

THE SWITCHMEN'S

Lively Times Between Strikers and N. G.

BULLETS ARE FLYING.

Conflict Reported This Morning From Buffalo.

CHICAGO, Aug. 23.—A special from Buffalo, dated 3:50 a. m., says since 2 o'clock this morning bullets have been flying all over the freight yards and rumors of killing are prevalent all along the line and at every point. It is reported that a regular engagement took place in the Erie yards one mile from town, and that four men were killed and two wounded. It is also said that one of the dead is a soldier. It is impossible to verify the rumor. In inquiry at the brigade headquarters brought the information that the news of the shooting had been received, but no details were obtainable. At the police station nothing was known.

BUFFALO, Aug. 23.—4 a. m. Attack was made on the 12th regiment soon after 2 o'clock by gangs of strikers and their friends. They crept up within a stone's throw of the camp, hiding under the cars and behind the trucks, and then threw stones and pieces of iron at the soldiers. The soldiers answered the attack with bullets. The shooting was kept up for a long time, and still the stone-throwing continued. There is some shooting going on at this hour. Most of the shots are coming from the direction of the Clinton street crossing of the Nickel Plate. Captain Boylan is there in charge of Company K, of the Twelfth. There are tenements near the railroad and the people are all out in the streets. There is great excitement.

BUFFALO, Aug. 23, 5 a. m.—The latest report from the scene of the shooting is that four men have been killed and two wounded in one place in the Erie yard, a mile outside of the city, and that a number of other men have been wounded by the soldiers' bullets in other yards. The soldiers at Seneca street say that the men had been killed by the Seventy-first regiment. It is impossible to get by the guards within a mile of the Seventy-first.

BUFFALO, Aug. 23.—According to the statements of soldiers there was more or less shooting on the outskirts last night of the 71st and 22nd regiments. It was prompted by stone throwing. So far as known no one was hurt. About one o'clock this morning a man giving his name as William Moran was taken to Emergency hospital with a bullet wound in his leg. His story is that he was challenged by a soldier on Hamburg street and that after having some words with the soldier started to walk off, whereupon the latter fired five shots at him. Moran also had a scald wound which he said was inflicted by the soldiers with the butt of a gun.

NIAAGARA, FALLS, Aug. 23.—Some one made an unsuccessful attempt last night to wreck a loaded freight train by throwing the switch. Gateman was seriously injured.

Governor Flower Explains. WATERBURY, N. Y., Aug. 23.—In an interview with a representative of the press, previous to his departure from Albany, Governor Flower said in reference to the criticisms that have been made on his action in sending so many troops to the scene of the strike: "Have you a brother among the militia at Buffalo? If you have, you will know how to answer it. The militia of the state of New York is composed of active, intelligent young men, coming from prosperous homes and shops and business places. They devote their energy, and relinquish a part of their liberty in the service of the state for protection in just such emergencies as the present one. When the state calls on them for service that has an element of danger, the state is bound to minimize that danger as far as possible. Certainly it would be an outrage to place these young men in a perilous position so long as it is possible to avoid it. When the proper authorities at Buffalo informed me that 2000 militiamen of the locality were trying to protect property so vast that it was necessary to place every man in constant danger, and when asked for more troops to lessen this danger to lives as well as to protect the property, the state could do no less than to send enough troops to prevent bloodshed. It was due to the strikers, as well as to the militia and the owners of property in question, that we gave ample provision to all; for the strikers are not the ones from whom serious troubles feared; that comes from the lawless element, that hangers-on who invariably gather at such places, and find pleasure in stirring up strife and causing wreck and ruin. In a city like Buffalo the element numbers many thousands. I am sure the good people of the state had no fault because the chief assistance is granted the request for sufficient troops to prevent this law-breaking crowd from committing any act that might lead to further trouble."

The Switchmen's Strike. BUFFALO, Aug. 23.—Master Workmen Sweeney, of the Switchmen's order, has now asked the heads of all labor organizations allied with the switchmen in railroad work, to meet him here. Already

Sargeant is here, and others are expected today and the next day. The trend of fair judgment leads to the conviction that there will be no concerted abandonment of work by organized labor to be represented in the conference can possibly occur before Wednesday, while there is a likelihood that the session will not be held before Thursday. In the meantime speculation may be expected as to whether Sweeney will order out other switchmen west or south or both, or whether he will announce officially and formally the defeat of his men.

About fifty men who acted as switchmen for the Western New York and Pennsylvania road yesterday afternoon caused work to be delayed to handle freight from the Central. There is renewed intimation that the switchmen of the Grand Trunk may add themselves to the strikers. No troops will be withdrawn until time shall have made improbable any further attacks upon the present switchmen. General Porter says today that the troops will be ordered home as soon as the situation warrants. Labor officials report the condition normal. In freight and boxing car forces are working every night and day, and off-alls are now spending time looking for business. Thirty car handlers employed on the Lehigh trestle on the waterfront stopped work yesterday afternoon and told the yard-master that they would not resume work until the grievances of the switchmen were settled.

ELMIRA, N. Y., Aug. 23.—The blockade is broken, and freight is being handled without opposition. The strikers do not admit defeat and are inclined to think there will yet be trouble in this region.

The Board of Arbitration. BUFFALO, Aug. 23.—The board of arbitration and mediation has decided to begin an investigation into the cause of the switchmen's strike tomorrow. Grand Master Sargeant of the firemen's organization said this morning he had no plans for today. He is awaiting the arrival of the executive officers of other railway unions whom Grand Master Sweeney has invited here in conference.

KNIGHTS OF PYTHIAS. The Encampment Began at Kansas City.

KANSAS CITY, Aug. 23.—Knights of Pythias are arriving in brigades. Every gala-decked cable-car that runs to the camp bears a crowd of people that fills it completely, and many are standing on the platform. The encampment is destined to be a great success. The report of officers of the encampment rank, Knights of Pythias, states that on July 1, 1892, there were 1417 active sections, 29,407 members, and the endowment in force was \$62,952,000, showing an increase of 500 sections, 8000 members and \$17,000,000 endowment in the two years preceding.

KANSAS CITY, Aug. 23.—It is estimated that no less than 65,000 Knights of Pythias and other visitors are in the city. About half of those who will participate in the encampment are now quartered at Camp Shaw. The remainder will be formally and officially opened at noon.

Bids Received on Fire Protection for State Buildings. Today at two o'clock was the time set for receiving bids for the construction of a building and tank at the asylum to supply water for use and fire protection both to the asylum and capital buildings. \$8,000 was appropriated by the legislature for this improvement, and the bids are based upon the plans and specifications prepared by John McCarl, the asylum engineer. It will be a fine improvement for the state, and the bids were as follows:

The Work of Incendiary. HANFORD, Cal., Aug. 23.—A fire Sunday night started in Hall's dry store stable, which was destroyed, together with several sheds, Moore's blacksmith shop and carriage repository, and the free reading room. The flames were kept from spreading with great difficulty. The farmer's bank and several other buildings were badly damaged. A stallion valued at \$600, with two other horses, were killed, and a number of vehicles destroyed. The losses amount to \$22,000 and the insurance only covers \$11,000. King's packing-house, several blocks away, caught fire from flying sparks. The blaze was undoubtedly the work of an incendiary. A number of persons were arrested for stealing household goods during the fire.

Hod Carriers' Strike. ANDERSON, Ind., Aug. 23.—Five hundred hod carriers, as many brick layers are on a strike. The strike is caused by a difference between the carriers and brick layers as to whether work shall begin at 6:30 or 7 o'clock.

More Switchmen Out. BUFFALO, Aug. 23.—Switchmen on the Delaware, Lackawanna and Western struck this afternoon. They have a grievance to pay and hours. This adds ninety men to those already idle.

Cloud Burst. RANOKO, Va., Aug. 23.—Cloud burst in this city last night destroyed in half an hour 113,000 worth of property and drowned three people.

Washington Democrats. OLYMPIA, Aug. 23.—The gathering hosts of the Democracy are concentrating. Headquarters are already opened by Percy W. R. Chester, of King county, against J. Hamilton Lewis. Rochester's headquarters are both anti-Lewis and anti-Cramer. He does not believe Lewis is the strongest candidate that can be named against McGraw, and is of the opinion that the Seattle canal has no more business in the platform of a political party than the opening of a stage road. The other candidates are Dr. N. G. Blacklock, Chester H. Warner, Benjamin Franklin Shaw, of Vancouver, Henry Drum, of Tacoma, John McReay, of Union City, Col. Chauncey W. Griggs, of Tacoma, and Mayor Drumheller, of Spokane.

The non-train yesterday brought many delegates, including those from Snohomish, King, Whitman, and Spokane. The Pacific county delegates arrived on an excursion train from Ocoosa, and on the Portland train arrived delegates from Southwestern Washington and river counties, with fifty-eight votes, comprising Klilkait, Skamania, Clark, Cowlitz, Wahkiakum, Pacific, Chinook, and Lewis counties. Of the 31 votes in convention, King county with 39, Spokane with 27, and Kittitas with 11, are instructed for Lewis for governor. He claims 123 additional from other counties. Dr. N. G. Blacklock claims Walla Walla with 4, Franklin with 4, Adams with 5, and Asotin with 4. Chester H. Warner is sure of Whitman with 18, Grant with 7, and Columbia with 9.

King county will endeavor to introduce a canal plank in the platform, the delegates being so instructed. This proposition will figure just as prominently with the Democrats as with the Republicans, and will be the central feature at the convention. The King county delegation arrived, in company with Col. James Hamilton Lewis, on the 6:15 train last evening. Lewis and his workers claim 197 votes. Whitman county is solid for Chester H. Warner, and will present his name for governor.

A Preacher's Petition. ASBURY PARK, N. J., Aug. 23.—President E. H. Stokes, of the Ocean Grove camp meeting association, sent out notices to all hotel and cottage proprietors and boarders today, requesting them to lay aside their pleasures and enjoyments for the next ten days, and to give themselves up to God and his work. The period in question is what is known as "the great camp-meeting week." Sojourners are religiously requested to give up bathing, boating, fishing, and in fact everything that will in any manner interfere with the religious services, or that will not be altogether in harmony with them. "Salvation must be pre-empted," says the president, "or Ocean Grove will sink to the level of other places." The sojourners do not take very kindly to the notice.

Committed Suicide. PORTLAND, Ore., Aug. 23.—Andrew Holm a Swede living on the Bridgeport road committed suicide by hanging. No cause assigned.

ASYLUM WATER WORKS. Bids Received on Fire Protection for State Buildings.

Today at two o'clock was the time set for receiving bids for the construction of a building and tank at the asylum to supply water for use and fire protection both to the asylum and capital buildings. \$8,000 was appropriated by the legislature for this improvement, and the bids are based upon the plans and specifications prepared by John McCarl, the asylum engineer. It will be a fine improvement for the state, and the bids were as follows:

The Work of Incendiary. HANFORD, Cal., Aug. 23.—A fire Sunday night started in Hall's dry store stable, which was destroyed, together with several sheds, Moore's blacksmith shop and carriage repository, and the free reading room. The flames were kept from spreading with great difficulty. The farmer's bank and several other buildings were badly damaged. A stallion valued at \$600, with two other horses, were killed, and a number of vehicles destroyed. The losses amount to \$22,000 and the insurance only covers \$11,000. King's packing-house, several blocks away, caught fire from flying sparks. The blaze was undoubtedly the work of an incendiary. A number of persons were arrested for stealing household goods during the fire.

Hod Carriers' Strike. ANDERSON, Ind., Aug. 23.—Five hundred hod carriers, as many brick layers are on a strike. The strike is caused by a difference between the carriers and brick layers as to whether work shall begin at 6:30 or 7 o'clock.

More Switchmen Out. BUFFALO, Aug. 23.—Switchmen on the Delaware, Lackawanna and Western struck this afternoon. They have a grievance to pay and hours. This adds ninety men to those already idle.

Cloud Burst. RANOKO, Va., Aug. 23.—Cloud burst in this city last night destroyed in half an hour 113,000 worth of property and drowned three people.

From China and Japan. SAN FRANCISCO, Aug. 23.—The steamer Gaelic brings the following advice from China and Japan: There have been more storms and inundations in Japan. Thousands of houses were destroyed or swept away, and hundreds of lives lost. A desperate band of robbers who have been terrorizing the neighborhood of Yang Chiang has been broken up. Over 20 were recently captured and executed, after killing several soldiers.

The United States steamer Alliance sailed from Shanghai for San Francisco on the 1st instant. The volcano of Sangit has quieted down and enormous columns of smoke are the only signs of activity. Coconut plantations and fruit orchards were laid waste and the destruction brought about has resulted in distress bordering on famine.

FOREIGN ITEMS. The Mormons'. LONDON, Aug. 23.—Considerable anxiety prevails in religious circles because of the work being carried on here by Mormon missionaries. They have been especially active in North London, and it is said have gained quite a number of converts to their faith. A petition was recently presented to the London county council asking it to stop the Mormon propaganda. The council considered the petition, and finally refused to stop outdoor meetings. A Baptist minister in Hornsey district, in denouncing the perversion of his flock, stated that Brigham Young, Jr., who is the European apostle of the Mormon church, sends 500 converts to Utah annually. The greatest part of these converts are English.

HE SAVED HIS NECK. But He Turned Traitor and Acted the Coward to Do It. KNOXVILLE, Aug. 23.—A sensational episode occurred at Coal Creek. The leader of the most daring, most lawless and most troublesome body of miners was Bud Lindsay. To his machinations has been due much of the trouble on the creek. He has made himself so obnoxious to the more conservative miners and to citizens not in sympathy with the rioting that he has been a marked figure, and only his keeping within safe distance of the military since his capture, and generally between four walls, has prevented his being killed. For several nights he was confined in an old mine, and the mouth guarded by a squad of soldiers. Affairs during the day had been so quiet that watch had been somewhat relaxed, and Lindsay had lost some of his fear and wandered more widely within the enclosure. One night, in some way that no one seems to understand, four citizens managed to silence the guard, and, in the dusk, slipped him between the pickets. He was hurried up the valley toward Briceville, and the mob, which gained force at almost every step, hurried him forward, fearing an alarm and pursuit by the soldiers. The journey was not ended until Briceville, the scene of the troubles last year and the home of the more conservative class of miners, was reached. Once there a rope was secured and placed around his neck. Though considered desperate, and though he has at least a dozen murders to his account, he broke down and begged for his life with all possible fervor. His pleadings and lamentations were effective. He was promised life upon the solemn promise that today he will turn state's evidence and reveal the names and plans of all the leaders, tell how the mob was raised, the nature of the oath, the names of the miners known to have killed the deputy guards, in short, to reveal to the civil authorities all of the lawlessness that has reigned, and this he has agreed to testify to in court. When all this was promised, the rope was taken from his neck and he was returned to the camp for safe keeping. It is now believed that with his testimony 20 or 30 leaders can be successfully tried for murder and convicted.

Have You Read How Mr. W. D. Wentz of Geneva, N. Y., was cured of the severest form of dyspepsia? He says everything he ate seemed like pouring molten lead into his stomach. Hood's Sarsaparilla effected a perfect cure. Full particulars will be sent if you write C. I. Hood & Co., Lowell, Mass.

The highest praise has been won by Hood's Pills for their easy, yet effective action.

From Tennessee. COAL CREEK, Aug. 23.—Everything is quiet this morning. Two militia men out in the mountains last night were chased eight miles by five armed miners. It is rumored today that the Governor of Kentucky has given permission for troops to pursue fugitives across the state line and will co-operate in their capture.

Dragooning Won't Do! Not with the liver. Violent colic ague, liver colic and bile pill, administered in them. The stomach is empty, as they often are, will not permanently relieve the acute form of the great hepatic organ, and are hence of little benefit to the system. Dr. Pierce's Sarsaparilla, which insures a regular discharge of the secretory function of the liver, and by means of the action of the bowels, with a griping or weakening in them. The stomach is empty, as they often are, will not permanently relieve the acute form of the great hepatic organ, and are hence of little benefit to the system.
