

The Human Electrical Forces!

How They Control the Organs of the Body.

The electrical force of the human body, as the nerve fluid may be termed, is an especially attractive department of science, as it exerts so marked an influence on the health of the organs of the body. Nerve force is produced by the brain and conveyed by means of the nerves to the various organs of the body, thus supplying the latter with the vitality necessary to insure their health. The pneumogastric nerve, as shown here, may be said to be the most important of the entire nerve system, as it supplies the heart, lungs, stomach, bowels, etc., with the nerve force necessary to keep them active and healthy. As will be seen by the cut the long nerve descending from the base of the brain to the stomach is the pneumogastric, while the numerous fine branches supply the heart, lungs and stomach. When the brain becomes in any way disordered by irritability or exhaustion, the nerve force which it supplies is lessened, and the organs receiving the diminished supply are consequently weakened.

Physicians generally fail to recognize the importance of this fact, but treat the brain itself instead of the cause of the trouble. It is noted specialist, Franklin Miles, M. D., L. L. B., has given the greater part of his life to the study of this subject, and the result of his discoveries concerning it are due to his efforts. Dr. Miles' Restorative Nervine, the unrivaled brain and nerve food, is prepared on the principle that all nervous and many other difficulties originate from disorders of the nerve centers. Its wonderful success in curing these disorders is testified to by thousands in every part of the land.

Restorative Nervine cures sleeplessness, nervous prostration, dizziness, hysteria, sexual debility, St. Vitus dance, epilepsy, etc. It is free from opiates or dangerous drugs. It is sold on a positive guarantee by all druggists, or sent direct by the Dr. Miles Medical Co., Elkhart, Ind., on receipt of price, \$1 per bottle, six bottles for \$5, express prepaid.

Sold by D. J. Fry, Druggist, Salem.

Prompt relief in sick headache, dizziness, nausea, constipation, pain in the side, guaranteed to those using Carter's Little Liver Pills. One a dose. Small price. Small dose. Small pill.

Are free from all crude and irritating matter concentrated in one small pill. Try them.

Ministers, lawyers, teachers, and others, who are overworked, should use Carter's Little Liver Pills for their liver and biliousness. It is a dose, try them.

Grape Vines for Sale.

I have propagated several thousand good strong two-year old grape vines for setting out, assorted varieties, suitable for culture in Oregon. 25 cts each, \$2.00 per dozen. E. Hofer, Salem, Or., JOURNAL OFFICE.

Shuttles.

The most extensive manufacturers of shuttles in Great Britain, Kirk & Co., are said to market their products in all continents and in almost all parts of the world. None but the most expensive material is utilized for this purpose, including Persian oak wood, cornel and persimmon, and for some classes of shuttle boxwood is employed, the favorite species, however, being cornel and persimmon, because of their peculiar adaptation to withstand almost any climate—that is, they endure heat without warping or twisting, are not subject to variation by moisture, are tough and wear well. Whatever the wood, it is stored for a long time where it can be seasoned naturally, and after some 12 months of this air treatment under cover it is gradually carried forward to warmer temperatures for three months additional, the turning and finishing taking place at as near the temperature of a weaving shed as possible—from 70 to 80 degrees F.—this treatment adding much to the durability of the shuttles.—New York Sun.

"Oh, I say!"

The latest English importation in the line of language is the expression "Oh, I say!" and it now rivals "Don't you know?" in popularity among the Anglo-manics. Lord Dunraven and his party on their recent arrival were looking at newspaper illustrations of the Valkyrie, and at each glance his lordship exclaimed, "Oh, I say!" Then he pointed them out to his big, handsome companion, the Marquis of Ormonde, who exclaimed as he saw each illustration, "Oh, I say!" After Lord Ormonde had examined all the papers he started off with them to where the Countess of Dunraven and her daughters stood, severely regarding New York harbor. Lord Ormonde gave the impression that he was going wading, so high were his trousers turned up at the bottoms, but he only went as far as where the countess and her daughters were standing and directed their attention to the illustrations in the newspapers. As each of the ladies examined the papers she exclaimed, "Oh, I say!"—Exchange.

A New Clock for St. Paul's, London.

The great clock of St. Paul's has been taken down and is to be replaced by one of modern construction. Why this piece of vandalism is difficult to imagine. The clock, which was put up by Langley Bradley in 1708, is in splendid condition and might, to all appearances, go on for another two centuries without failing to bear accurate record of the passing time. It is a grand old clock, remarkable for the magnitude of its wheels and the fineness of its work. It cost \$1,500 to build. Its two dial plates are 51 feet in circumference, and the hour numerals are 2 feet 24 inches in height. The minute hands are 9 feet 8 inches long and weigh 75 pounds each, and the hour hands are 5 feet 9 inches long and weigh 44 pounds each. The pendulum is 18 feet long. It is an eight day clock, striking the hour on the great bell, which is suspended about 40 feet from the floor. The head of the hammer weighs 145 pounds and the clapper 180 pounds.—London City Press.

At the Columbus shops of the Pennsylvania railroad an order for 99 special cars for World's fair traffic is being completed. These cars are constructed in such a way that they will be converted into coal cars when the fair has closed.

MY LITTLE KING.

I met a king this afternoon,
He had not a crown indeed,
A little palm leaf hat was all,
And he was barefooted, I'm afraid.

But sure I am he ermine wore,
Beneath his faded jacket's bloom,
And sure I am the crest he bore
Within that jacket's pocket too.

For 'twas too stately for an earl—
A marquis would not go so grand—
'Twas possibly a czar's petticoat,
A pope, or something of that kind.

If I must tell you, of a horse
My freckled monarch held the reins,
Doubtless an estimable beast,
But not at all disposed to run.

And such a wagon! While I live
Dare I presume to see
Another such a vehicle
As then transported me!

Two other ragged princes
His royal state partook—
Doubtless the first excursion
These sovereigns ever took.

I question if the royal coach
Round which the footmen wait
Has the significance on high
Of this barefoot estate!

—Youth's Companion.

His Plaintive Plea.

He had loved her very tenderly and for a long time, but she had scorned him. He was no worm either, for he would have turned when trod upon, but she had scorned him.

It was not enough for her that he was a man; she wanted more. This is usually enough for any woman; also for any man when the boot is on the other foot, for of such is the kingdom of Cupid.

His condition had at last become unbearable to him, and he resolved to win all or lose all. It was late one evening when the fateful moment came.

"Will you marry me?" he asked her in plain, untrilled English, for he could trust himself to nothing in the ornamental line.

She spurned him scornfully. "No!" she replied, with sarcastic, hateful, cruel emphasis, "No!"

The word pierced the heart in his bosom. His lips quivered, and at first he could not speak.

"Have you no more to say?" he asked at last plaintively.

"No, sir," she replied. "What more could I say?"

Again he shrank at the cruel thrust. "I didn't know," he murmured tremulously, "but I think you might have said No, I think you."

Then he fled away so weary with disasters, trigged with fortune, that he would set his life on any chance to mend it or be rid of it.—Detroit Free Press.

A Custom That Is Very Old Indeed.

A bride made the confession to a group of young women who gathered around her after the wedding ceremony and the congratulations had been said and owned up to having worn a yellow garter for two years, that she had counted the stars and carried out the various bits of lore that are prophetic of a speedy marriage and happiness ever after.

She wore something old and something new. Something borrowed and something blue. On her wedding night, and, moreover, wore a silver coin—a Columbian half dollar—in her shoe. She was showered with the usual amount of rice when it came time to get into the carriage and drive away for the honeymoon trip, and had old shoes and good wishes enough sent after her to make the after years joyous ones if they all hold good, and, moreover, when she opens her trunk and traveling bag and the bridegroom opens his umbrella enough rice will come to light to make their first rice pudding, and the shoe strapped on the outside of the trunk will tell its own tale.

It is strange how much enjoyment one gets out of such harmless things, but the custom lasts, and the older it grows the more rigidly it is adhered to.—Buffalo News.

What She Would Do.

Every one has noticed the growing height of each successive year's bevy of debutantes, and the younger generations promise to be quite as tall if not taller than their predecessors. "Is it possible you are only 12?" said a small woman to a little girl who was more than an inch taller than herself. "How big you are!"

"Oh, do you think so?" answered the child. "Why, my friends consider me quite short. They are nearly all of them taller than I am." "Good gracious!" exclaimed the little woman in dismay. "What brooding dragons you will all be, and how will you get partners? If you were my child, I would put a brick on your head!"—Chicago Tribune.

The Great Mistake Columbus Made.

Schoolmaster—Why was it that his great discovery was not properly appreciated until long after Columbus was dead?

Nineteenth Century Schoolboy—Because he didn't advertise, sir.—London Tit-Bits.

Natural.

Castleton—I hear you are engaged to Miss Biggerelle, the girl you went horseback with so much last summer. How on earth did you manage it?

Summit—I couldn't help it, old man. We were thrown together so much.—Truth.

The highest waves ever met with in the ocean are said to be those off the Cape of Good Hope. Under the influence of a northwesterly gale they have been known to exceed 40 feet in height.

Timber of the tamarisk or shittim wood has been found perfectly sound in the ancient temples of Egypt in connection with stonework which is known to be at least 4,000 years old.

The last words of Marie Antoinette were: "Lord, enlighten and soften the hearts of my executioners. Adieu forever, my dear children; I go to join your father."

I wonder why it is we are not all kinder to one another. How easily it is done. How instantaneously it acts. How infallibly it is remembered.—Drummond.

Oxford, England, which is by many regarded as the greatest university, has 21 beggars and five halls.

FRENCH POLICE SPIES.

How the Government Manages to Secure Information Privately.

After all that has been said about the villainess of the police system under the empire, which rendered it almost impossible for any one to be safe from espionage, even in private life, it might well be supposed that the republic had done away with this machinery for discovering and weaving plots so much more suited to the age of Louis XI than to the nineteenth century. It remains, however, very much what it was 30 years ago. These things do not change in France.

Governments go, and the forms of government, and these are succeeded by others, but the good old abuses—they must be thought good by some people—cling to the ship with barnaclelike tenacity. French official organization is about the most steadfast thing in the world, although all French people to whom you may speak on the subject agree that it is very bad. It is almost as difficult now as it was under the empire to be certain that a man whom you may meet, either in society or out of it, does not belong to the secret police.

All over the country there are monachisms—a term expressing something stronger than spies. I have been incriminated by them myself in the provinces. On one occasion I made a rather long stay in a little place where there were two hotels in fierce rivalry. One day a brigadier of gendarmes came over from a neighboring town on purpose to make inquiries respecting me.

He did not trouble me, but he questioned various people as to how I passed my time, about how much I spent a day, what sort of meals I had, and whether I appeared to have more money than I knew what to do with. The fact was I was suspected of being a spy in the pay of a foreign government. As I consider a bold front to be the best whenever there is anything of this kind in the air, I got myself driven over the gendarmery, which was about eight miles off, and there had it out with the brave brigadier.

I soon discovered that an informer had been at work and that the informer was no other than the keeper of the rival hotel, who for years had been receiving pay as a member of the secret police.

Situated where he was he must have been absolutely useless in that capacity, but at one time he must have done a service to somebody.

It is especially in Paris, however, that that the secret police is supposed to be indispensable. Every government wishes to be kept well informed as to all that goes on in an enemy's camp. Such information can only be obtained from those who are willing to play the part of traitor or whose position enables them to observe what is going forward without exciting suspicion. They are technically termed "indicators" and may be long to either sex. When the Bonapartist movement was convulsing France the government had a great advantage over its opponents by handling of the secret fund and the secret police.

Boulanger's footsteps were dogged everywhere, and somehow M. Constans learned all that he wished to know concerning the plans and doings of the conspirators. An important point in this system is to make the "indicator" feel sure that whatever happens he will not be betrayed. The minister of the interior or of justice never asks the names of those by means of whose espionage certain political information has been gathered.

The money given for dark services is paid from hand to hand in cafes or other nonofficial places by commissionaires, and the name of no auxiliary outside of the ranks of the regular police ever appears in a book. Is it impossible for the government to do without this abominable system, so opposed to the ideal of a democratic state? The Cotto-Sinoury scandal has led to much discussion on this question.—Boston Transcript.

An Obtuse Englishman.

A Mr. Kirbell, who had never been out of England until he went to Vienna, seems to have been a typical Briton and stubbornly insular to the extent of refusing to alter the time of his watch as he traveled eastward from England. No argument would induce him to budge, and when at Vienna he arose at an unearthly hour, having persisted in being guided by his watch, stoutly asserting that the foreign clocks were all wrong.

Kirbell was very anxious also to keep a record of all the places he visited and the names of the various stations he had stopped at or passed. "How curious it is there are so many stations of the same name!" he once remarked to a fellow passenger, who replied that he had not observed it. Kirbell then showed his record to prove he was right, and, sure enough, over and over again occurred the word "Atsgang" (Exit), which he had confidently entered as the name of many stations passed on the route.—San Francisco Argonaut.

Standards of Measurement.

The "foot" is named from the length of that member in a full grown man. Some say that it was so called from the length of the foot of a certain English king, but it is believed to have been a standard of measurement among the ancient Egyptians.

The cubit is from the Latin cubitus, an elbow, and is the distance from the elbow to the end of the middle finger. Pathom is from the Aryan, fat, to extend, and denotes the distance from tip to tip of the fingers, when the arms of an average sized man are fully extended.—St. Louis Republic.

Letters of Introduction.

In writing a letter of introduction care should be taken that no requests are made that will involve the recipient in any trouble. Remember easy to render, and therefore the letter should entail only one minor courtesy not to put any one to any inconvenience.—Philadelphia Times.

Character in the Bell Ring.

Doorbells are pretty good indicators of character. Probably you have not been conscious of it, but every time you pull a doorknob you register what manner of man you are. Your ring will not tell everything about you, from the color of your eyes to your taste in flowers, but to those who know the signs the doorknob is as good as a title page.

Any one who has had occasion to answer bell pulls knows how much difference there is in them. One person's method varies very little from time to time, though the difference between that method and somebody else, while slight, will be sufficiently well marked. It is seldom that two rings are exactly alike.

The housewife recognizes each—the impatient man, who pulls the bell twice in quick succession and does not wait long before trying it again; the one of more phlegmatic temperament, whose ring is slower and more substantial; the hesitating woman, who draws the knob out in a succession of nervous jerks; the seedy individual with matches to sell, who stretches the wire carefully to its full length and then allows it to relax with a faint, apologetic tinkle, and the jolly friend who knows he is welcome and therefore grasps the knob with a hearty swing that is fairly eloquent with good nature and sets the bell to shaking its sides with such peals of echoing laughter that it positively cannot stop at once, but subsides gradually with a merry, irrepressible little titter. A doorknob has as many voices as visitors.—Yankee Blade.

The Giants and Noah's Flood.

Among the many queer stories related in the old Jewish Talmud and copied into Baring-Gould's "Patriarchs and Prophets" and works of similar import is one concerning the action taken by the great race of giants at the time of the deluge. At the time of the flood the giants were not all drowned. Their leader, Og, planted his foot upon the fountains of the deep, and with his hands he stopped the windows of heaven. According to Rabbi Eliezer, when the flood broke upon the earth the giants exclaimed: "If all the waters of the earth be gathered together, they will only reach to our waists, and if the fountains of the great deep be broken up we will stamp them down again." This they did as they had declared they would. Then God made the waters hot and boiled the flesh from their bones.

The Targum of Palestine also says the waters of the flood were hot. The Talmud then goes on to relate the story of the escape of Og, declaring that he went into the water along with the rhinoceros, clinging to the side of the ark. The same authorities which give us an account of how Og saved himself tell us that all the waters of the deluge were hot except that which immediately surrounded the hull of the ark. One rabbinical authority says that Og climbed upon the top of the ark, and that when Noah discovered and attempted to dislodge him he swore to be a slave to the patriarch's family forever if permitted to retain his skin.—St. Louis Republic.

A Remarkable Diet.

All that appertains to food for invalids comes naturally under woman's province; therefore it sounds very strange to folks who are experienced in the dietary of invalids to hear what Senator Stanford's food had been restricted to for six weeks previous to his death. Unless there were complications that rendered other foods impossible it would seem that the last thing to give a man with heavy apoplectic tendencies would be a diet of beef. Meat, and especially beef, increases the pressure of the blood on the arteries, which have already very thin walls in sufferers with such tendencies. A diet of fruits or vegetables or skimmilk suits most people under such conditions, when beef only makes matters worse. There may have been circumstances rendering fruit improper or milk indigestible, but there seems hardly anything a man could take that would make more danger to his circulatory system than fresh hashed meat.—Philadelphia Ledger.

A locomotive drawing four passenger coaches has recently done a mile in 39 1/2 seconds on the Reading road, which would come very near 100 miles an hour if maintained.

The Baltimore and Ohio is said to be arranging to build an extension from Penna. Grove, N. J., to Salem, Bridgeton and Millville. Connection will be made with Cape May and Atlantic City. The route has already been surveyed and maps made.

Hood's Cures

"During the War"

I was taken ill with spinal disease and rheumatism. When I came home my trouble was still with me, and I was confined to my bed, unable to help myself, for 22 months. After taking several bottles of Hood's Sarsaparilla I was well, have not been troubled with anything since. My wife was in ill health, suffering from headache, dizziness and dyspepsia. She took two bottles of Hood's Sarsaparilla and is now well and happy. J. A. WHEELER, 1900 Division St., Baltimore.

Hood's Pills are sold easily, yet promptly and efficiently, on the liver and bowels.

Deutscher Advokat.

Admitted to practice in all the courts. Special attention given to German speaking people and business. At the corner of 1st and 2nd streets. E. HOFFER, German Publicist.

BALD HEADS!

What is the condition of yours? Is your hair dry, harsh, brittle? Does it split at the ends? Has it a lifeless appearance? Does it fall out when combed or brushed? Is it full of dandruff? Does your scalp itch? Is it dry or in a heated condition? If these are some of your symptoms be warned in time or you will become bald.

Skookum Root Hair Grower

It is what you need. The production is not an accident, but the result of scientific research. Knowledge of the diseases of the hair and scalp led to the discovery of how to treat them. "Skookum" contains neither minerals nor oils. It is not a dye, but a delicately cooling and refreshing tonic. By stimulating the follicles, it stops falling hair, cures dandruff, and grows hair on bald heads.

Keep the scalp clean, healthy, and free from irritating conditions, by the use of Skookum Hair Soap. It destroys the scurf which feeds on the scalp, and keeps the hair cool, healthy, and growing. It is sold in all drug stores, or by mail, for \$1.00 per bottle, 6 for \$5.00. Send for sample, on receipt of price. Grower, \$1.00 per bottle, 6 for \$5.00. Send for sample, on receipt of price. THE SKOOKUM ROOT HAIR GROWER CO., 25 North Fifth Avenue, New York, N. Y.

NORTH SALEM.

Take It!
EVENING JOURNAL,
Only 2 cents a day delivered at your door.

RECENT INVENTIONS.
A portable apparatus for assisting in drawing in perspective.
A father's guide, with one half rigid and the other half flexible and provided with an adjustable latheholder.
A machine for painting roofing plates, consisting of a vat, agitator, adjustable rolls for applying the paint and an endless carrier.
A pencil made of aluminum wire, prepared by annealing the wire and subjecting the blanks to a bath of caustic soda and a water bath.
A method of making metallic flanged sign letters by electro depositing the metal in a cameo or intaglio mold of glass or other nonconducting material.

ODDS AND ENDS.
A Paris sculptor says that the day will come when women will be ashamed of too small hands.
The French Order of the Legion of Honor has 45,000 members, only 30 of whom, or 1 in every 2,250, are women.
Most of the transportation in Havana is furnished by little horses hitched to a victoria. There are 3,000 of these rigs in that city, and only one horse car line.
Last year 17 sunken rocks hitherto uncharted were discovered in various parts of the globe in the most convincing manner possible—by ships running on them.

HAIR DEATH
Instantly removes and forever destroys objectionable hair, whether upon the hands, arms or neck, without disfigurement or injury to the most delicate skin. It cures for fifty years the secret remedy of various women, acknowledged by physical and medical authorities, and the eminent dermatologist and hair specialist that ever lived. During his private life he has cured thousands of cases of hair death, and his remedy is now being sold in all the principal cities of Europe. Price, \$1.00 per bottle, 6 for \$5.00. Send for sample, on receipt of price. THE SKOOKUM ROOT HAIR GROWER CO., 25 North Fifth Avenue, New York, N. Y.

PROFESSIONAL AND BUSINESS CARDS.
D. H. D'ARCY, GEO. G. BINGHAM, Attorneys at Law, Rooms 1 and 2, 1st Floor Building, 144 State Street. Special attention given to business in the supreme and circuit courts of the state. 2-11
TULMON FORD, Attorney at law, Salem, Oregon. Office up stairs in Patton block.
