediterranean sea, suffering terribly, before he was rescued, for he says positively, "I was a night and a day in the deep." Oh, worn out, emaciated old man! surely you must be melancholy: resurrection power. no constitution could endure this and be cheerful.
