PUSH THE REPORM SQUARELY.

balked in its work of reform by the To grade up a road, without proper They are probably not intentionally, quagmire. To plow and scrape a roadbut in the present crisis of the city's af- bed without finishing it with a heavy fairs certainly inopportunely. Push roller and coat of gravel or broken rock the work of reducing expenses. The is like putting the sheeting on a roof sheentees knew that this would be the without putting on the shingles, or last meeting of the council this year. committing any other piece of aston-They knew that a measure of reform proposing to effect a saving of \$4800 a lie crime. The public official who will year was pending. They knew that it was agreed upon by a majority of the council. They knew that at the first meeting of the new council a full board of officers must be chosen and, unless their salaries were reduced before their election, they would continue another year at present high pay. Knowing these facts, the councilmen who are in the city who favor a reduction should not be balked by the absentees.

In addition to the reductions propond by the reform committee thershould be a reduction of \$1000 a year in the office of city marshal. That proposition of the JOURNAD has the endorseme t of the leading business men of the city. \$100 a mouth is a good income these days and a dozen men can marshal for that pay. The office of marshal now is worth from two to three thousand dollars a year, if not this department would keep three men No office should be worth more than it But the salary of \$1500 is not all the stacle to be overcome and it must yield, marshal receives. By bringing cases from \$40 to \$80 a month additional fees,

sha b reduced proportionately. That is justice. A prominent Salem corporation recently found it necessary to retrench its expenses to the amount of four or five thousand dollars a year, The salaries were reduced all around, including the highest officials. In fact som : of the severest cuts were made on those who received the biggest pay. Let the council not fail to meet tonight and push its work of reform earnestly and vigorously. Honest men will not conduct the people's business less carefully than their own.

CALL A ROAD CONVENTION.

The project of holding a road convention should appeal to the businesss common sense of every taxpayer and friend of progress. It is perfectly apparent that cour present road poll tax and property tax for highways has not resu'ted in reads and to continue this system will never bring roads. Because the amount of money ruised by taxes is not sufficient to make good roads, and because the money expended is not scientifically and systematically ap. piled, therefore all that is done is but a patchwork, and leaves the roadbed where vahicles must travel, in a worse state than if never a dollar had been expeaded. To prove this it is only necessity to state a well known fact that today a broad tired wagon would carry a bigger load over the nat-ural surface of the soil anywhere in the strengthened. It is guaranteed to do carry a bigger load over the natcounty than it will over our alleged roads, which are a quaking mass of mire, the more they are used the more impassable they become. Educate the people to see this by calling a road convention.

It is useless to recite the deplorable condition of our reads. A few miles of road that has been graded and gravelled is in existence to show what ean be done. Chemekets, State and Commercial streets of Salem are clean hard streets where traffic is possible. The road to the Wallace farm in Polk county and the road from Salem north on the river bottom to the Claggett place for six miles are examples of the difference between part ally currectly built roads and worse, than no roads at all which exist in every other direction. The Wallac, and Cing;ett roads were

built by private enterprise. The worse than no roads are built with road taxes. The difference is the difference between wisdom and folly, intelligence and ignorance, scientific method and hap-hazard incapacity. The Claggett same agency and talk to our friends road is only good where it was finished. at a distance by means of the electric Where it was only graded and ditched but not sufficiently covered with gravel it is like the rest, only the worse for the work done upon it. Bring these

facts before a road convention. But enough has been done on these two pieces of road to prove forever the difference between application of private enterprise and grayel, and pub-The old city council should not be lic supervision and summer-fallowing. absence of the mayor or aldermen. drainage, is only to make an elevated ishing folly, and should be made a pub hus expend thousands of public taxes only to make roadways impassable serves the people in a manner no more intelligent than stopping up rat holes with porridge, or patching holes in a ship's side with tissue paper. The pubic need to be educated to realize the immorality of collecting taxes to make roads worse instead of better. Call: oad convention for this purpose.

Call a road convention to begin the work of building good roads in this county. Let a convention take counsel with engineers and surveyors and authorities on road building and prepare an approved plan upon which a piece of road shall be built at once. Let anther committee make an estimate of the cost of a first class gravelled road be found to perform the duties of city from Salem to Woodburn, and from Salem to Dallas and submit a plan for raising the money. Two hundred dollars a nulle at present prices of labor and didly admits that up to the present more. The reduction of \$1000 a year in material will probably build a passable road bed. If properly managed \$5000 is full of hopefulness as to the sucat work the year around on the streets can be raised to build a road from Sa and support three families. It is a bus- lem to Woodburn or Dallas. iness proposition that the council should It can be done within slx months. not overlook. It is the application of a before the dry season sets in. At all sound rule of economy that aldermen events let us move. Counsel will bring would apply to their own business. It wisdom. Consultation will develop is a good rule to apply to public affairs. ways and means. The American people possess the grit and the means to can be well filled for. SEEING BY ELECTRICITY.

Scientific Achievement That May Come

to Pass In the Future. We can write by electricity, can send pictures and designs by the wire. When the British association visited Newcastle, Professor Perry told his auditors that seeing by electricity was a possibility of the future, and he had shortly before drawn a picture of scientific achievements which would enable friends divided by large continents and oceans not only to talk with each other, but to look upon their features. Even before that Professor Bell is known to have been at work in his laboratory endeavoring to solve the problem, and though 10 years have elapsed since the possibility of applying the well known principles of light in the same way as the principles of sound have been

applied in the telephone was first

suggested, the professor is still as

hopeful of success as ever.

There is no theoretical reason why light may not be conducted in the same way as sound, but Professor Bell tells us that it will be very much more difficult to construct an apparatus for the purpose, owing to the immensely greater rapidity with which the vibrations of light take place when compared with the vibrations of sound. The difficulty, however, is merely one of finding a diaphragm sufficiently sensitive to receive these vibrations and produce the corresponding electrical vibrations, and it is encouraging to have it on the authority of such a man as Professor Bell that at least a dozen men, eminent in science in various parts of the world, are at present engaged in endeavoring to find the solution of this problem. Professor Bell himself, who has never ceased to grapple with the difficulty, canhis labors have been in vain, but he cessful issue of his own research as well as that of the other scientists who have taken the matter up .-Newcastle (England) Chronicle.

The benevolent person had put ! ents into the hands of the tramp, and feeling a kind of proprietary interest in him thereafter proceeded to question him a bit. "You're a pretty hard citizen,

aren't you?" he asked. "Rather difficult at times, sir," replied the peripatetic frankly.

"I presume you steal when you ge chance?" "Only in very necessitous cases,

sir, and then only in a small way." "And lie?" "Yes, it's part of our profession,

"And use tobacco?" "When I can get it, sir,"

The benevolent person began to be sorry he had invested in such stock, but he was going now to the bitter

"Of course," he went on, "you The tramp hesitated for the first time, as if in doubt, and looked at

the nickel in his hand. "Well, yes, sir," he replied slowly, "I drink two when I've got the price, but under the present circumstances I'll only drink one, unless

vou"-But the benevolent person could not stand it any longer, and he made a rush for the visitor, which resulted in a sudden disappearance.-Detroit Free Press.

They Were Harmless. In her book on the poet Whittier, Mrs. Claffin relates the following anecdote: An old Quaker friend visited Mr. Whittier. He was a bachelor, and when the hour for retiring came he was shown to his room. Soon after he was heard calling from the top of the stairs in an excited tone: "I think thee has made a mistake, Friend Whittier. I find female garments in my room!" At which Friend Whittier replied: "Thee'd
