THE WORKING GIRL.

A Woman Adds Her Tribute to the Subject Discussed Saturday.

(Communicated.)

One reader of "Our Saturday Night" was pleased to note the fact that a busy editor could find time to come down from the discussion of higher subjects to give the one under consideration even a passing glance.

Tremendous responsibility rests upon the friends and patrons of the working girls. What can be done to enrich their intellects, cultivate their hearts, elevate their social station, cheer their often dreary, overburdened lives, removing as much as possible the environments which tend to the "slow process of degredation of the intellect, blunting the social and moral faculties and often destruction of the character."

We recognize the fact that the working girl is "sailing through a narrow channel where rocks and whirlpools abound;" sailing too, often in a rudderless craft, tossed about by the waves of adversity, neither expecting nor receiving a word of guidance nor a moiety of assistance from their superiors in wisdom or position.

SALEMITES RETURN.—Mr. and Mrs. Wm England, Mr. and Mrs. Eugene Breyman and Miss Ethel Cusick, returned this morning from Chicago, where they had been during the closing days of the Columbian Exposition.

Rubbers with opera and common sense heels, at Krause Bros.

PERTINENT PERSONALS.

Governor Boies, of Iowa, is speedily recovering.

Chicago Tribune: Does Pennoyer expect that the people of his state will pray for what they already have? He knows and they know that the United States has and will continue to have over \$600,000,000 of full legal tender silver money.

Such a union, we think, would be a great benefit to the participants as well as a reflex benefit to the community at large.

It has long been a cherished plan of the writer, to have formed in our city a "Woman's Christian Association," the object of which shall be to unite the efforts of the most zealous workers in each church, for the betterment of our city generally, believing that organized effort, in all directions, not making the suppression of any one evil the corner stone of the structure, is bound to become a power in our midst, before which the devotees of evil must tremble and the citadels of vice must fall.

The future only can eliminate the stupendous advantages gained by such an organization. Let church lines be from outside this great center for good, not in theory, but in fact, and future generations will look upon the sublime

results as almost incredible. Webster has beautifully said: "If we work upon marble it will perish; if we work upon brass, time will efface it; if we rear temples, they will crumble into dust; but if we work upon immortal minds, if we imbue them with principles, with the just fear of God, and love to fellow men, we engrave on these tablets, something which will brighten to all eternity."

WON'T ADVERTISE.—H. M. BRANSON & Co. say it hardly pays to advertise their choice specialties, for the rush at once takes their stock. They keep extra choice groceries, and enjoy a brisk trade.

IMPROVED LIGHTS.—The Weisback improved incandescent gas burners are being put in by Supt. McCane of the Salem Gas works.

ECONOMIZING.—As there are now sixteen publications in the field soliciting advertisements at Salem, legitimate newspapers at Salem are economizing in every direction. All deadhead subscribers have been cut off by the leading dailies and some offices are cutting down their force.

OREGON VEGETABLES.—E. W. Chapman, who lives eight miles southeast of Salem, brings in an Early Rose potato that is perfectly sound and weighing two pounds, and a beet of 9 pounds. These are on exhibition at our office and all who wish to tell their friends what kind of vegetables Oregon can produce should come in and see them.

WE CANNOT SPARE

Healthy flesh—nature never burdens the body with too much sound flesh. Loss of flesh usually indicates poor assimilation, which causes the loss of the best that's in food, the fat-forming element.

Scott's Emulsion

of pure cod liver oil with hypophosphites contains the very essence of all foods. In no other form can so much nutrition be taken and assimilated. Its range of usefulness has no limitation where weakness exists.
