## CROPS ARE ALL RIGHT.

The Salem League club will no doubt play good ball today and Sunday. It is late in the season to begin here. If the League had started here a big baseball interest would have developed before this, and with good management as the public is assured of, will now be manifested.

## LET US GET RIGHT.

The Statesman says: "There will not be any less money in the country after the repeal of the Sherman law—but what there is will be better money, and there will be better credit and more of it. The silver dollar is worth a dot for now only because it is redeemable with a gold dollar. After the Sherman law is repealed there will be no danger of a change in these conditions—which there is and would be under that law."

If the Sherman law were repealed would not the parity between the two metal coins gold and silver be destroyed. Has it not been the policy of the United States to maintain the parity of the two metals? Is it wisdom to impair that policy? We think not. If that makes us a free silver man there are many of them.

## THE MONTEREY SHOULD GO.

There is no war in Oregon. There is no necessity of bringing an iron-clad in a time of peace over one hundred miles into the interior of this state, merely to show of the might, majesty and prowess of our government.

Our government is spending nearly forty millions a year on a navy for which we have little or no use. We are spending nearly ninety millions a year on maintaining a military establishment in a time of perfect peace and when our country is the very last any other nation would go into war with.

To keep up an expensive organized force to exterminate the extinct Siberian mammoth would be less ridiculous than to keep up a military armament at sea and land. There is less likelihood of the petrified megalothorax or the frozen Elephas Primejorius returning to earth than of war. Give the people more money, more employment, better postal and banking facilities, more ONE CENT DAILIES and fewer warships.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. Cheney & Co., Toledo, O. Sold by druggists, 75c.

## WOOD WANTED.

Persons wishing to trade wood for daily or weekly newspapers, and also parties owing us wood on account are hereby notified that we are now in a hurry for it. Bring in your wood (or some fruit will be taken). HOFFER Bros., Potts, JOURNAL.

Before Going to the World's Fair  
Enquire About

The Limited Express trains of the Chicago, Milwaukee & St. Paul Railway between St. Paul and Chicago and Omaha and Chicago.

These trains are vestibuled, electric lighted and steam heated, with the finest Dining and Sleeping Car service in the world.

The Electric reading light in each berth is the successful novelty of this progressive age, and is highly appreciated by all regular patrons of this line. We wish others to know its merits, as the Chicago Milwaukee & St. Paul Railway is the only line to the west enjoying the exclusive use of this patent. ## Sold Everywhere.

Pacific coast hops are quoted 10 to 21  
cents, 140 to 144 Washington St., N. Y. at New York today.

YOU  
DON'T KNOW

what a comfort it is to have ready at hand a remedy that never fails to relieve Constipation, and that, without pain or discomfort; and almost immediately cures headaches, and dispels every symptom of Dyspepsia. Such a remedy is found in Simmons Liver Regulator—not a sweetened compound to nauseate, or an intoxicating beverage to cultivate an alcoholic appetite, but a medicine pleasant to the taste, and perfectly harmless when given to the smallest child. S. L. R. never disappoints. It possesses the virtues and perfections of the kind endorsed by eminent physicians.

"It affords me pleasure to add my testimony to those you receive annually in regard to your product. I consider it a valuable family medicine on the market. I have prescribed it with excellent results." W. F. PARK, M. D., Tracy City, Tenn.

## HOPS AND CROPS.

SALEM, July 11.  
LANE COUNTY.

EGGEME, July 10.—The crop in this county is making fair progress. Lice show up in all yards in small quantities but are not considered to be thick enough to justify spraying. The vine is undoubtedly considerably short for this time of the year and there will be more hops harvested this season than last.

FROM NEW YORK.

NEW YORK, July 1, 1895.—Reports from New York state that a few lice have appeared but are on the decrease, and they have no fear from that source, but there are hundreds of acres that have not been properly cultivated owing to the wet spring and including the increase of acres there will not be many hops in that state as in '92.

## GOVERNMENT STATISTICS.

Returns to the department of agriculture show the following averages of the condition of crops: Corn 92.2; winter wheat 77.7; spring wheat 74.1; oats 88.8; rye 85.3; barley 88.8; potatoes 94.8; tobacco 93. The preliminary acreage of corn was reported as 103.3 as compared with acreage harvested last year, the increase being something over 2,000,000 acres. The condition of winter wheat is 77.7 against 75.5 last month and 89.9 in July 1892. The average for Washington is 91. The condition of wheat July 1, 1895 was 78.6 while on June 1st it was 78.8. The condition of oats remains about the same as last month, being 88.8 as against 88.9 June 1st.

AT SILVERTON.

J. M. Long, of Silverton is to attend the fruit grower's meeting. He says apples, pears, and cherries are light; prunes are good; apples are as short as last year except Baldwins and Spitzburgs, of which there is a splendid crop. Hops look well.

Lebanon Advocate, July 14: The hop yield promises to be unusually good this year and unless something unforeseen should occur the yield as well as the quality will be fully up to the expectation of growers. During the wet and backward spring much apprehension was felt lest the crop would be ruined, as the ground was to wet for cultivation, but from the appearance of the vines at this time it would seem that the cold and damp weather has been advantageous to the vines and at the same time it has served the useful purpose in holding back all kinds of vermin that prey upon hops. The season is from two to four weeks late and hop picking will probably not commence before the third or fourth week in September.

## PACIFIC COAST NEWS.

SAN FRANCISCO, July 15.—The British steamer Bawmore, which ran on the rocks near Point Gorda on the 9th inst., arrived from Caper, in tow of the steamers Emily and Wootton.

VICTORIA, B. C., July 15.—A story is current here that F. C. Davidge, formerly agent here of the Union Pacific Steamship line, has completed arrangements to establish a line of steamers between Puget Sound and British Columbia and the Orient in connection with the Great Northern railroad.

PORTLAND, July 15.—A number of indictments were found by the United States grand jury against parties connected with the smuggling ring but their names are not made public.

VANCOUVER, Wash., July 15.—Fifty people, including ten women, formed a line in front of the United States land office yesterday for the purpose of holding their places until Monday, when two townships in Lewis and Cowells counties will be declared open for settlement. One hundred and fifty others are expected today.

Pacific coast hops are quoted 10 to 21 cents, 140 to 144 Washington St., N. Y. at New York today.

## THE NILE'S OVERFLOW.

A Description of "One of the Most Extraordinary sights in Nature." Perhaps there is not in nature a more exhilarating sight or more strongly exciting to confidence in God than the rise of the Nile. Day by day and night by night as the turbid tide sweeps onward majestically over the parched sands of the waste, howling wilderness. Almost hourly, as we slowly ascended it before the steaming wind, we heard the thundering fall of some mud bank and saw by the rush of all animated nature to the spot that the Nile had overleaped another obstruction, and that its bounding waters were diffusing life and joy through another desert.

There are few impressions I ever received upon the remembrance of which I dwell with more pleasure than that of seeing the first burst of the Nile into one of the great channels of its annual overflow.

All nature shouts for joy. The men, the children, the buffaloes, gambol in its refreshing waters, the broad waves sparkle with shoals of fish, and fowl of every wing flutter over them in clouds. Nor is this jubilee of nature confined to the higher orders of creation. The moment the sand becomes moistened by the approach of the fertilizing waters it is literally alive with insects innumerable. It is impossible to stand by the side of one of these noble streams, to see it every moment sweeping away some obstruction to its majestic course and widening as it flows, without feeling the heart to expand with love and joy and confidence in the great Author of this annual miracle of mercy.

The effects of the inundation, as Osburn shows, exhibit themselves in a scene of fertility and beauty such as will scarcely be found in another country at any season of the year. The vivid green of the springing corn, the groves of pomegranate trees ablaze with the rich scarlet of their blossoms, the fresh breeze laden with the perfumes of gardens of roses and orange thicket, every tree and every shrub covered with sweet-scented flowers—these are a few of the natural beauties that welcome the stranger to the land of Ham. There is considerable sameness in them, it is true, for he would observe little variety in the trees and plants, whether he first entered Egypt by the gardens of Alexandria or the plain of Aswan. Yet it is the same everywhere only because it would be impossible to make any addition to the sweetness of the odors, the brilliancy of the colors or the exquisite beauty of the many forms of vegetable life in the midst of which he wanders. It is monotonous, but it is the monotony of paradise.

The flood reaches Cairo on a day closely approximating to that of the summer solstice. It attains its greatest height and begins to decline near the autumnal equinox. By the winter solstice the Nile has again subsided within its banks and resumed its blue color. Seidtime has occurred in this interval. The year in Egypt divides itself into three seasons—four months of sowing and growth, corresponding nearly with our November, December, January and February; four months of harvest, from March to June, the four months of the inundation completing the cycle.

**A Dog's Long Journey.**

The account of a dog finding its way to its old home, say 20 or 40 miles, although not formerly known, is nothing very unusual, but when the distance reaches some 200 miles the event is worth notice. The following remarkable return of a fox terrier is absolutely true:

A minister in a southern parish in Dumfriesshire, Scotland, had a fox terrier sent him by rail from a friend near Elgin, Morayshire. After being kept captive a few days it was let loose. No sooner did it find itself at liberty than it forthwith disappeared, nor could any trace of it be found.

Judge of the surprise of the Morayshire people on seeing it walk in one morning. It was evidently tired out, for it lay down near the fire, and it was some time before it was able to taste food. On exchange of letters it was found that it had been just seven days traversing the distance, which, as the crow flies, is little short of 200 miles. How it made its way to its old home is a mystery, but still an indisputable fact.—Harper's Young People.

**How Satin Was Discovered.**

The discovery of the principle of the manufacture of satin was a pure accident. The word "satin," which originally was applied to all silk stuffs, has, since the last century, been used to designate simply those tissues which present only a lustrous surface. The discovery was made by a silk weaver named Octavio Mai. During a dull period of business one day he was pacing before his loom, not knowing how to give a new impulse to his trade.

As he passed the machine each time he pulled short threads from the warp, and following an old habit put them into his mouth and rolled them about, soon after spitting them upon the floor. Later he discovered a little ball of silk upon the floor of his shop, and was astonished at the brilliancy of the threads. He repeated the experiment and eventually employed various mucilaginous preparations and succeeded in giving satin to the world.—*St. Louis Globe-Democrat*.

Children of Mr. and Mrs. M. M. Miller  
Albion, Pa.Both Had Eczema  
In Its Worst FormAfter Physicians Failed, Hood's  
Sarsaparilla Perfectly Cured.

Great mental agony is endured by parents who see their children suffering from diseases caused by impure blood, and for which there seems no cure. This is turned to joy when Hood's Sarsaparilla is resorted to, for it expels the foul humor from the blood, and restores the diseased skin to fresh, healthy brightness. Read this:

"To C. I. Hood &amp; Co., Lowell, Mass.

"We think Hood's Sarsaparilla is the most valuable medicine on the market for blood and skin diseases. Our two children suffered terribly with eczema.

"We recommend Hood's Sarsaparilla for eczema.

"For two years we had three physicians,

but neither of them succeeded in curing them,

and in giving them a little relief.

At last tried Hood's Sarsaparilla and in a

week both children were perfectly cured.

We recommend Hood's Sarsaparilla.

Mrs. Harrison's

Lola Montez Creme

The best remedy for

keeping the face cool

in the heat of summer.

It softens and

comforts the skin and

expels freckles or

wrinkles. It is not a
