Animal Oils In Medicine.

The number of animal oils and fats used in medicine are extremely numerous. Large quantities of oil are obtained in Tasmania from the mutton bird and used as a liniment for rheumatism, while the fat of the frigate bird is said to be an excellent specific for sciatica. Cod liver oil is too well known to bear more than mention, and the oil got from the dugong, an aquatic monster related to the whale tribe, has a high reputation as a substitute for that obtained from the smaller fry of the cod. From 6 to 14 gallons of this medicinal oil can be taken out of a single animal. - London Tit-Bits.
